A3. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

The principal changes in accounting policies and their effects are set out below:

i. MFRS 10 Consolidated Financial Statements

MFRS 10 changes the definition of control. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. MFRS 10 establishes control as the basis for determining which entities are consolidated in the consolidated financial statements and sets out the accounting requirements for the preparation of consolidated financial statements. It replaces all the guidance on control and consolidation in MFRS 127 Consolidated and Separate Financial Statements and IC Interpretation 112 Consolidation – Special Purpose Entities.

Upon adoption of MFRS 10, certain subsidiaries were deconsolidated from the results of the Group and accounted for in accordance with other applicable accounting standards.

The effects of adopting MFRS 10 have been accounted for retrospectively in accordance with the transitional provision of the standard. Comparatives have been restated as disclosed in Appendix A. This change in accounting policy has resulted in decrease in reserves and non-controlling interest of the Group as at 31 December 2012 and 1 January 2012 as follows:

In RM Mil	As at 31 Dec 2012	As at 1 Jan 2012
Decrease in reserves	(160.6)	(93.2)
Decrease in non-controlling interests	(323.0)	(268.8)
	<u>(483.6)</u>	<u>(362.0)</u>

ii. MFRS 11 Joint Arrangements

MFRS 11 requires a party to a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations arising from the arrangement, rather than its legal form. There are two types of joint arrangements: joint operations and joint ventures. Joint operations arise where a joint operator has rights to the assets and obligations relating to the arrangement and hence accounts for its interest in assets, liabilities, revenue and expenses. Joint ventures arise where the joint operator has rights to the net assets of the arrangement and hence equity accounts for its interest. Proportional consolidation of joint ventures is no longer allowed.

The effects of adopting MFRS 11 have been accounted for retrospectively in accordance with the transitional provision of the standard. Comparatives have been restated as disclosed in Appendix A. This change in accounting policy has resulted in increase in reserves of the Group as at 31 December 2012 and 1 January 2012 as follows:

In RM Mil	As at 31 Dec 2012	As at 1 Jan 2012
Increase in reserves	<u>202.6</u>	<u>142.7</u>

iii. Amendment to MFRS 101 Presentation of Items of Other Comprehensive Income

The amendment to MFRS101 Presentation of Items of Other Comprehensive Income change the grouping of items presented in other comprehensive income. Items that could be reclassified to profit or loss at a future point in time would be presented separately from items that will never be reclassified.

The adoption of this amendment affects presentation only and has no financial impact on the Group's financial statements.

A3. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

The principal changes in accounting policies and their effects are set out below: (cont'd)

iv. Amendment to MFRS 116 *Property, Plant and Equipment (Annual Improvements 2009 – 2011)*

Arising from the adoption of Amendments to MFRS 116, certain spare parts and servicing equipments which meet the definition of property, plant and equipment are to be reclassified to property, plant and equipment and accordingly measured as per the Group's and the Company's accounting policy on property, plant and equipment.

Prior to 1 January 2013, stores, spares and others which are not major spare parts or stand-by equipment are classified as inventories. These items are measured at the lower of cost and net realisable value and are charged to income statements upon consumption. Major spare parts and stand-by equipment have been classified as property, plant and equipment and are measured as per the Group's and the Company's accounting policy on property, plant and equipment.

The Group is currently assessing the impact of adoption of Amendment to MFRS 116.

A4. CHANGES IN ESTIMATES

There were no material changes in estimates reported in the prior period or prior financial period.

A5. AUDIT REPORT OF PRECEDING ANNUAL FINANCIAL STATEMENTS

The auditors issued an unqualified audit opinion on the financial statements for the year ended 31 December 2012.

A6. DISCONTINUED OPERATIONS

The Group effectively ceased its Liner related business operations in June 2012. With the exception of the returning of leased containers, expected to complete in FY2013, all other outstanding business cessation processes were completed by the fourth quarter ended 31 December 2012.

