FOR IMMEDIATE RELEASE

MYEG DEVELOPS AI POWERED CORONAVIRUS RISK PROFILING SYSTEM FOR CHINA VISITORS

Offers to Deploy Technology in Malaysia and Philippines Amid Global Coronavirus Concerns

Petaling Jaya, 19 February 2020 – MY E.G. Services Berhad (“MYEG” or “the Group”) has successfully developed an extensive Artificial Intelligence-powered Coronavirus risk profiling system, with capabilities that include historical geolocation and anomaly tracking for Chinese travelers, and is now making the technology available to the governments of Malaysia and the Philippines.

The timely introduction of this innovation by MYEG has been made possible through the leveraging of its partnership with Phoenix Travel Worldwide Co., a leading China outbound travel company whose shareholders include China State Owned Enterprise (SOE) Citic Capital, Haier and Legend Holdings/Lenovo.

In light of the outbreak of the novel coronavirus that has been declared a global health emergency by the World Health Organization (“WHO”), the need for a smart health profiling and tracking system capable of handling large volumes of inbound Chinese travelers has become a matter of profound urgency for governments worldwide, particularly of those countries that are popular destinations for visitors from mainland China, the epicentre of the virus.

MYEG’s latest innovation is a fully-automated system that encompasses analytics of a vast number of available data points, including visitors’ previous known whereabouts as well as heart rate and blood pressure readings crossed-referenced against public transportation ridership and exposure to locations with incidences of infections. In addition, the system provides ongoing engagement with the visitor within the country, thus enabling health authorities to be alerted of any anomalies and to take immediate

appropriate measures such as in the event that evacuation or quarantine of affected persons are necessary.

Implementing travel restrictions on visitors from certain cities like Wuhan and Wenzhou can be tricky and inaccurate if Governments depend on information on passports. With this system, historical geolocation information coupled with other relevant parameters creates a health risk profile on individual travelers that allows authorities to conduct more detailed assessment on high health risk visitors. The data analytics algorithm constantly evolves as we learn more about the virus each passing day.

About MY E.G. Services Bhd (MYEG)

MYEG, an MSC-status company listed on the Main Market of Bursa Malaysia Securities Berhad, is Malaysia's e-Government services provider. The Group's principal activities comprise of the development and implementation of e-Government services and the provision of other related services for the e-Government services projects. The Group's operations facilitate e-Government services between the public and various Government agencies, namely JPJ ("Jabatan Pengangkutan Jalan"), JIM ("Jabatan Insolvency Malaysia"), JPN ("Jabatan Pendaftaran Negara"), PDRM ("Polis DiRaja Malaysia"), DBKL ("Dewan Bandaraya Kuala Lumpur") and Jabatan Imigresen Malaysia. MYEG also operates in the Philippines, Indonesia and Bangladesh through joint ventures.
