- (ii) On 24 September 2025, the Company's wholly-owned subsidiary, Solarcity REIT Sdn. Bhd. has acquired 80.00% of the shares in High Power Resources Sdn. Bhd. ("HPRSB"). The principal business activities of HPRSB are to carry on the business of renewable energy generation; to act as commission agents for solar power plant projects and related services; and installation, maintenance and servicing of non-electric solar energy equipment.

The incorporation and acquisition of said companies are not expected to have any significant impact on the net earnings per share and net tangible assets per share of the Group for the current financial period under review.

B1. REVIEW OF PERFORMANCE

The Group has changed its financial year end from 31 March to 30 September. This reporting period covers the 18 months financial period from 1 April 2024 to 30 September 2025. As such, there will be no comparative figures available for the same period last year.

The revenue for current quarter ended 30 September 2025 is primarily driven by the Group's continued progress milestones in the construction of Corporate Green Power Programme ("CGPP") as well as residential, commercial and industrial ("C&I") projects.

The Group achieved a profit after taxation ("PAT") of RM7.84 million after accounting administrative expenses and finance costs arising from financing for the construction of projects.

B2. COMPARISON AGAINST PRECEDING QUARTER

	CURRENT QUARTER 30.09.2025 RM'000	PRECEDING QUARTER 30.06.2025 RM'000	Variance	
			RM'000	%
Revenue	87,976	64,422	23,554	36.56
Profit before tax ("PBT")	2,220	1,646	574	34.87

For the current financial quarter, the Group's revenue increased by 36.56%, to approximately RM87.98 million, an increase from RM64.42 million in the immediate preceding financial quarter. The increase was driven by higher contribution from CGPP projects, as several projects achieved significant progress in the current financial quarter.

The PBT increased by 34.87%, to approximately RM2.22 million in the current financial quarter as compared to RM1.65 million in the immediate preceding financial quarter. The increase was primarily due to higher gross profit contribution from CGPP as well as C&I projects in the current financial quarter.

B3. PROSPECTS

Sunview remains confident in the resilience of the renewable energy (“RE”) sector, underpinned by robust government initiatives, supportive policy frameworks, and increasing private-sector participation in the national energy transition. The outlook for Malaysia’s RE landscape is further strengthened by the National Energy Transition Roadmap and 13th Malaysia Plan (“13MP”), which outlined ambitious national targets of achieving a 37.8% RE share by 2035 and 70% by 2050, with solar energy projected to remain the primary contributor. A central goal of the 13MP is to achieve net-zero emissions as early as 2050, supported by a commitment to reduce greenhouse gas (GHG) emission intensity in GDP by 45% by 2030, relative to 2005 levels. These targets provide a strong foundation for RE industry participants like Sunview to expand their operations and pursue long-term, sustainable growth.

The Budget 2026 announcement marks another milestone in Malaysia’s pivot towards a low-carbon and sustainable economy. With the introduction of new incentives, financing mechanisms, and carbon pricing instruments, the government is accelerating the adoption of green technologies and strengthening national energy security. Collectively, these developments present significant growth opportunities for Sunview to expand its participation across the RE value chain, positioning the Group to contribute meaningfully to Malaysia’s clean energy ambitions.

The government’s commitment to a low-carbon economy was further reinforced under Budget 2026, which introduced a Carbon Tax to align fiscal policy with Malaysia’s broader energy transition and climate objectives. The tax will be implemented in stages, with an initial focus on the iron, steel, and energy sectors, industries that collectively account for a significant share of the nation’s carbon emissions. This measure is consistent with Malaysia’s National Carbon Market Policy and the forthcoming Climate Change Bill, effectively translating emissions into measurable costs and accelerating industrial decarbonisation.

Malaysia’s RE sector is entering a transformative period with the commencement of Regulatory Period 4 on 1 July 2025, until 31 December 2027. The average base power tariff is set to rise to 45.40 sen/kWh from 39.95 sen/kWh under RP3, while the introduction of monthly automatic fuel adjustments—replacing the previous bi-annual imbalance cost pass-through—is expected to see greater pricing volatility. This shift is accelerating the adoption of RE solutions, especially among energy-intensive industries such as data centres and large commercial users.

The Corporate Renewable Energy Supply Scheme (“CRESS”) is gaining strong momentum as rising electricity tariffs drive demand for cost-effective and sustainable energy solutions. By enabling direct energy transactions between RE developers and corporate consumers through open grid access, CRESS offers long-term pricing stability while supporting ESG goals. It is expected to attract RM3.5 billion in private investment and generates 500MW of renewable capacity. With the System Access Charge (SAC) fixed for the next three years—at 25 sen/kWh for firm energy (such as solar with BESS or biomass) and 45 sen/kWh for non-firm energy—the scheme provides greater cost certainty and investment visibility. This creates a compelling opportunity for solar players like Sunview to expand their market reach, whether as asset owners or EPCC providers.

