MANAGEMENT DISCUSSION & ANALYSIS

ON BEHALF OF THE BOARD OF DIRECTORS OF RALCO CORPORATION BERHAD (“RALCO”/“THE GROUP”), IT IS OUR PLEASURE TO PRESENT TO YOU THE MANAGEMENT DISCUSSION AND ANALYSIS (“MDA”) OF THE GROUP. THE OBJECTIVE OF THIS MDA IS TO PROVIDE SHAREHOLDERS WITH A BETTER UNDERSTANDING AND AN OVERVIEW OF THE GROUP’S BUSINESS, OPERATIONS, FINANCIAL POSITION IN YEAR 2025 AND OUTLOOK FOR THE YEAR 2026.

1. OVERVIEW

Ralco started 37 years ago as a small plastic manufacturer renting a small factory in Kajang, Selangor with one (1) unit of blow molding machine and three (3) sets of molds to manufacture medium and big size containers catering mainly for both the local and Singapore markets. From its humble beginnings, it has over the years grown to be one of the key plastic blow molding and injection molding manufacturer of industrial pails, jerrycans and parts in Malaysia.

Products

Our product lines comprise mainly Jerrycans (blow molding) and Pails (injection molding) in various sizes. Jerrycans are widely used for the packing of liquid form of chemicals, medical products as well as for edible oils, while pails are utilized predominantly for the packing of paints for both household and industrial use.

We have also continued to improve customized services such as designing, printing and labelling including heat transfer, based on specific requirements from our customers.

Markets

The Group’s turnover is mainly contributed from domestic market and approximately 26% to 35% from other regional markets.

Manufacturing Bases

Our office and the main plant are located in the Nilai Industrial Estate, in the state of Negeri Sembilan. Our factory at Nilai was built on a land measuring 4.51 acres with a total build-up area of approximately 141,000 sq. ft. with a total workforce of approximately 128 people and more than 47 machines.

2. BUSINESS REVIEW

During the financial year under review, the Group’s revenue recorded a marginal decline compared to the preceding year. This variance was primarily attributable to lower sales volumes arising from weaker demand for both injection and blow molding products.

In response, the Company strategically transitioned from a volume-driven model to a margin-focused approach. Concurrently, the sales team successfully implemented pricing adjustments, including the renegotiation of selling prices across the core product range, to achieve improved margins and enhance market positioning.

On the cost front, management introduced a rigorous cost optimisation programme. Key initiatives included a strategic workforce restructuring and a hiring freeze on non-critical roles. In procurement, the team successfully renegotiated pricing with existing suppliers and qualified new alternative suppliers to secure more competitive raw material costs. These measures operate under a newly established value-proposition budgeting framework, ensuring that departmental expenditure aligns with strategic returns.

Furthermore, the management maintained close monitoring of production processes and material usage, resulting in reduced material consumption during the year. Through a structured schedule of training programmes, the overall technical capability of the workforce was significantly enhanced.

To address underutilised capacity, the sales team intensified commercial efforts to better align customer demand with available production output. These efforts focused on customer acquisition, reactivation, and deeper penetration within existing accounts.

3. FINANCIAL REVIEW

Revenue

The Group's revenue decreased by RM19.1 million or 37.6% to RM31.7 million for the current financial year 2025 as compared to RM50.8 million recorded in the previous year. The decrease in revenue was mainly due to the reduced sales volume, stemming from an increasingly competitive market environment and the strategic shift from a volumed-focused to a margin-focused business model.

Cost of Sales

Total cost of sales of the Group for the current financial year was RM31.1 million against RM48.8 million incurred in the previous financial year. This was mainly due to lower revenue generated during the year resulting in decreased procurement of raw materials and the reduction in material consumption during the production, thereby lowering the cost of goods sold.

Other Income

Other income decreased to RM1.4 million for the financial year ended 31 December 2025 as compared to RM4.8 million recorded in the previous financial year. The discount on non-current financial liabilities has decreased from RM4.2 million to RM0.2 million during the year, while the current financial year also includes a one-off fair value gain of RM0.5 million on investment properties.

