A2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

The Group has not applied in advance the following accounting standards and/or interpretations (including the consequential amendments, if any) that have been issued by the Malaysian Accounting Standards Board ("MASB") but are not yet effective for the current financial year :- (cont'd)

Amendments to MFRS 2: Classification and Measurement of Share-based Payment Transactions	1 January 2018

Amendments to MFRS 15: Clarifications to MFRS 15 'Revenue from Contracts with Customers'	1 January 2018

Amendments to MFRS 128 : Long Term interests in Associates and Joint Ventures	1 January 2019
Amendments to MFRS 3 : Annual Improvement to MFRS Standards 2015-2017 Cycle	1 January 2019
Amendments to MFRS 11 : Annual Improvement to MFRS Standards 2015-2017 Cycle	1 January 2019
Amendments to MFRS 112 : Annual Improvement to MFRS Standards 2015-2017 Cycle	1 January 2019
Amendments to MFRS 123 : Annual Improvement to MFRS Standards 2015-2017 Cycle	1 January 2019

The adoption of the above accounting standards and/or interpretations (including the consequential amendments, if any) is expected to have no material impact on the financial statements of the Group upon their initial application except as follows:-

MFRS 9 (IFRS 9 issued by IASB in July 2014) replaces the existing guidance in MFRS 139 and introduces a revised guidance on the classification and measurement of financial instruments, including a single forward-looking 'expected loss' impairment model for calculating impairment on financial assets, and a new approach to hedge accounting. Under this MFRS 9, the classification of financial assets is driven by cash flow characteristics and the business model in which a financial asset is held. Therefore, it is expected that the Group's investments in unquoted shares that are currently stated at cost less accumulated impairment losses will be measured at fair value through other comprehensive income upon the adoption of MFRS 9. The Group is currently assessing the financial impact of adopting MFRS 9.

MFRS 15 establishes a single comprehensive model for revenue recognition and will supersede the current revenue recognition guidance and other related interpretations when it becomes effective. Under MFRS 15, an entity shall recognise revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customers. The amendments to MFRS 15 further clarify the concept of 'distinct' for the purposes of this accounting standard. In addition, extensive disclosures are required by MFRS 15. The Group anticipates that the application of MFRS 15 in the future may have a material impact on the amounts reported and disclosures made in the financial statements. However, it is not practicable to provide a reasonable estimate of the financial impacts of MFRS 15 until the Group performs a detailed review.

**NOTES TO THE INTERIM FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD ENDED
31 MARCH 2018**

PART A - EXPLANATORY NOTES PURSUANT TO MFRS 134 (CONT'D)

A2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

The amendments to MFRS 107 require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. Accordingly, there will be no financial impact on the financial statements of the Group upon its initial application. However, additional disclosure notes on the statements of cash flows may be required.

A3. AUDITORS' REPORT

The auditors' report of the preceding financial year of the Group was not subject to any qualification.

A4. SEASONAL OR CYCLICAL FACTORS

i) FABRIC PRODUCTION SEGMENT

The Group's sales of fabric products are subject to seasonality effect by virtue of fabrics being a primary input material of fashion and some household products. The majority of the Group's customers are downstream players, i.e. export-oriented garment manufacturers. As such, sales of the Group's fabric products are affected by factors such as change in fashion trends, consumer taste and surge in demand ahead of festive seasons. Economic outlook inevitably will also has a significant impact on the demand of fabric finished products, and hence on the demand of fabrics.

Exchange rates fluctuation and the generally higher production costs (primarily arisen from higher wages, costs relating to compliance to environmental protection rules and utilities costs) do impact the financial performance of fabric production.

Consumer sentiment is another important factor that impacts earnings of the fabric production segment, given their spending pattern differs at different stages in the economic cycle, which affects the demand for fashion products and consequently the demand over the Group's fabric products.

ii) PROJECT MANAGEMENT SERVICES AND INFRASTRUCTURE CONSTRUCTION SEGMENT

Business operations of the Group's project management services and infrastructure construction segment is not significantly affected by seasonal or cyclical factors.