Goodwill is tested for impairment on annual basis (31 December) or when circumstances indicate that the carrying value may be impaired. The Group's impairment test is a comparison of the goodwill's carrying value against its value-in-use (calculated using cash flow projections). The key assumptions used to determine the recoverable amount of the cash generating units were discussed in the annual consolidated financial statements for the year ended 31 December 2012.

Impairment test on the goodwill of the Group's investment in a quoted subsidiary is performed by comparing the carrying value of investment against the recoverable amount derived from its share price quoted on the Main Market of Bursa Malaysia.

Goodwill was not tested for impairment in the quarter as there were no indications of impairment as at 31 March 2013.

The other intangible assets relate to fair value of long term charter hire contracts, as determined by an independent professional valuer, amortised over the time charter period of the contracts.

B1. REVIEW OF GROUP PERFORMANCE AND CURRENT YEAR PROSPECTS

CONTINUING OPERATIONS

GROUP

	3 months ended		Year to date	
	RM Million 31-Mar-13	RM Million 31-Mar-12	RM Million 31-Mar-13	RM Million 31-Mar-12
Revenue	2,379.4	2,209.1	2,379.4	2,209.1
Operating Profit	394.9	275.9	394.9	275.9
PBT	354.7	139.4	354.7	139.4

QUARTER ON QUARTER

Group revenue of RM2,379.4 million for the quarter ended 31 March 2013 was 7.7% higher than the RM2,209.1 million revenue in the corresponding quarter. The increase in Group revenue was mainly due to higher revenue in Heavy Engineering from higher number of projects, combined with lease commencement of two Floating Storage Units ("FSUs") of a LNG regasification project in August 2012. Additionally, higher average freight rates has led to an improvement in Chemical business performance.

The increase in revenue was partially offset by a decline in Petroleum business revenue from lesser number of operating vessels.

Group operating profit of RM394.9 million was 43.2% higher than RM275.9 million profit in the corresponding quarter. The increase in profit was largely due to lower operating costs from smaller fleet of operating vessels, particularly for the Petroleum and Chemical businesses.

Group profit before tax of RM354.7 million was significantly higher than the RM139.4 million profit in the corresponding quarter. Lower vessel impairment in the current quarter of RM22.3 million compared to RM116.4 million in the corresponding quarter and the improvement in operating profit were the main causes of the increase in Group profit before tax.

B1. REVIEW OF GROUP PERFORMANCE AND CURRENT YEAR PROSPECTS (Cont'd.)

Performance and prospects of each operating segment are discussed below:

ENERGY RELATED SHIPPING ("ERS")

	Quarter RM Million		Year to date RM Million	
	31-Mar-13	31-Mar-12	31-Mar-13	31-Mar-12
Revenue:				
Third Party	1,424.7	1,512.6	1,424.7	1,512.6
Operating profit	252.9	244.8	252.9	244.8

QUARTER ON QUARTER

ERS revenue of RM1,424.7 million was 5.8% lower than RM1,512.6 million in the corresponding quarter, primarily due to softer freight rates and lesser number of operating vessels in the Petroleum business.

LNG business recorded higher revenue, primarily from commencement of two FSUs under a LNG regasification project in August 2012.

For Chemical business, higher average freight rates have mitigated the impact of lower revenue from a smaller fleet of operating vessels.

ERS recorded higher operating profit of RM252.9 million compared to RM244.8 million in the corresponding quarter, largely attributed to the improved results in the Chemical and Petroleum businesses following lower operating costs from a smaller fleet of operating vessels. The increase in profit was partly negated by lower operating profit in the LNG business resulting from vessel dry-dockings during the quarter.

The pattern of oil trading for petroleum segment is evolving. i.e increasing shale oil production in the US, shrinking European refinery capacity and refinery additions in Asia. With the changing shipping dynamics in the petroleum segment, there will be a gradual shift in demand towards long distance trading with the viability and development of shale oil, and the petroleum shipping segment may see a shift in preference towards bigger vessels such as VLCC or Suezmax which provide cost savings to the charterer due to large bulk shipments.

