EXPLANATORY NOTES

A1. BASIS OF PREPARATION

The quarterly financial statements have been prepared in accordance with Malaysian Financial Reporting Standards (“MFRS”) 134 – Interim Financial Reporting and Appendix 9B of the Bursa Malaysia Securities Berhad Listing Requirements, and should be read in conjunction with MKH Berhad’s audited financial statements for the financial year ended 30 September 2018, which have been prepared in accordance with Financial Reporting Standards (“FRS”) and the Companies Act 2016.

The adoption of the MFRS framework is on 1 October 2018 and the interim financial statements of the Group for the period ended 31 December 2018 are the first set of interim financial statements prepared in accordance with the MFRS Framework issued by the Malaysian Accounting Standard Board (“MASB”).

At the transition date, the Group reviewed its accounting policies and considered the transitional opportunities under MFRS 1 *First-time adoption of Malaysian Financial Reporting Standards*.

CHANGES IN ACCOUNTING POLICIES

The accounting policies and methods of computation adopted by the Group in this interim financial statements are consistent with those adopted for the annual financial statements for the financial year ended 30 September 2018 (“Annual Report 2018”) as well as those new and revised standards that take effects on annual financial period commencing on or after 1 October 2018. Adoption of new and revised Standards, Amendments and IC Interpretation are as follows:

MFRS 9	Financial Instruments (IFRS 9 issued by IASB in July 2014)
MFRS 15	Revenue from Contracts with Customers (and the related Clarification)
Amendments to MFRS 2	Classification and Measurement of Share-based Payment Transaction
Amendments to MFRS 4	Applying MFRS 9 Financial Instruments with MFRS 4 Insurance Contracts
Amendments to MFRS 140	Transfer of Investment Property
IC Interpretation 22	Foreign Currency Transactions and Advance Consideration
Annual Improvements to MFRSs 2014 - 2016 cycle	

The adoption of the abovementioned Standards, Amendments and IC Interpretation did not have any significant effect on this interim financial statement of the Group, except for the adoption of the following accounting standards:

MFRS 15 *Revenue from Contracts with Customers*

MFRS 15 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. MFRS 15 will supersede the current revenue recognition guidance including MFRS 118 Revenue, MFRS 111 *Construction Contracts* and the related interpretation when it becomes effective.

A1. BASIS OF PREPARATION (continued)

CHANGES IN ACCOUNTING POLICIES (continued)

MFRS 15 *Revenue from Contracts with Customers* (continued)

The core principle of MFRS 15 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the Standard introduces a 5-step approach to revenue recognition.

- | | |
|--------|---|
| Step 1 | : Identify the contract(s) with a customer |
| Step 2 | : Identify the performance obligations in the contract |
| Step 3 | : Determine the transaction price |
| Step 4 | : Allocate the transaction price to the performance obligations in the contract |
| Step 5 | : Recognise revenue when (or as) the entity satisfies a performance obligation |

Under MFRS 15, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when ‘control’ of the goods or services underlying the particular performance obligation is transferred to the customer. Far more prescriptive guidance has been added in MFRS 15 to deal with specific scenarios. Furthermore, extensive disclosures are required by MFRS 15.

In June 2016, the MASB issued Clarifications to MFRS 15 in relation to the identification of performance obligations, principal versus agent considerations, as well as licensing application guidance.

The directors have specifically considered MFRS 15’s guidance on contract modification arising from variation orders, identifying performance obligations, and the assessment of whether there is a significant financing component in the contracts, particularly taking into account the reason for the difference in timing between the transfer of control of service to the customer and the timing of the related payments.

MFRS 9 *Financial Instruments*

MFRS 9 (IFRS 9 issued by International Accounting Standard Board (“IASB”) in November 2009) introduced new requirements for the classification and measurement of financial assets. MFRS 9 (IFRS 9 issued by IASB in October 2010) includes requirements for the classification and measurement of financial liabilities and for derecognition, and in November 2013, the new requirements for general hedge accounting was issued by MASB. Another revised version of MFRS 9 was issued by MASB - MFRS 9 (IFRS 9 issued by IASB in July 2014) mainly to include (a) impairment requirements for financial assets and (b) limited amendments to the classification and measurement requirements by introducing a ‘fair value through other comprehensive income’ (“FVTOCI”) measurement category for certain simple debt instruments.

Key requirements of MFRS 9:

All recognised financial assets that are within the scope of MFRS 139 *Financial Instruments: Recognition and Measurement* are required to be subsequently measured at amortised cost or at fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods.