In view of and with reference to the above, there shall be no review of performance on the following comparison basis:

PART B :-

EXPLANATORY NOTES PURSUANT TO THE MAIN MARKET LISTING REQUIREMENTS (PART A OF APPENDIX 9B) (CONT'D)

B2. MATERIAL CHANGES IN THE CURRENT REPORTING QUARTER COMPARED TO THE IMMEDIATE PRECEDING QUARTER (CONT'D)

b) PROJECT MANAGEMENT SERVICES AND INFRASTRUCTURE CONSTRUCTION SEGMENT

Revenue from the Group's project management services and infrastructure construction segment recorded a difference of RM2.56 million in contract revenue recognized. The previous infrastructure construction contract had been completed substantially on 31 December 2017. Revenue reported for the 3-month period ended 31 March 2018 was contributed by a new project management contract secured by subsidiary of the Company.

(ii) OPERATING PROFIT/LOSS

Results from operations of the Group for the current reporting quarter decreased compared to the immediate preceding quarter, as a result of combination of factors detailed below:-

- Decrease in sales revenue of the fabric production segment for the quarter ended 31 March 2018;
- Decrease in contract revenue recognized in respect of the project management services and infrastructure construction segment; and
- Additional allowances for impairment losses on trade receivables of RM551,000 made in the current reported quarter.

PART B :-

EXPLANATORY NOTES PURSUANT TO THE MAIN MARKET LISTING REQUIREMENTS (PART A OF APPENDIX 9B) (CONT'D)

B3. PROSPECTS

a) FABRIC PRODUCTION SEGMENT

The Group will continue to strive for improvement in productivity, to counter challenges posed by the up-trending wages and other manufacturing overheads (eg energy and electricity cost). In addition, the Group has also been exercising prudent costs control measures to preserve profit margin.

However, uncertainty over the recovery pace of global economy and the development of China gross domestic product growth in the coming years, economic policies, coupled with higher manufacturing overheads, especially wages and utilities, are still affecting the Group's financial performance, particularly when the Group is operating in the fast-moving consumer goods segment which demand is largely dependent on trend and fashion.

The China government is going to impose more stringent requirements on the back of environment protection concern. Moving forward, the Group anticipates higher fuel costs resulted from the compulsory switch from coal to liquefied natural gas used in its production process.

b) PROJECT MANAGEMENT SERVICES AND INFRASTRUCTURE CONSTRUCTION SEGMENT

Since the diversification of business into the project management services and infrastructure construction, there had been positive contribution of earnings recorded in the results of the Group from this business segment. The project management and infrastructure construction division completed substantially its maiden infrastructure construction project in December 2017 and secured a new project management services contract in 2018. The Group is confident that this segment will continue to contribute positively to its earnings to mitigate the impact of limited profitability growth in the fabric production segment.

B4. EXPLANATORY NOTE FOR VARIANCE FROM PROFIT FORECAST OR PROFIT GUARANTEE

The Group has not provided any profit forecast or profit guarantee during the quarter ended 31 March 2018.

SINOTOP HOLDINGS BERHAD (114842-H)

QUARTERLY REPORT FOR THE FIRST QUARTER ENDED 31 MARCH 2017

PART A - EXPLANATORY NOTES PURSUANT TO MFRS 134

A1. BASIS OF PREPARATION

These condensed consolidated interim financial statements are unaudited and have been prepared in accordance with MFRS 134: Interim Financial Reporting, and paragraph 9.22 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad.

The interim financial report should be read in conjunction with the audited financial statements of the Group for the year ended 31 December 2016. These explanatory notes attached to the condensed interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the year ended 31 December 2016.

