Caring's 9MFY16 net earnings of RM4.6m make up only 39% and 37% of our and consensus full year forecast respectively. The negative growth in earnings came about despite revenue posting a positive 8.5% increase. The higher revenue was attributed to higher sales achieved by aggressive and extensive promotion campaign generated from its 107 existing and new outlets opened during FY16. Based on its poor 9MFY16 performance, we have revised our FY16 and FY17 net earnings forecast to RM6.6m and RM9.6m respectively. Our new target price is RM0.92. Maintain SELL.

QoQ. Revenue for the quarter showed a 5.2% QoQ increase to RM103.4m. This was due to higher sales generation by its outlets where there were 2 new outlets opened and 1 closed. PAT also improved by 8.9% to RM3.1m. This was contributed by higher sales with higher gross profit margin attributable through materialization of annual purchase rebates from suppliers. However, lower selling price as a result of market competition has impacted its current quarter profits. As a result, net earnings showed a 15.6% drop QoQ to RM1.6m.

Prospects. The operating environment for Caring remains challenging and competitive. Consumer sentiment is still low and the company is in the midst of a price war. Margins have been sacrificed (i.e. offering lower prices) to generate sales and this has exerted pressure on its operating profits.

Dividend. No dividend was declared during the current guarter.

Revised forecast. We have revised our FY16 and FY17 net earnings forecasts to RM6.6m (-45%) and RM9.6m (-28%) respectively.

Valuation. Based on 3 years sector weighted average (retail and pharmaceutical) PER of 21x, we have derived a new target price of RM0.92. Maintain SELL.