A1. BASIS OF PREPARATION (continued)

CHANGES IN ACCOUNTING POLICIES (continued)

MFRS 9 *Financial Instruments* (continued)

Debt instruments that are held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets, and that have contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured at FVTOCI. All other debt investments and equity investments are measured at fair values at the end of subsequent accounting periods. In addition, under MFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of equity instruments (that is not held for trading) in other comprehensive income, with only dividend income generally recognised in profit or loss.

With regard to the measurement of financial liabilities designated as fair value through profit or loss, MFRS 9 requires that the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of the effect of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Under MFRS 139, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss is presented in profit or loss.

In relation to the impairment of financial assets, MFRS 9 requires an expected credit loss model, as opposed to an incurred loss model under MFRS 139. The expected credit loss model requires an entity to account for expected credit losses and changes in those expected credit losses at end of each reporting period to reflect changes in credit risk since initial recognition. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.

MFRS 141 *Agriculture*

MFRS 141 prescribes the accounting treatment, financial statement presentation and disclosures related to agricultural activity. It requires measurement of fair value less costs to sell, from initial recognition of biological assets up to the point of harvest.

On 2 September 2014, the amendments to MFRS 116 *Property, Plant and Equipment* and MFRS 141 *Agriculture: Bearer Plants* introduce a new category of biological assets i.e. bearer plants. A bearer plant is a living plant that is used in the production and supply of agricultural produce, is expected to bear produce for more than one period, and has remote likelihood of being sold as agriculture produce. Bearer plants are accounted for under MFRS 116 as an item of property, plant and equipment. Agricultural produce growing on bearer plants continue to be measured at fair value less costs to sell under MFRS 141, with fair value changes recognised in profit or loss as the produce grows.

The Group's bearer plants consist of oil palm trees which the cost includes development expenditure and the plantation infrastructure from land clearing to the point of harvesting. Any replanting costs incurred are capitalised. These costs are currently in biological assets accounts and are measured at cost less accumulated amortisation based on estimated productive years of the plantation of 20 years from the date of maturity. Upon adoption of MFRS framework, the net carrying amount of the biological assets accounts will be reclassified to bearer plants as part of the Group's property, plant and equipment.

A1. BASIS OF PREPARATION (continued)**CHANGES IN ACCOUNTING POLICIES (continued)****MFRS 141 Agriculture (continued)**

Produce growing on bearer plants of the Group comprise fresh fruit bunches (“FFB”) prior to harvest. The valuation to be adopted by the Group considers the present value of the net cash flows expected to be generated from the sale of FFB. To arrive at the fair value of FFB, the management has considered the quantity of the unripe FFB on bearer plant prior to harvest when there is formation of oil content and the quantity will be based on yield per harvest per metric tonne. The estimated ripe FFB is based on actual oil extraction rate and kernel extraction rate of the unripe FFB from the laboratory tests. Cost to sell includes the costs in producing the FFB which are direct costs from the upkeep, harvesting cost and transportation cost.

The effects to the financial statements from the adoption of MFRS framework are as follows:

However, the Group as a transitioning entity adopted the MFRS Framework effective from 1 October 2018 and the Group is opted to early adopt this Agenda Decision after the MASB announcement was made. Based on the preliminary assessment made by the directors, the adoption of this Agenda Decision will have no material impact on the financial statements of the Group in the period of initial application.

(i) Second quarter ended 31 March 2019

The Group recorded lower revenue and profit before tax of RM279.9 million and RM34.5 million for the current quarter as compared to the preceding year correspondence quarter of RM325.5 million and RM41.6 million respectively. The decrease in the Group's revenue by 14.0% and the profit before tax by 17.1% was mainly due to lower recognition of revenue and profit from Hillpark Shah Alam projects following the handing over vacant possession of the Hillpark Avenue phase 11A&B and The Maples, and the Saville @ Cheras by the property and construction division. Lower revenue and gross profit from the plantation division as a result of lower average selling price for crude palm oil ("CPO") of RM1,777 per metric tonnes ("MT") in the current quarter as compared to the preceding year corresponding quarter of RM2,210 per MT.

(ii) Financial year-to-date ("YTD") ended 31 March 2019 by Segments

Property and construction

This division recorded higher revenue and profit before tax of RM377.4 million and RM51.4 million for the current YTD as compared to the preceding YTD of RM336.1 million and RM48.1 million respectively was mainly due to recognition of revenue and profit from newly launched and ongoing projects namely, Inspirasi @ Mont Kiara, TR Residence, MKH Boulevard II, Kajang East Precinct 1, Hillpark Residence and The Pinang and The Palm in Hill Park Shah Alam.

