

FOR IMMEDIATE RELEASE

**U MOBILE NAMES OCK AS A PREFERRED
NEXT GEN 5G IBC INFRASTRUCTURE PARTNER**

- U Mobile signs MOU with OCK as one of its preferred 5G In-Building Coverage (IBC) infrastructure partners for its Next Gen 5G rollout nationwide
- This collaboration will see U Mobile tap into OCK's expertise to drive its 5G IBC rollout, while exploring innovations for 5G in-building connectivity
- The partnership also aims to deliver a fast and cost-effective deployment through a commercially competitive arrangement

KUALA LUMPUR, 11 June 2025 – U Mobile, Malaysia's Next Gen 5G network provider, has signed a Memorandum of Understanding (MoU) with OCK Telco Infra Sdn Bhd, a wholly owned subsidiary of OCK Group Berhad (OCK), Malaysia's largest telecommunications network solutions provider and regional towerco. Through this MoU, OCK will become one of U Mobile's preferred 5G In-Building Coverage (IBC) infrastructure partners for its nationwide Next Gen 5G rollout.

This collaboration represents another critical milestone in U Mobile's Next Gen 5G network deployment especially in delivering a superior 5G performance in high-traffic indoor environments. It also further reinforces the company's target of reaching 80% coverage of populated areas (CoPA) by July 2026.

With OCK's experience and capabilities in deploying telco infrastructure, U Mobile aims to accelerate its 5G IBC deployment with customised solutions tailored to the unique needs of each site. The partnership will prioritise reliable, high-performance indoor 5G connectivity that supports ultra-fast speeds, low latency, and seamless user experiences. Both parties also aim to deliver a fast and cost-effective deployment through a commercially competitive arrangement.

As part of the MOU, U Mobile and OCK will also jointly explore next-generation IBC innovations, including solutions that integrate technologies such as Artificial Intelligence (AI), Internet of Things (IoT), smart cities, and autonomous systems, laying the groundwork for future-ready digital environments.

"U Mobile is pleased to have OCK as one of our preferred IBC infrastructure partners as we ramp up our nationwide 5G deployment. As Malaysia's Next Gen 5G network provider, we are committed to empowering consumers and enterprises through reliable, ultra-fast connectivity. This partnership with OCK further enhances our ability to deliver that promise, especially in indoor and high-density environments. OCK will also serve as a key enabler in supporting our goal of achieving 80% CoPA by July 2026, while laying the foundation for broader 5G innovation and adoption," said Woon Ooi Yuen, Chief Technology Officer of U Mobile.

OCK Group Managing Director Datuk Wira Sam Ooi Chin Khoo commented, "Given our established reputation and longstanding track record as the largest telecommunication network solutions provider in Malaysia, we are immensely honoured to have partnered with U Mobile on this strategic collaboration, highlighting our resolute emphasis towards the support of Malaysia's digital transformation. By leveraging on each other's unique strengths, we intend to spearhead the deployment of 5G infrastructure and unlock the full potential of 5G technologies to drive new industries, support local businesses and enhance the livelihoods of communities nationwide."

The MoU was signed by Woon Ooi Yuen, Chief Technology Officer of U Mobile, and Datuk David Low Hock Keong, Group Chief Executive Officer of OCK, and was witnessed by Wong Heang Tuck, Chief Executive Officer of U Mobile, and Datuk Wira Sam Ooi Chin Khoon, Group Managing Director of OCK, at U Mobile's corporate headquarters.

###

About U Mobile

U Mobile is a trusted name in the telco industry, known for its innovative mindset and network capabilities. As Malaysia's 5G network provider, the company also strives to provide unbeatable converged solutions and unparalleled customer experience via a next gen 5G network that is enterprise grade, driving adoption and fostering digital transformation. U Mobile's vision is to be Malaysia's favourite digital services partner by delivering innovative solutions that constantly make things possible.

About OCK Group Berhad

OCK Group Berhad is Malaysia's leading telecommunication network solutions provider. The Group was listed on the ACE Market of Bursa Malaysia Securities Berhad in 2012 and was subsequently transferred to the Main Market on 20 November 2014 due to its strong business growth performance over the years and bright development prospects.

Since its incorporation in 2000, the Group has evolved from a maintenance and engineering ("M&E") company to a full turnkey solutions provider with four key business divisions covering telecommunication network services, green energy & power solutions, M&E engineering services and trading of telecommunication and network products.

With more than 3,800 employees, OCK remains dedicated to its vision of becoming the service partner of choice for telecommunication services across the Southeast Asian region. The Group has been strategically expanding its presence across Southeast Asia and continues to position itself in key emerging economies such as Myanmar, Vietnam and Indonesia.

OCK intends to become one of the largest independent Southeast Asian telecommunication tower companies and currently has a portfolio of more than 5,500 telecommunication towers.

On top of being a turnkey solutions provider in the solar business, OCK is well equipped with engineering, procurement and construction capabilities to build as well as own solar farms.
