14. Review of performance of operating segments for the current quarter and financial period ended 30 September 2019

Oil & Gas Segment

The Oil & Gas Segment's external revenue for the third quarter and financial period ended 30 September 2019 were RM360.8 million and RM1.3 billion, compared with RM450.4 million and RM1.5 billion in the corresponding periods in 2018. The segment had profit before tax of RM17.2 million and RM68.7 million respectively, compared with profit before tax of RM34.5 million and RM98.9 million in the corresponding periods in 2018. This segment has successfully completed in the early part of this quarter, the coating activities on a major project that has been on-going since late 2016. This completion contributed to the decreases noted in the segment for the current periods under review.

Renewable Energy Segment

The Renewable Energy Segment's external revenue for the third quarter and financial period ended 30 September 2019 were RM111.6 million and RM286.9 million, compared with RM91.7 million and RM235.8 million in the corresponding periods in 2018. In the same period, profit before tax were RM5.4 million and RM20.7million, compared with RM11.3 million and RM23.4 million in the corresponding periods in 2018.

For the current quarter and period to date compared with the corresponding periods in 2018, the increase in revenue was attributable to significant improvement in the process equipment fabrication businesses.

However, the lower profit before tax for the current quarter and period to date, compared with the corresponding periods in 2018, was mainly due to unanticipated costs escalation from a project in the boiler business.

Industrial Trading & Services Segment

The Industrial Trading & Services Segment's external revenue for the third quarter and financial period ended 30 September 2019 were RM113.6 million and RM326.9 million, compared with RM111.3 million and RM370.7 million in the corresponding periods in 2018. In the same period, the segment recorded a profit before tax of RM2.1 million and RM2.2 million, compared with profit before tax of RM1.1 million and RM10.0 million in the corresponding periods in 2018.

For the current quarter compared with the corresponding quarter in 2018, the increase in revenue from the building materials business was offset by lower revenue from the HDPE pipes business. For the current period to date compared with the corresponding period in 2018, all business units in the division suffered a decline in revenue due to the general slowdown in the construction sector.

For the current quarter compared with the corresponding quarter in 2018, the higher profit before tax was contributed by the building materials business. The comparatively higher profit before tax in the corresponding financial period ended 30 September 2018 was due to the gain from the disposal of property, plant and equipment.

15. Material changes in the profit before taxation for the current quarter as compared with the immediate preceding quarter

The Group recorded a profit before taxation of RM16.6 million in the current quarter, compared with a profit before taxation RM26.5 million in the previous quarter. The decrease was the result of lower level of activities in the oil & gas segment following completion of coating activities on a major project that has been on-going since late 2016.

16. Prospects

The Group's current order book of RM969.4 million, comprises of RM570.8 million in Oil & Gas, RM352.1 million in the Renewable Energy segment, and RM46.5 million in the Industrial Trading & Services sector.