Other Operating Expenses

The Group registered an increase in other operating expenses of RM0.6million in current financial year mainly attributed to the loss on disposal of Property, Plant and Equipment and provision provided on obsolete inventories.

Finance Costs

The financial cost of the Group increased to RM2.3 million in the current financial year from RM1.4 million in the previous financial year. This is mainly attributable to the unwinding of discount on non-current financial liabilities.

Taxation

The Group registered a decrease in the income tax expense in the current financial year due to the overprovision of taxation for the previous financial year.

Profit after Tax

The Group posted a loss after taxation of RM7.2 million for the current financial year ended 31 December 2025 as compared to a loss of RM2.5 million registered in the previous financial year. This is mainly due to the drop in other income during the current financial year, which was a one-off item.

Liquidity and Capital Resources

The Group cash position stood at RM1.3 million as at 31 December 2025 as compared to RM1.2 million as at 31 December 2024.

The net cash generated from operating activities was RM1.7 million as compared to the net cash used in operating activities RM1.5 million generated in the previous financial year.

4. DIVIDEND

No dividend has been proposed by the Board for the financial year ended 31 December 2025.

5. FUTURE OUTLOOK

The manufacturing and sale of industrial pails and jerrycans will still be the Group's core business in year 2026.

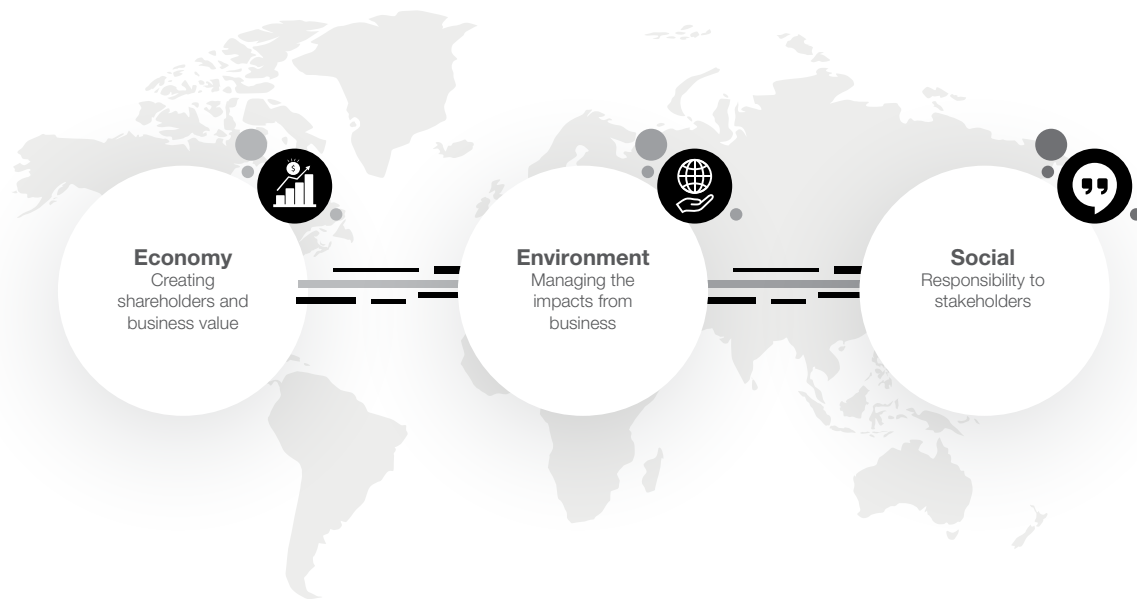

The shortage of resin supply will continue to add burden to the costs of raw material and overall production. In addition, the ongoing wars between Russia and Ukraine and Middle East will continue to cause a lot of uncertainty into the global demand of plastic products. In order to mitigate these factors, the management has deployed significant resources and prioritised the improvement in quality, productivity and cost effectiveness in our short and mid-term plans. We will also continue to develop revenue growth strategy and strengthen the relationship with the key customers to achieve organic growth in the long run.