B3. PROSPECTS (CONTINUED)

The government plans to launch Solar Accelerated Transition Action Programme (“Solar ATAP”) in December, replacing the Net Energy Metering (“NEM”) 3.0 programme, marking the next phase in Malaysia’s RE transition. Under Solar ATAP, energy offsets are determined based on the system marginal price, the wholesale electricity clearing price that fluctuates every 30 minutes in line with the cost of the last power plant dispatched to meet demand. This dynamic pricing mechanism is expected to revitalise Malaysia’s rooftop solar segment, encouraging greater participation in self-generation and grid exports. With a total capacity allocation of up to 500MW, Solar ATAP empowers consumers to play a more active role in driving RE adoption nationwide. Sunview’s Commercial and Industrial division continues to support clients through turnkey and financed solar models under Solar ATAP, helping businesses transition seamlessly to RE.

The residential solar market is expected to experience rapid growth, supported by several government initiatives and policy. The government has introduced the Community Renewable Energy Aggregation Mechanism (CREAM), which encourages wider adoption in the residential space by allowing homeowners to lease or rent out their rooftops for solar power generation. With an established presence in the residential solar market, Sunview is well-positioned to benefit from this scheme and capture the growing demand.

The LSS programme continues to serve as a key driver of utility-scale solar deployment in Malaysia. The recently announced LSS5 winners will add 2,000MW of capacity to the national grid, and Sunview is positioning itself to secure EPCC contracts by leveraging its strong execution capabilities and 12-year track record in solar photovoltaic (PV) delivery. Simultaneously, the Group is bidding in the LSS5+ tender, which offers an additional 2,000MW through an open bidding process—1,500MW for land-based solar projects and 500MW for floating solar systems. To accelerate large-scale deployment, Budget 2026 introduced LSS6, which will add approximately 2GW of new solar capacity and mobilise around RM6 billion in private investment. Sunview intends to actively pursue these prospects, reinforcing its dual-role strategy across asset development and service delivery.

The Green Technology Financing Scheme (“GTFS 5.0”) has also been extended until 31 December 2026, with RM1 billion in financing support and government guarantees of up to 80% for waste projects and 60% for energy-related ventures. This extension will continue to facilitate access to low-cost green funding for Sunview’s clients and projects, further accelerating adoption of solar and BESS technologies. Meanwhile, Malaysia’s commitment to diversify its energy mix is reflected in the additional 300MW Feed-in Tariff (“FiT”) allocation for biomass, biogas, and small hydro projects, with operations expected by 2028. Although Sunview’s focus remains solar and energy storage, the Group remains open to exploring collaborative opportunities that integrate hybrid renewable solutions.

B3. PROSPECTS (CONTINUED)

Malaysia's grid modernisation efforts are further supported by the introduction of the country's first large-scale BESS initiative, targeting 400MW/1,600MWh by 2026. With the end of the NEM programme and the transition towards improved self-consumption and aggregation mechanisms, demand for BESS is expected to increase, particularly as households and commercial users seek to maximise solar utilisation and hedge against rising tariff volatility. Sunview is currently assessing participation in this segment, which is expected to play a key role in improving energy reliability and unlocking the full value of solar infrastructure.

As of 30 September 2025, the Group's unbilled order book stands at RM173.80 million, providing the Group with financial visibility in the coming year. The Group does not foresee any material adverse effect on its financial position or business.

The Board of Directors remains cautiously optimistic about the Group's performance moving forward.

B10. MATERIAL LITIGATION

The Company's wholly owned subsidiary, Fabulous Sunview Sdn Bhd ("**FSSB**"), together with TSS Cemerlang have attended the decision hearing on 7 August 2025 for FSSB's Application to Set Aside the Adjudication Decision and Stay Application, together with TSS Cemerlang's Enforcement Application, where the sealed written orders were officially issued by the Court on 27 August 2025.

The outcome of each of the application is as follows:-

(a) FSSB's Application to Set Aside the Adjudication Decision and Stay Application

The Court held the Application to Set Aside the Adjudication Decision is dismissed whereas the Stay Application is struck out. The Court directed FSSB to pay TSS Cemerlang a sum of RM15,600.00 comprising of cost and allocator fees.

(b) TSS Cemerlang's Enforcement Application

The Court held that TSS Cemerlang is permitted to enforce the Adjudication Decision dated 8 April 2025 issued by the Adjudicator in the adjudication proceedings under the CIPAA 2012 and further directed that FSSB is required to pay TSS Cemerlang the sum of RM1,751,130.17 comprising of adjudication sum, interests, adjudicator's fees and adjudication proceedings costs, costs for TSS Cemerlang and allocator fee.

Following the issuance of the Court's orders, the Company has carefully reviewed the outcomes of both the setting aside and enforcement applications. The Company emphasises that the adjudication process under CIPAA is intended as an interim payment mechanism and does not constitute a final determination of the parties' rights and obligations. The recent High Court decision was confined to assess the fairness of the adjudicator's process, and did not address nor determine the substantive merits of the dispute.

The Company has complied with the payment as per the Court's orders and discharged its obligations out of respect for the Court's authority. The Company maintains that it has substantial merits in its claims and is evaluating its available legal options to address the merits and to safeguard its interests, as provided under the contract governing the project.

The Company remains committed to protect its legal and commercial interests, while continuing to fulfil its contractual obligations and upholding the highest standards of professionalism in its dealings with all stakeholders.
