QUARTERLY REPORT ON CONSOLIDATED RESULTS FOR THE FOURTH QUARTER ENDED 31 DECEMBER 2020

A NOTES TO THE INTERIM FINANCIAL REPORT

A1. Basis of preparation

The interim financial statements are unaudited and have been prepared in accordance with the reporting requirements outlined in the Malaysian Financial Reporting Standards ("MFRS") No.134: Interim Financial Reporting, and Paragraph 9.22 of Bursa Malaysia Securities Berhad ("Bursa Securities") Main Market Listing Requirements and should be read in conjunction with the Company's audited financial statements for the financial year ended 31 December 2019.

The explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of Frontken Corporation Berhad ("FCB" or "the Company"), its subsidiaries since the financial year ended 31 December 2019.

The significant accounting policies adopted are consistent with those of the audited financial statements for the year ended 31 December 2019 except for those standards, amendments and interpretations which are effective from the annual period beginning 1 January 2020. The adoption of the MFRSs and Amendments do not have significant impact on the financial statements of the Group.

A2. Audit qualification

The auditors' report in respect of the audited consolidated financial statements of FCB for the financial year ended 31 December 2019 was not subjected to any qualification.

A3. Seasonality or cyclicality of interim operations

The Group's business operations were not materially affected by any seasonal or cyclical factors during the quarter under review although there was some impact on the operations in Malaysia and Singapore due to the Movement Control Order (MCO) from 18th of March 2020 where the amount of workforce allowed was reduced. We are now substantially back to full strength except for a small number of Malaysian employees that are still unable to commute to our Singapore office.

A4. Unusual items affecting assets, liabilities, equity, net income or cash flows

There were no items or events that arose, which affected the assets, liabilities, equity, net income or cash flows, of the Group that are unusual by reason of their nature, size or incidence during the current quarter.

A5. Material changes in estimates

There were no changes in estimates that had a material effect on the current guarter's results.

(Co. No. 651020-T) (Incorporated in Malaysia)

A6. Issuance, cancellations, repurchases, resale and repayments of debt and equity securities

There were no issuance and repayment of debt and equity securities, share buy-backs, share cancellations or resale of treasury shares during the current quarter.

As at 31 December 2020, the Company held 5,466,600 repurchased shares as treasury shares out of its total issued and paid-up share capital of 1,053,435,130 ordinary shares. Such treasury shares are held at a carrying amount of RM663,237.

A7. Dividends

During the financial period ended 31 December 2020, the Company paid the following dividend:

Second single-tier dividend on 13 April 2020, in respect of the financial year ended 31 December 2019, of 1.5 sen per ordinary share on 1,047,968,530 ordinary shares amounting to RM15,719,528.

First single-tier dividend on 22 September 2020, in respect of the financial year ended 31 December 2020, of 1.2 sen per ordinary share on 1,047,968,530 ordinary shares amounting to RM12,575,622.

B. ADDITIONAL INFORMATION REQUIRED BY THE LISTING REQUIREMENTS

B1. Analysis of performance

Current quarter's performance against the quarter ended 31 December 2019

The Group's revenue for the current quarter ended 31 December 2020 increased by approximately RM12.1 million (13.7%) compared to the preceding year corresponding quarter mainly contributed by our subsidiaries in Taiwan, Malaysia and the Philippines. Our Taiwan's unit benefited from the pick-up in volume in the semi-conductor space due to higher demand and strong orders from one of our customers' advanced nodes' chips. We would have achieved a better quarter but for the decline in our oil and gas divisions in Singapore due mainly to the economic slowdown caused by the pandemic.

The Group's profit after tax ("PAT") of RM25.3 million for the current quarter was RM5.7 million or 28.9% higher than the corresponding quarter's RM19.6 million. This was the highest PAT we had ever achieved. The higher profit was mainly due to improved revenue and better profit margin resulting from the continual efforts to improve efficiency across the Group.

It is worthwhile mentioning that this was our best ever quarter; more noteworthy in light of the global slowdown caused by the pandemic. We were able to achieve this because of the significant PAT improvement of 30.8% from our semi-conductor division compared to the preceding year corresponding quarter.

<u>Current 12 months period's performance against the 12 months period ended 31 December 2019</u>

The Group's revenue of RM368.3 million for the current period ended 31 December 2020 was RM28.4 million (8.4%) higher than that achieved in the preceding year corresponding period mainly contributed by the strong performance by our subsidiary in Taiwan. The revenue would have been better but for the indirect impact from the pandemic that hit our oil and gas division.

Against the same period last year, the PAT for the Group increased by RM14.1 million (19.0%) as a result of improved revenue and vigilance in cost management. If we were to exclude the withholding tax imposed on the dividend declared by the Group's subsidiary in Taiwan and the foreign currency exchange impact from the equation, the current year's PAT would have been 20.0% better than the preceding year corresponding period.

As a result of improved revenue and better profit margin, our semi-conductor division achieved a 32.4% improved PAT compared to the preceding year corresponding period.

B2. Comparison with immediate preceding quarter

	4th Quarter 31 Dec 2020	3rd Quarter 30 Sept 2020
	RM'000	RM'000
Revenue	101,036	94,792
Profit before tax	31,280	30,331
Profit after tax	25,250	22,995
Profit attributable to owners of the Company	23,290	21,341

(Co. No. 651020-T) (Incorporated in Malaysia)

The Group's revenue was 6.6% or approximately RM6.2 million higher during the current quarter as compared to the immediate preceding quarter mainly due to better performances from all our subsidiaries except for our unit in Indonesia.

The Group's PAT and profit attributable to owners for the current quarter increased by RM2.3 million (9.8%) and RM1.9 million (9.1%) respectively compared to the immediate preceding quarter.

The Group's improved unaudited profit for the current quarter was partly attributable to our continual efforts in improving our production processes leading to better cost management.

B3. Prospects

The Group recorded a remarkable fourth quarter results with a 28.9% and 9.8% increase respectively in its PAT compared to the preceding year corresponding quarter and immediate preceding quarter mainly attributable to the positive growth in our semi-conductor business. Semi-conductors are essential technology enablers that power many of the cutting-edge digital devices we use today. The global semi-conductor industry is set to continue its robust growth well into the next decade due to emerging technologies such as autonomous driving, artificial intelligence, 5G and Internet of Things, coupled with consistent spending on R&D and competition among key players in the market.

Consequently, the Group is seeing advancement and deployment of new innovative technologies following from the gradual roll-out of 5G network globally and we believe these developments in the electronic and technology space, coupled with the strong demand for our customer's advanced nodes' chips, will be positive for our business in years to come. To that end, the Group is looking to expand its capacity in Taiwan by setting up a new state of the art facility in anticipation of increase in the demand for our services relating to tools involved in the manufacturing of the leading edge chips which we are given to understand will be commercially available in 2022. We are currently already supporting our customer during their R&D production stage for this latest node.

In addition to the new facility in Taiwan, we are also exploring the viability of setting up a new facility overseas to further support our customer's expansion abroad.

As for the oil and gas industry, we noticed that new orders are trickling in towards the end of 2020 from the various umbrella contracts for provision of manpower supply and also mechanical rotating equipment services and parts that we have with the Petronas Group of Companies. We hope this momentum will pick up further throughout 2021. Looking at the strong appreciation of the Brent crude oil price thus far this year, we are cautiously optimistic that our oil and gas division will perform better than last year.

In line with global optimistic outlook, the Group anticipates that the overall business conditions in 2021 to be better than 2020. To that end, we are cautiously optimistic that our business will be able to continue with its growth momentum during the year and are excited with what lies ahead for us.