In conclusion, the Board of Directors maintain a cautious outlook for the Group's performance in the coming financial year 2026.

CORPORATE RESPONSIBILITY & SUSTAINABILITY STATEMENT

COMMITMENT TO SUSTAINABILITY

Ralco Corporation Bhd and its subsidiaries (“Group”) are cognisant of the importance of sustainability in doing the business. We are committed to develop and secure a sustainable future while maintaining an equitable balance between the expectations of a wide range of stakeholders and continuing to create value for our shareholders. To ensure our sustainability efforts are focused on issues that matter most to our stakeholders, we have categorised our commitment into three (3) core pillars:

Governance Structure

We do not have a Sustainability Committee at the Board level, however the Risk Management Committee (“RMC”) has been taking up the role and responsibilities of the Sustainability Committee. The Group MD plays the role of Chief Sustainability Officer (“CSO”), reporting directly to the RMC on any sustainability matters. The RMC oversees the strategies, policies, initiatives, targets and performance of the Group to ensure that the Group’s business is conducted in a sustainable manner. The CSO is assisted by Risk Management Committee (“RMC”) which oversees the implementation of the organisation’s sustainability approach. Each business unit has its own Risk Management and Sustainability Working Group (“RMSWG”) which allows RMC to leverage existing initiatives to identify material sustainability matters in respect of our three (3) core pillars concerning their respective business units, providing and collecting information, overseeing and ensuring integration of sustainability management into their respective business processes.

Scope and Basis

This Sustainability Statement has been developed based on the Sustainability Reporting Guide. The guidelines look beyond financial performance and corporate governance practices which are outlined in this annual report, to examine our non-financial performance relating to our internal and external communities as well as the environment.

Materiality Assessment

A Materiality Assessment is a stakeholder engagement exercise designed to gauge Ralco's most noteworthy economic, environmental and social impacts that may be important to stakeholders. The process helps us to identify, prioritise, validate and review the most significant areas on the basis of their impact on the business and the importance of these areas from stakeholders' perspectives.

The materiality matrix table will show outcome of Ralco's materiality assessment. Sustainability key matters have been rated on a scale of low, medium and high for the significant Group's Economic, Environmental and Social ("EES") impacts and the influence of stakeholder's assessment and decisions.

The Board reviews and evaluates its own performance and the performance of its Committee on an annual basis. The Board evaluation comprises a Board Assessment, an Individual Director Assessment and an Assessment of Independence of Independent Directors. However, the Board is of the opinion that the disclosure of remuneration details may be detrimental to its business interests, given the competitive landscape for key personnel with the requisite knowledge, technical expertise and working experience in the Group's business activities, where intense headhunting is a common industry challenge. Accordingly, such disclosure of specific remuneration information may give rise to recruitment and talent retention issues.

In addition, the Board is of the view that the interest of the shareholders will not be prejudiced as a result of such non-disclosure of the top five Senior Management personnel who are not Directors.

As part of the Audit Committee's review processes, the Audit Committee has obtained assurance from the External Auditors confirming that they are, and have been, independent throughout the conduct of the audit engagement in accordance with the terms of all relevant professional and regulatory requirements.

Based on the Audit Committee's annual assessment of the External Auditors, the Board is satisfied with the independence, quality of service and adequacy of resources provided by the External Auditors in carrying out the annual audit for financial year 2025. The Board is satisfied with the performance of the Risk Management Committee in discharging their responsibilities.

The Board confirms that there is an ongoing process for identifying, evaluating and managing significant risks facing the Company and the Company has embedded the risk management into the operating and business processes. These processes are undertaken by the Executive Director and the Management team members in their course of work. Information other than the financial statements and auditors' report thereon

The Directors of the Company are responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements of the Group and of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements

The Directors of the Company are responsible for the preparation of financial statements of the Group and of the Company that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS cont'd

Responsibilities of the Directors for the financial statements cont'd

In preparing the financial statements of the Group and of the Company, the Directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group and the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group as a basis for forming an opinion on the financial statements of the Group. We are responsible for the direction, supervision and review of the audit work performed for purpose of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