A2. SIGNIFICANT ACCOUNTING POLICIES

During the current financial year, the Group has adopted the following new accounting standards and interpretations (including the consequential amendments, if any):-

MFRSs and/or IC Interpretations (Including the Consequential Amendments)

Amendments to MFRS 107 : Disclosure Initiative

Amendments to MFRS 112 : Recognition of Deferred Tax Assets for Unrealised Losses

The adoption of the above accounting standards and/or interpretations (including the consequential amendments) did not have any material impact on the Group's financial statements.

The Group has not applied in advance the following accounting standards and/or interpretations (including the consequential amendments, if any) that have been issued by the Malaysian Accounting Standards Board ("MASB") but are not yet effective for the current financial year:-

PART A - EXPLANATORY NOTES PURSUANT TO MFRS 134 (CONT'D)

A2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

The adoption of the above accounting standards and/or interpretations (including the consequential amendments, if any) is expected to have no material impact on the financial statements of the Group upon their initial application except as follows:-

MFRS 9 (IFRS 9 issued by IASB in July 2014) replaces the existing guidance in MFRS 139 and introduces a revised guidance on the classification and measurement of financial instruments, including a single forward-looking 'expected loss' impairment model for calculating impairment on financial assets, and a new approach to hedge accounting. Under this MFRS 9, the classification of financial assets is driven by cash flow characteristics and the business model in which a financial asset is held. Therefore, it is expected that the Group's investments in unquoted shares that are currently stated at cost less accumulated impairment losses will be measured at fair value through other comprehensive income upon the adoption of MFRS 9. The Group is currently assessing the financial impact of adopting MFRS 9.

MFRS 15 establishes a single comprehensive model for revenue recognition and will supersede the current revenue recognition guidance and other related interpretations when it becomes effective. Under MFRS 15, an entity shall recognise revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customers. The amendments to MFRS 15 further clarify the concept of 'distinct' for the purposes of this accounting standard. In addition, extensive disclosures are required by MFRS 15. The Group anticipates that the application of MFRS 15 in the future may have a material impact on the amounts reported and disclosures made in the financial statements. However, it is not practicable to provide a reasonable estimate of the financial impacts of MFRS 15 until the Group performs a detailed review.

The amendments to MFRS 107 require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. Accordingly, there will be no financial impact on the financial statements of the Group upon its initial application. However, additional disclosure notes on the statements of cash flows may be required.

A3. AUDITORS' REPORT

The auditors' report of the preceding financial year of the Group was not subject to any qualification.

A4. SEASONAL OR CYCLICAL FACTORS

i) FABRIC PRODUCTION SEGMENT

The Group's sales of fabric products are subject to seasonality effect by virtue of fabrics being a primary input material of fashion and some household products. The majority of the Group's customers are downstream players, i.e. export-oriented garment manufacturers. As such, sales of the Group's fabric products are affected by factors such as change in fashion trends, consumer taste and surge in demand ahead of festive seasons. Economic outlook inevitably will also have a significant impact on the demand of fabric finished products, and hence on the demand of fabrics. Generally, barring any unforeseen circumstances, the Group experiences slower sales typically in mid and end of a year (i.e., towards end of December and in the months of May and June).

Exchange rates fluctuation and the generally higher production costs (primarily arisen from higher wages, costs relating to compliance to environmental protection rules and utilities costs) do impact the Group's financial performance. Consumer sentiment is another important factor that impacts the Group's earnings, given their spending pattern differs at different stages in the economic cycle, which will affect the demand for fashion products and consequently the demand over the Group's fabric products.

QUARTERLY REPORT FOR THE FIRST QUARTER ENDED 31 MARCH 2017

PART A - EXPLANATORY NOTES PURSUANT TO MFRS 134 (CONT'D)

A4. SEASONAL OR CYCLICAL FACTORS (CONT'D)

ii) PROJECT MANAGEMENT SERVICES SEGMENT

The Group's provision of project management services business is correlated to the level of business activities in construction industry. However, it is not directly subject to cyclical factors that have impact on the construction industry or any seasonal factor.