In the near term, the chemical shipping segment remains challenging due to the persistent demand-supply gap for chemical vessels. Despite decrease in supply overcapacity, there is no real impetus for demand. China, Middle East and Asia are expected to be the focus areas for chemical trades with the expansion of refinery capacity in the regions. In the vegetable oil segment, global palm oil production is expected to rise in tandem with rising demand. This bodes well for vegetable oil shipping in general.

In the LNG sector, with long-term contracts in hand, the sector's outlook remains favorable and continue to provide stability to the ERS segment.

B1. REVIEW OF GROUP PERFORMANCE AND CURRENT YEAR PROSPECTS (Cont'd.)

Performance and prospects of each operating segment are discussed below: (Cont'd.)

OTHER ENERGY BUSINESS ("OEB")

	Quarter RM Million		Year to date RM Million	
	31-Mar-13	31-Mar-12	31-Mar-13	31-Mar-12
Revenue:				
Third Party	826.8	594.2	826.8	594.2
Operating profit	118.1	118.1	118.1	118.1

QUARTER ON QUARTER

OEB's revenue of RM826.8 million was 39.1% higher than RM594.2 million in the corresponding quarter, predominantly driven by higher revenue in Heavy Engineering business.

The higher revenue in Heavy Engineering was largely due to higher number of projects being developed as compared to the corresponding quarter. Offshore business revenue was relatively flat with the same fleet strength compared to the corresponding quarter and long term nature of its business contracts.

OEB operating profit of RM118.1 million was in line with the corresponding quarter, largely due to preliminary stages of development for some of the Heavy Engineering projects developed in the current quarter.

Growth opportunities in OEB segment remains strong with rising demand from various field development projects within the Oil and Gas sector.

DISCONTINUED OPERATIONS

LINER RELATED BUSINESS

	Quarter RM Million		Year to date RM Million	
	31-Mar-13	31-Mar-12	31-Mar-13	31-Mar-12
Revenue:				
Third Party	0.1	99.5	0.1	99.5
Operating loss	(3.9)	(317.3)	(3.9)	(317.3)

The Group effectively ceased its Liner related business operations in June 2012. Accordingly, the segment's revenue and operating loss was significantly lower compared to the corresponding quarter.

B2. COMPARISON WITH PRECEDING QUARTER'S RESULTS

<u>GROUP</u>	Current Quarter RM Million 31-Mar-13	Preceding Quarter RM Million 31-Dec-12
Revenue:		
Third Party	<u>2,379.4</u>	<u>2,300.6</u>
Operating Profit	<u>394.9</u>	<u>472.1</u>
PBT	<u>354.7</u>	<u>720.8</u>

The Group's revenue of RM2,379.4 million was 3.4% higher than RM2,300.6 million in the preceding quarter. The increase in revenue was mainly due to higher revenue in Heavy Engineering from higher number of projects developed during the quarter.

Group operating profit of RM394.9 million was 16.3% lower than RM472.1 million in the preceding quarter, largely due to lower profit in LNG business from recognition of pre-operating costs for the two FSUs during the quarter and higher voyage costs incurred from vessel dry docking and repairs.

The current quarter's profit before tax of RM354.7 million is 50.8% lower than the preceding quarter's profit of RM720.8 million. Recognition of one off gain from lease commencement of the two FSUs and realisation of 50% intercompany profit from disposal of Gumusut-Kakap Semi Floating-Production System (L) Limited contributed to the higher profit before tax for the preceding quarter.

B3. GROUP CURRENT YEAR PROSPECTS

Year 2013 is expected to be another challenging year for the shipping industry with weak demand growth, volatile fuel prices and excess shipping capacity. However, long-term contracts in LNG and Offshore businesses continue to provide stability to the Group.