Auditors' responsibilities for the audit of the financial statements cont'd

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current financial year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

(c) Significant accounting judgements, estimates and assumptions

The preparation of the Group's and of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

Judgements

There are no significant areas of critical judgements made by management in applying the accounting policies that have the most significant effect on the amounts recognised in the financial statements:

Key sources of estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period are set out below:

Useful lives of property, plant and equipment

The Group and the Company regularly review the estimated useful lives of property, plant and equipment based on factors such as business plan and strategies, expected level of usage and future technological developments. Future results of operations could be materially affected by changes in these estimates brought about by changes in the factors mentioned above. A reduction in the estimated useful lives of property, plant and equipment would increase the recorded depreciation and decrease the value of property, plant and equipment. The carrying amount at the reporting date for property, plant and equipment is disclosed in Note 3 to the financial statements.

Provision for expected credit loss of financial assets at amortised cost

The Group and the Company review the recoverability of their receivables at each reporting date to assess whether an impairment loss should be recognised. The impairment provisions for receivables are based on assumptions about risk of default and expected loss rates. The Group and the Company use judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's and the Company's past history and existing market conditions as well as forward looking estimates.

The Group and the Company use a provision matrix to calculate expected credit loss for receivables. The provision rates are based on number of days past due.

The provision matrix is initially based on the Group's and the Company's historical observed default rates. The Group and the Company will calibrate the matrix to adjust the historical credits loss experience. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed. The assessment of the correlation between historical observed default rates, forecast economic conditions and expected credit loss is a significant estimate.

The carrying amounts of receivables at the reporting date are disclosed in Notes 7, 8 and 9 to the financial statements respectively.

Revaluation of property, plant and equipment and fair value of investment properties

The Group carries its investment properties at fair value, with changes in fair value being recognised in profit or loss. The Group measures lands and buildings at revalued amounts with changes in fair value being recognised in other comprehensive income. Lands were valued by reference to market-based evidence, using comparable prices adjusted for specific market factors such as nature, location and condition of the properties. The fair value of buildings was determined using the cost approach that reflects the cost to a market participant to construct assets of comparable utility and age, adjusted for obsolescence.

The key assumptions used to determine the fair value of the properties are provided in Notes 3 and 4 to the financial statements.

2. BASIS OF PREPARATION cont'd

(c) Significant accounting judgements, estimates and assumptions cont'd

Key sources of estimation uncertainty cont'd

Inventories valuation

Inventories are measured at the lower of cost and net realisable value. The Group estimates the net realisable value of inventories based on an assessment of expected selling prices. Demand levels and pricing competition could change from time to time. If such factors result in an adverse effect on the Group's products, the Group might be required to reduce the value of its inventories. Details of inventories are disclosed in Note 6 to the financial statements.

Determination of transaction prices

The Group is required to determine the transaction price in respect of each of its contracts with customers. In making such judgement the Group assesses the impact of any variable consideration in the contract due to discounts or penalties in the contract.

There is no estimation required in determining the transaction price, as revenue from sale of goods are based on invoiced values. Discounts are not considered as they are only given in rare circumstances.

Deferred tax assets

Deferred tax assets are recognised for all unused tax losses, unabsorbed capital allowances and other deductible temporary differences to the extent that it is probable that taxable profit will be available against which the unused tax losses, unabsorbed capital allowances and other deductible temporary differences can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies. The carrying value of recognised and unrecognised deferred tax assets is disclosed in Notes 14 and 21 to the financial statements respectively.

Income taxes

Judgement is involved in determining the provision for income taxes. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business.

The Group and the Company recognise liabilities for expected tax issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

(a) Material accounting policy information

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses, except for leasehold lands and buildings are measured at fair value less accumulated depreciation and impairment losses recognised after the date of revaluation.

Valuations are performed with sufficient regularity, usually every five years, to ensure that the carrying amount does not differ materially from the fair value of the lands and buildings at the end of the reporting period.

