

PANDA ECO SYSTEM'S REVENUE JUMPS BY 49% IN 1Q FY2026

KUALA LUMPUR, 25 May 2026 – PANDA ECO SYSTEM BERHAD <熊猫软件生态系统> (“**Panda Eco System**”), a home-grown retail management solutions provider, has announced its first quarter financial results for the three (3) months ended 31 March 2026 (“**1Q FY2026**”) today.

In 1Q FY2026, Panda Eco System and its subsidiaries (the “**Group**”) recorded a 49% surge in revenue to RM11.89 million, compared to RM8.00 million in the same quarter of the previous year. This was mainly due to consolidation from the Gross Synergy Sdn. Bhd. (“**GSSB**”) and Day One Technology Sdn. Bhd. (“**DOTSB**”). Meanwhile, Profit After Tax attributable to Owners (“**PATAMI**”) stood at RM1.38 million, an achievement comparable to the corresponding period of last year. The Group has increased its headcount to support its expanding operations and capture growth opportunities, resulting in higher year-on-year costs. Contributions from these investments are expected to strengthen over time.

Executive Director / Chief Executive Officer of Panda Eco System, **Mr. Loo Chee Wee** <罗智伟> commented: “The Group’s financial performance for 1Q FY2026 was supported by revenue growth arising from continued demand across our solutions. Profit margin were affected by higher operating expenses, mainly due to investments in technical workforce and operational capabilities undertaken to support business expansion and pursue larger project opportunities. We expects these investments to progressively improve operational efficiency and support long-term business development initiatives.

“In addition, the Group’s prior strategic investments and acquisitions have strengthened its market presence and enhanced operational collaboration across its businesses. These initiatives have also resulted in cross-selling opportunities and enabled the Group to better leverage its resources and capabilities across its business segments, contributing to improved operational efficiency and supporting the Group’s long-term growth objectives. ”

MEDIA RELEASE

For immediate release

“As part of our ongoing efforts, we are also introducing artificial intelligence (“AI”) related capabilities into the Group’s retail management solutions offering. In April 2026, the Group incorporated a new subsidiary, Agentis Solutions Sdn. Bhd., to support the Group’s AI-related initiatives. We believe these initiatives may further strengthen the Group’s solutions ecosystem and support our customers in improving operational efficiency and decision-making processes,” he added.

ABOUT PANDA ECO SYSTEM BERHAD

We are principally engaged in the development, customisation, implementation, and integration of Retail Management Ecosystem. In addition, we are involved in the trading of third-party software and IT hardware, as well as software customisation, implementation, and integration of process control and automation solutions.
