Current/cumulative quarter

The financial year end of the Group has been changed from 31 December to 31 March for the financial period of 2024. The previous reporting financial period was for a period of 15 months, made up from 1 January 2024 to 31 March 2025. As such, there are no comparative figures for the current twelfth-month period ended 31 March 2026.

B2 Comparison with immediate preceding quarter's results

	Current Quarter	Preceding Quarter
	31 March 2026 RM'000	31 December 2025 RM'000
Revenue	23,664	27,665
Gross profit	9,894	7,594
Profit before tax ("**PBT**")	3,439	1,355
Profit after tax ("**PAT**")	949	2,541

The Group recorded revenue of RM23.664 million for the current quarter under review, representing a marginal decrease from RM27.665 million in the immediate preceding quarter ended 31 December 2025. The decrease was mainly due to lower contributions from the Cybersecurity Solutions and trading of ancillary hardware and software but higher contributions from IT Infrastructure Solutions and Managed IT Services and Other IT Services.

The Group reported a gross profit of RM9.894 million for the current quarter, with a gross profit margin of 41.81%, compared to RM7.594 million and 27.45% respectively in the preceding quarter. The improvement in gross profit margin was mainly attributable to higher margins recorded across all business segments.

With the higher gross profit margin, the Group recorded a PBT of RM3.439 million, compared to RM1.355 million in the immediate preceding quarter. The improved PBT was also partly driven by lower other operating expenses and finance costs, as well as higher other income. After taking into consideration of income tax expenses, the Group recorded a PAT of RM0.949 million for the current quarter, compared to RM2.541 million in the preceding quarter.

B3 Prospects

The global IT services market, estimated at approximately USD1.5 trillion, continues to evolve rapidly, driven by accelerating adoption of artificial intelligence ("AI"), intelligent automation, cloud computing and advanced data analytics. These technologies are expected to underpin sustained industry expansion over the coming years, while the global cybersecurity market is forecast to record strong double-digit growth as organisations intensify investments in digital resilience, regulatory compliance and cyber threat mitigation. In line with these market developments, the Group is strengthening its strategic focus on higher-value IT infrastructure, managed services and cybersecurity solutions, while progressively integrating AI-enabled capabilities and automation into its service offerings to improve operational efficiency, scalability and customer experience.

In tandem with the industry's shift toward sustainable digital transformation, demand for energy-efficient infrastructure, green data centres, secure cloud environments and ESG-aligned technology solutions continues to rise. The Group remains committed to embedding sustainable business practices across its operations and service delivery, while enhancing governance oversight and strengthening long-term stakeholder value creation through responsible and resilient business strategies. As part of its long-term growth and operational expansion plans, the Group had proposed the acquisition of a three-storey semi-detached factory building to serve as the Group's new headquarters and operational hub, supporting future business expansion and enhancing service delivery capabilities.

Regionally, the Group is well-positioned to capitalise on growing digitalisation trends across Malaysia, Singapore, China, India and other Asia Pacific markets, supported by government-led digital initiatives and increasing enterprise demand for secure and scalable IT infrastructure. Leveraging its established regional presence, expanding technology partnerships and dedicated Network Operations Centre ("NOC") and Security Operations Centre ("SOC") capabilities, the Group continues to enhance its cross-border service delivery and managed cybersecurity offerings. Despite ongoing macroeconomic uncertainties and geopolitical challenges, the Group's diversified customer base, expanding regional footprint and strategic emphasis on cybersecurity, managed services and next-generation digital solutions provide a solid foundation to strengthen resilience, improve operational performance and support sustainable long-term growth.
