MFRS 9 Financial Instruments

MFRS 9 (IFRS 9 issued by IASB in July 2014) replaces the existing guidance in MFRS 139 Financial Instruments: Recognition and Measurement and introduces a revised guidance on the classification and measurement of financial instruments, including a single forward-looking ‘expected loss’ impairment model for calculating impairment on financial assets, and a new approach to hedge accounting. Under this MFRS 9, the classification of financial assets is driven by cash flow characteristics and the business model in which a financial asset is held.

Furthermore, pursuant to MFRS 9, it will no longer be necessary for a loss event to occur before an impairment loss is recognised. Instead, the Group is required to recognise and measure a lifetime expected credit loss (“ECL”) on its debt instruments. This application will result in earlier recognition of credit losses.

The adoption of MFRS9 did not have significant effects on the interim financial report upon their initial application.

MFRS 15 Revenue from Contracts with Customers

MFRS 15 establishes a single comprehensive model for revenue recognition and will supersede the current revenue recognition guidance and other related interpretations when it becomes effective. Under MFRS 15, an entity shall recognise revenue when (or as) a performance obligation is satisfied, i.e. when ‘control’ of the distinct promised goods or services underlying the particular performance obligation is transferred to the customers. The amendments to MFRS 15 further clarify the concept of ‘distinct’ for the purposes of this accounting standard. In addition, extensive disclosures are also required by MFRS 15 about the nature, amount, timing and uncertainty of revenue and cash flows from contracts with customers.

The adoption of MFRS 15 did not have significant effects on the interim financial report upon their initial application.
