B. ADDITIONAL INFORMATION REQUIRED BY THE LISTING REQUIREMENTS

B1. Analysis of performance

The Group's revenue for the current quarter and 12 months ended 31 December 2014 ("FY2014") saw a significant increase of approximately RM50.7 million (93.1%) and RM119.2 million (62.6%) respectively compared to corresponding period of the preceding year. The improvement was mainly attributable to the better business performance by the Group's subsidiaries in Taiwan and Malaysia. There was a ramp up in the semi-conductor business in Taiwan due to improved outlook in this sector. In the case of Malaysia, the better performance was mainly due to the recognition of progressive revenue from the ATB project in Tanjung Bin coupled with higher revenue from both our oil and gas and semi-conductor division.

Against the same period last year, the profit before tax ("PBT") for the current quarter and 12 months ended 31 December 2014 increased by approximately RM7.4 million and RM22.2 million respectively as a result of improved business. The disposal of investment in an associate company also contributed to the improved results in 2014 in view of the Group share of losses of RM1.3 million in the last corresponding period.

B2. Comparison with immediate preceding quarter

	4th Quarter	3rd Quarter
	31 Dec 2014	30 Sept 2014
	RM'000	RM'000
Revenue	105,052	83,554
Profit before tax	9,914	8,816

The Group's revenue increased by 25.7% or approximately RM21.5 million during the current quarter as compared to the immediate preceding quarter. This was mainly due to higher revenue recorded by its subsidiaries in Malaysia for its oil and gas and semi-conductor division and subsidiary in Taiwan in the semi-conductor business.

The Group's unaudited PBT increased from RM8.8 million in the immediate preceding quarter to RM9.9 million in the current quarter, in line with the improved performance of the Group during the quarter.

B3. Prospects for the next year

The Group continued with an improved Q4 results and saw its 12 months profit surged to RM23.2 million compared to RM0.5 million for the same period last year. The improvement in business and operating performance augur well with us and this represents an encouraging sign that the Group is on the right track of recovery from the slowdown and deferment of projects by our customers in 2013.

In 2014, our effort in focusing on the quality of our services and efficiencies so as to maintain our competitiveness for enhancing business performance has been rewarded and this was reflected in the significant improvement in profit compared to 2013. The Group's acquisition of 45% stake in TTES Frontken Integrated Service Sdn Bhd (formally known as TTES Team & Specialist Sdn Bhd)("TTES")) is also starting to show the desired synergized effects to the Group and contributed positively to the Group's result since its acquisition. The Group is confident that TTES will continue to improve its overall performance in 2015.

With the encouraging outlook in Taiwan's semi-conductor sector, the Group is also confident that its Taiwan subsidiary will continue to deliver positive result to the Group.

The Group anticipates that the overall business conditions next year will continue to be challenging amidst global economic conditions uncertainty and slower growth in the regional economies. The Group's ATB project in Tanjung Bin is expected to be completed and delivered to customer in 2015. Nevertheless, the Group believes with the right marketing approach, the Group business prospect in 2015 remains positive and encouraging barring unforeseen circumstances.
