PE Band Chart

1. 1Q10 Result Highlights:

1Q core net profit jumps to RM1.9m. Furniweb's 1QFY12/10 core net profit of RM1.6m (-15.4% qoq) accounted for 22.9% and 23.8% of our and consensus full-year estimates respectively. We consider this to be above our expectations given that 1Q is typically the weakest quarter. The key variance was due to higher-than-expected core EBIT margin achieved of 9.1% in 1Q10 vs. our full-year forecast of 7.2%, offset partially by a higher-than-expected effective tax rate of 31.9% (vs. our full-year assumption of 17.5%) during the quarter. As expected, no dividend was declared for the quarter.

Revenue fell 3.3% qoq. 1Q revenue dropped marginally (-3.3% qoq) due to lower contribution from its rubber strips and fabrics division (-23.8% qoq), partly offset by a higher contribution by its webbing, yarn and furniture components division (+6.2% qoq) as well as seasonal factors due to a shorter working period in Feb. Coupled with higher finance cost (+71.8% qoq) and higher effective tax rate of 39.1% (vs. 4Q09 effective tax rate of 4.3%), 1Q10 core net profit remained flat qoq. 1Q reported profit (-84.2% qoq) was affected by forex losses of RM1.3m resulting from the strengthening of the RM against US\$ (+5.0% qoq).

Outlook. We believe the worse could be over for Furniweb given its better 1Q performance from a year ago. Going forward, we expect Furniweb to register stronger sales, on the back of the recovering economy. However, in the near term, earnings could remain volatile due to fluctuating raw material prices, which could adversely impact margins. Separately, Furniweb's plan to list in Vietnam has hit a snag as the listing requirements have been made stricter by the Vietnamese authorities. This could potentially dampened Furniweb's plan to raise funds for future capacity expansion plans.

Risks. 1) weaker-than-expected margins, which could be due to increase raw material prices; and 2) weaker-than-expected demand.

Forecasts. We have raised our FY10-12 EBIT margin assumptions slightly to 8.2-9.2% (vs. 7.2-7.3% previously) and raised our effective tax rate assumption to 30% p.a. (vs. 17.5% p.a. previously). Consequently, our FY10 earnings have been raised by 8.5%, while our FY11-12 earnings have been trimmed by 4.1% and 4.3% respectively.

2. Recommendation

Following the earnings revision above, our indicative fair value has been raised to RM0.71 (from RM0.66) based on unchanged target FY12/10 PER of 8.5x. Our **Buy** call on the stock remains unchanged.