As at 31.03.2019, the Group has locked-in unbilled sales value of RM1.0 billion from which attributed sales revenue and profits will be recognised progressively as their development percentage of completion progresses and were mainly contributed from the ongoing projects namely Hill Park Shah Alam (RM146.9 million), Saville @ D'Lake Puchong (RM33.1 million), Hillpark Residence (RM63.5 million), TR Residence (RM260.2 million), Kajang 2 Precinct 2 (RM60.5 million), Inspirasi @ Mont Kiara (RM287.6 million), Kajang East Precinct 1 (RM110.0 million) and MKH Boulevard II (RM56.4 million).

Plantation

Despite the lower revenue for current YTD of RM104.7 million as compared to the preceding YTD of RM125.2 million, this division recorded higher profit before tax of RM5.0 million as compared to the preceding YTD of RM2.0 million.

Excluding unrealised foreign exchange gains of RM11.6 million and unrealised foreign exchange losses of RM20.6 million, this division's recorded loss before tax of RM6.6 million in the current YTD as compared to profit before tax of RM22.6 million in the preceding YTD due to lower average selling price for CPO of RM1,836 per MT in the current year as compared to the preceding YTD of RM2,321 per MT and lower oil extraction rate ("OER") achieved.

Hotel and property investment

This division recorded lower revenue and profit before tax of RM15.5 million and RM4.2 million for the current YTD as compared to the preceding YTD of RM16.6 million and RM5.3 million respectively mainly due to reduction in average rental rates for certain tenants in order to sustain the occupancy rates.

Trading

This division achieved higher revenue and profit before tax of RM42.9 million and RM2.1 million for the current YTD as compared to the preceding YTD of RM35.7 million and RM1.8 million respectively mainly due to higher building material sales to external subcontractors for the group's development projects.

Manufacturing

This division achieved higher revenue and profit before tax of RM5.7 million and RM1.4 million for the current YTD as compared to the preceding YTD of RM4.9 million and RM0.2 million respectively. The increase in profit before tax is mainly due to full recognition of rental following the successful conversion of 75% of the land and factory buildings for rental purposes that gives better returns on investment.

Investment holding

This division revenue and profit before tax/(loss before tax) were mainly derived from the inter-group transactions on management fee and interest billings and charging which were eliminated at the Group level.

B2. COMMENT ON MATERIAL CHANGES IN THE PROFIT BEFORE TAX OF THE CURRENT QUARTER COMPARED WITH PRECEDING QUARTER

	Current Quarter 31.03.2019 RM'000	Immediate Preceding Quarter 31.12.2018 RM'000	Changes RM'000
Revenue	279,906	267,846	12,060
Operating profit	41,697	46,159	(4,462)

Profit after tax	23,487	30,013	(6,526)
Profit attributable to ordinary equity holders of the parent	22,009	26,400	(4,391)

Despite the increase in revenue for the current quarter of RM279.9 million as compared to the preceding quarter of RM267.8 million, the Group recorded lower profit before tax of RM34.5 million as compared to the preceding quarter of RM41.1 million mainly due to lower unrealised foreign exchange gains of RM2.3 million in the current quarter as compared to the preceding quarter of RM9.4 million from the plantation division.

B3. VARIANCE OF ACTUAL PROFIT FROM PROFIT FORECAST AND PROFIT GUARANTEE

This is not applicable to the Group.

B4. CURRENT YEAR PROSPECTS

The Board of Directors expect the Group to achieve satisfactory results for the financial year ending 30 September 2019 arising from the following three (3) major segments:

- Property and construction segment - ongoing property development projects that have been launched with total unbilled sales of RM1.0 billion. Moving forward, the Klang Valley residential market is expected to remain challenging but the Group is well positioned as most of its properties are in the affordable segment whereby the demand continue to be strong.
- Plantation segment – crude palm oil (CPO) prices is expected to remain under pressure for the short term to medium term due to relatively high palm oil inventories. Nevertheless, we expect demand to pick up in 2019 following the reduced CPO levy by India as one of the main buyers of CPO, implementation of B10 and B20 biodiesel in Malaysia and Indonesia respectively, and due to seasonal factors such as festive demand. In addition, the abolishment of Indonesia export levy on CPO if market price is below USD570 per MT augers well for our plantation as we are also exporting our CPO. We would continue to focus on the estate management to further increase the production efficiencies including oil extraction rate and maximising the utilisation of the CPO mill.
- Property Investment segment – rental yield from this division is expected at average of approximately 5% per annum based on fair value as at 30 September 2018.
