14. Review of performance of operating segments for the current quarter and financial period ended 30 June 2022

Energy Segment

The Energy Segment's external revenue for the second quarter and financial period ended 30 June 2022 were RM510.2 million and RM776.6 million respectively, compared with RM164.1 million and RM311.6 million in the corresponding periods in 2021. The segment registered a profit before tax of RM77.4 million and RM80.4 million respectively, compared with RM7.9 million and RM20.3 million in the corresponding periods in 2021.

The increasing activity in the market and commencement of work from the strong order book held by the segment has contributed to the significant increase in revenue for both the current quarter and financial period under review. This has also directly contributed to the increase in profit for the periods under review.

Renewable Energy Segment

The Renewable Energy Segment's external revenue for the second quarter and financial period ended 30 June 2022 were RM117.2 million and RM207.2 million respectively, compared with RM65.4 million and RM139.4 million in the corresponding periods in 2021. The profit before tax were RM13.4 million and RM22.5 million respectively, as against RM7.1 million and RM13.8 million in the corresponding periods in 2021.

Higher revenue and profit before taxation of the Renewable Energy Segment were due mainly to higher number of projects executed by the Industrial Engineering unit and better profit margin from the after-sales services by the Agro-based Industrial unit.

Industrial Trading & Services Segment

The Industrial Trading & Services Segment's external revenue for the second quarter and financial periods ended 30 June 2022 were RM75.3 million and RM156.6 million respectively, compared with RM65.4 million and RM147.6 million in the corresponding periods in 2021. The segment recorded a profit before tax of RM6.0 million and RM10.3 million respectively, as against RM0.9 million and RM3.6 million in the corresponding periods in 2021.

Higher sales in heavy equipment and engine business in the second quarter were offset by lower building material trading activities in the construction sector, which continued to impact the results of the Industrial Trading & Services ("ITS") segment.

Higher profit before tax compared with the corresponding quarter and period in 2021 was due to positive contribution from heavy equipment and engine sales, recognition of the gain on disposal of an associated company, and recognition of gain on disposal of asset held for sales.

Stock name : WASEONG Financial Period Ended : 30 June 2022

Quarter : 2

15. Material changes in the profit before taxation for the current quarter as compared with the immediate preceding quarter

The Group recorded a profit before taxation of RM85.5 million in the current quarter, compared with RM9.4 million in the previous quarter. The increase in profit before taxation was the direct effect of increase in revenue in the current quarter, on the back of increasing activities in the market as well as the commencement of work from the strong order book held by the Group.

16. Prospects

The Group continues to maintain a strong order book, which stands at RM3.0 billion: comprising RM2.5 billion in the Energy segment, RM373.1 million in the Renewable Energy segment, and RM35.3 million in the Industrial Trading & Services segment. The Energy segment's strong order book arises from the increasing activities in the market.

Despite the above, the Group is still cautious given the current uncertain macro-economic situation which has created new challenges around the supply chain, project financing, cost escalation of essential materials, etc. Wherever possible, the Group will address these issues within its contracting arrangements to mitigate the risk.
