### B. ADDITIONAL INFORMATION REQUIRED BY THE LISTING REQUIREMENTS

#### **B1.** Analysis of performance

Current quarter's performance against the quarter ended 30 June 2015

The Group's revenue of RM62.8 million for the current quarter was 5.7% lower compared to the RM66.6 million achieved in the corresponding quarter ended 30 June 2015. This was mainly due to completion of the ATB project in the beginning of the third quarter of financial year 2015. Excluding the revenue derived from the ATB Project the current quarter's revenue would have been 2.5% higher compared to the corresponding quarter in 2015. The revenue improvement was mainly due to better performances from the Group's subsidiaries in Taiwan, Philippines and Indonesia.

The Group's profit before tax of RM8.4 million for the current quarter was RM6.9 million or 441.9% higher than the corresponding quarter's RM1.6 million. The higher profit was mainly due to improved performances by our Taiwan, Philippines, Indonesia and Malaysia subsidiaries, coupled with foreign exchange gain recognized in the current quarter.

Current 6 months period's performance against the 6 months period ended 30 June 2015

The Group's revenue of RM121.6 million for the current period ended 30 June 2016 ("FY2016") was RM22.2 million lower than that achieved in the preceding year corresponding period. The lower revenue was mainly attributable to cessation of revenue recognition from the ATB project in FY2016. However, if we were to exclude the revenue from the ATB Project, the revenue would have been 2.6% higher compared to the corresponding period.

The domestic economic situation remains challenging during the relevant period and slowdown in our customers' business had resulted in a drop in business for the Group's subsidiaries in Singapore. Our subsidiary in Taiwan however continue to enjoy better business performance for this quarter due to the positive growth of the semi-conductor business. The Group's subsidiaries in the Philippines and Indonesia have also achieved higher revenue in FY2016 attributable to the growing portfolio of our sales network.

Against the same period last year, the profit before tax ("PBT") for the 6 months ended 30 June 2016 decreased by approximately 16.3%. During the period, customers' cost-down due to intense competition and weak market sentiment had resulted in a thinner overall margin for the Group. Foreign exchange loss of RM2.6 million, arising from overseas entities and funds denominated in foreign currencies, had resulted in a lower PBT for the current period, compared to a foreign exchange gain of RM2.4 million in the corresponding period last year.

### B2. Comparison with immediate preceding quarter

	2nd Quarter	1st Quarter
	30 Jun 2016	31 Mar 2016
	RM'000	RM'000
Revenue	62,848	58,788
Profit before tax	8,426	1,883

The Group's revenue was 6.9% or approximately RM4.1 million higher during the current quarter as compared to the immediate preceding quarter. This was mainly due to improved business performance for our subsidiaries in Taiwan, Singapore and Indonesia.

The Group's improved unaudited profit before tax for the current quarter was mainly attributable to higher revenue and also foreign exchange gain against the foreign exchange loss suffered in the immediate preceding quarter.

#### B3. Prospects for the year

The Group anticipates the overall business conditions in the remaining 6 months of the current financial year to remain challenging amidst uncertain global economic conditions in the region. We will continue to focus our attention on the quality of our services and efficiencies so as to maintain our competitiveness and is therefore cautiously optimistic that our performance for the remaining months will be satisfactory.

Accepting that the Group's overall margin will continue to be thinner as a result of cost-down from our customers for the months to come we will continue to be vigilant in our cost management and continually explore ways to improve on our efficiency to enhance our profitability.

We are pleased with the performance of our Malaysian, Taiwanese and Philippines subsidiaries during the period and continue to be optimistic that they will contribute positively to the Group in 2016. We are also encouraged by the improved business performance of our Indonesia subsidiary and will continue to strive for the turn-around of this business unit. However, the business in Singapore will continue to be challenging in light of the higher operating costs and significant business slowdown in that market.

Overall, the Group remains positive of its business and would continue to look for opportunity to grow.

#### B4. Variance in profit forecast

Not applicable as no profit forecast or profit guarantee has been announced or disclosed in a public document previously.
