

PANDA ECO SYSTEM CONTINUES GROWTH TRAJECTORY WITH RECORD FY2025 RESULTS

KUALA LUMPUR, 23 February 2026 – PANDA ECO SYSTEM BERHAD <熊猫软件生态系统> (“**Panda Eco System**”), a home-grown retail management solutions provider, has today reported its fourth quarter financial results, achieving record-breaking revenue and profitability for the financial year ended 31 December 2025 (“**FY2025**”).

For the full year FY2025, Panda Eco System and its subsidiaries’ (the “**Group**”) revenue jumped by 40% to RM43.8 million, while profit attributable to owners of the Group (“**Net Profit**”) was RM9.2 million. The strong performance was driven by growth across all revenue segments, boosted by contributions from newly acquired subsidiaries and enhanced synergies across the enlarged Group. In particular, the Group’s recurring revenue for FY2025 increased substantially and now accounts for almost 50% of total revenue, providing greater visibility and a stronger earnings base.

For the quarter ended 31 December 2025 (“**4Q FY2025**”), the Group recorded revenue of RM13.3 million, rising 60% year-on-year, compared to RM8.3 million in the same quarter last year. Net Profit surged approximately 21% YoY to RM2.8 million, compared to RM2.3 million in the same quarter of last year.

Executive Director / Chief Executive Officer of Panda Eco System, **Mr. Loo Chee Wee** <罗智伟> commented: ““Momentum remains strong for us in the fourth quarter, and this is expected to continue moving forward. Following the completion of the acquisitions of Gross Synergy Sdn Bhd (“**GSSB**”) and Day One Technology Sdn Bhd (“**DOTSB**”) in June 2025, these new subsidiaries have performed and exceeded their aggregate profit guarantees for FY2025. Over the last few months we have commenced integrating our customer portfolios to drive higher wallet share through cross-selling initiatives. This will enable us to deploy our resources more efficiently across the enlarged Group and achieve greater operational efficiencies progressively.

MEDIA RELEASE

For immediate release

We have also been developing enhanced versions of our key solutions, which we intend to roll out in stages throughout 2026. These upgrades will introduce improved features to address our customers' operational challenges, including AI-driven capabilities that we are excited to bring to market.

In addition, we are actively expanding our customer base in Malaysia and are currently in discussions with several potential customers within the grocery and consumer retail segments. Having laid a strong foundation last year by expanding our team and strengthening our solutions portfolio, we are now well-positioned to translate these efforts into tangible growth," he added.

ABOUT PANDA ECO SYSTEM BERHAD

We are principally engaged in the development, customisation, implementation, and integration of Retail Management Ecosystem. In addition, we are involved in the trading of third-party software and IT hardware, as well as software customisation, implementation, and integration of process control and automation solutions.
