

## Media Release

**PETRONAS**

### **PETRONAS GAS BERHAD REAFFIRMS COMMITMENT TO SAFETY FOLLOWING INVESTIGATION FINDINGS**

**KUALA LUMPUR, 1 July 2025** – PETRONAS Gas Berhad (PGB) takes note of the findings released by the relevant authorities in relation to the 1 April 2025 pipeline incident at Putra Heights.

PGB reiterates our ongoing commitment to full transparency, continuous improvement, care for those affected, and to continue its collaboration with the Special Taskforce and relevant authorities. Since the incident, PGB has mobilised substantial efforts to ensure public safety, support the impacted community, and maintain gas supply continuity across the country.

This incident is unprecedented in the history of our gas transmission system, and we fully recognise the public concerns surrounding the safety of the pipeline system, especially with the continuity of gas flow through the network.

The Peninsular Gas Utilisation (PGU) system is designed with multiple layers of safety and resilience, underpinned by over three decades of engineering and operational experience. Our systems and people are working continuously to ensure secure and reliable gas delivery to homes, industries, and the nation's power sector.