A5. EXCEPTIONAL ITEMS

Not applicable.

A6. CHANGES IN ESTIMATES

A8. DIVIDEND

There were no dividends paid for the financial period ended 31 March 2017.

A9. SEGMENTAL INFORMATION

The Company obtained approval from its shareholders on 15 December 2016 to diversify into project management and infrastructure construction and related businesses. During the immediate preceding financial year ended 31 December 2016, the Group commenced its project management services business through a wholly-owned subsidiary, Gorgeous Goldhill Sdn Bhd.

QUARTERLY REPORT FOR THE FIRST QUARTER ENDED 31 MARCH 2017

PART B - EXPLANATORY NOTES PURSUANT TO THE MAIN MARKET LISTING REQUIREMENTS (PART A OF APPENDIX 9B)

B1. REVIEW OF PERFORMANCE FOR THE CURRENT QUARTER AND FINANCIAL YEAR & CORRESPONDING QUARTER IN THE PRECEDING FINANCIAL YEAR

REVENUE

Total sales revenue decreased by RM2.17 million compared to the corresponding quarter in the preceding financial year. The effect of sluggish economy has taken its toll on the Group's sales revenue in a greater impact, particularly in the domestic sales segment. Fluctuations observed in either of the market segments (domestic & export) do not indicate any significant change in the sales and marketing direction of the Group. Instead, analysis of the Group's sales revenue in totality would be more appropriate in assessing its financial performance.

PROFIT AFTER TAXATION

The Group recorded a profit after taxation ("PAT") of RM418,000 for the current quarter compared to RM614,000 registered in the corresponding quarter for the preceding financial year, generated from its core business of manufacturing and sale of fabrics and its share of results of Suzhou Han Ling Packaging Co. Ltd ("Suzhou Han Ling"), the Group's joint venture company. The Group recognised its share of results in Suzhou Han Ling. After taking into account of the Group's share of loss in Suzhou Han Ling amounting to RM146,000, the Group reported a PAT of RM418,000 in current year quarter ended 31 March 2017.

Prices of major raw materials (yarns made from different types of fibre) have been on the rise due to escalated costs being passed down from suppliers.

B2. MATERIAL CHANGE IN THE PROFIT BEFORE TAXATION FOR THE CURRENT REPORTED QUARTER AS COMPARED TO THE IMMEDIATE PRECEDING QUARTER

The Group registered profit before taxation ("PBT") of RM422,000 in the current quarter compared to RM2.41 million recorded in the immediate preceding quarter, generated from fabric production and project management services business operations as well as its share of results of a joint venture, Suzhou Han Ling. The decrease in PBT recorded in the current quarter is RM1.99 million.

The reason for a set of more favorable results recorded in the immediate preceding quarter is that the fourth quarter is traditionally the best performing quarter with sales tend to peak ahead of festivals at year end and at the beginning of new year.

B3. PROSPECTS

The Group will continue to strive for improvement in productivity, to counter challenges posed by the up-trending wages and other manufacturing overheads (eg energy and electricity cost). In addition, the Group has also been exercising prudent costs control measures to preserve profit margin.

However, uncertainty over the recovery pace of global economy and the development of China gross domestic product growth in the coming years, economic policies, coupled with higher manufacturing overheads, especially wages and utilities, are still affecting the Group's financial performance, particularly when the Group is operating in the fast-moving consumer goods segment which demand is largely dependent on trend and fashion.

The China government is going to impose more stringent requirements on the back of environment protection concern. Moving forward, the Group anticipates higher fuel costs resulted from the compulsory switch from coal to liquefied natural gas used in its production process.

The Company had on 15 December 2016 obtained its shareholders' approval for diversification of the core business of the Group to include project management and infrastructure construction related businesses ("Diversification").