Depreciation is recognised in the profit or loss on a straight-line basis to write off the cost or valuation of each asset to its residual value over its estimated useful life.

Property, plant and equipment are depreciated based on the estimated useful lives of the assets as follows:

Buildings	50 years
Leasehold lands	Over the lease period
Plant and machinery	5 - 10%
Furniture and fittings	10%
Office equipment	10 - 20%
Renovation	20%
Motor vehicles	20%
Warehouses and hostels	Over the lease period

During the financial year, there was a change in use for certain properties which led to a transfer to investment properties. The Group has accounted for such properties in the same way up to the date of change in use and treated any difference at that date between the carrying amount of the properties and its fair value as a revaluation surplus.

- (f) The fair value measurement of the leasehold lands and buildings was performed by an independent professional valuer with appropriate recognised professional qualifications. The fair value was determined based on depreciated replacement cost and market comparison approach.

The following table summaries the methods used in determining the fair value of the properties on a recurring basis.

Fair value hierarchy	Valuation techniques and key inputs	Significant unobservable inputs	Relationship of unobservable inputs to fair value
Level 3	<p><u>Lands</u> Sales comparison approach which reflects recent market transactions for similar properties.</p> <p><u>Buildings</u> Depreciated replacement cost and comparison approach reflecting the cost to a market participant to construct assets of comparable utility and age, adjusted for obsolescence.</p>	<p><u>Lands</u> Adjustment for factors such as plot size, location, encumbrances and current use.</p> <p><u>Buildings</u> Adjustment for factors such as physical deterioration, functional and economic obsolescence.</p>	<p><u>Lands</u> The extent and direction of this adjustment depends on the number of characteristics of the observable market transactions in similar properties that we used as starting point for valuation.</p> <p><u>Buildings</u> Depreciation is deducted to reflect the current condition of the buildings and structures.</p>

Transfers are made to (or from) investment properties only when there is a change in use. For owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment and right-of-use assets up to the date of change in use.

- (b) Fair value measurement

The fair value of the investment properties of the Group was estimated by the Directors based on the recent transacted prices in the market of properties with similar condition and location. In estimating the fair value of the properties, the highest and best use of the properties is their current use.

(b) Fair value measurement cont'd

The following table summaries the methods used in determining the fair value of the investment properties on a recurring basis.

Fair value hierarchy	Valuation techniques and key inputs	Significant unobservable inputs	Relationship of unobservable inputs to fair value
Level 3	Sales comparison approach which reflects recent market transactions for similar properties and comparable by utility and age, adjusted for obsolescence.	Adjustment for factors such as plot size, location, physical deterioration, functional and economic obsolescence.	The extent and direction of this adjustment depends on the number of characteristics of the observable market transactions in similar properties that we used as starting point for valuation. While depreciation is deducted to reflect the current condition of the building and structures.

Sales of goods

The Group manufactures and sells plastic bottles and related products in overseas and local markets. Revenue from sales of goods is recognised at a point in time when the control of the products has been transferred, being when the products are delivered to the customer.

Revenue is recognised based on the price specified in the contract, net of the rebates, discounts and taxes.

A receivable is recognised by the Group when the goods are delivered as this represents the point in time at which the right to consideration is unconditional, because only the passage of time is required before payment is due. No element of financing is deemed present as the revenue is recognised with a credit term of cash term to 90 days, which is consistent with market practices.

Renewable energy

Revenue from supplying of renewable energy is recognised over time as the customer simultaneously receives and consumes the benefits provided by the Group's performance when electricity is delivered based on contractual terms stipulated in the contract with customer. The electricity is delivered at a pre-determined rate. This revenue also includes an estimated value of the electricity delivered from the date of their last meter reading and period end. Accrued unbilled revenues are reversed in the following month when actual billings occur.

Rental income

Rental income is accounted for on a straight-line basis over the lease terms.

Management fees

Management fees are recognised on an accrual basis when services are rendered.

For management purposes, the Group is organised into business units based on their products and services, and has two reportable segments as follows:

- (i) Plastic products : Manufacturing and trading of plastic products
- (ii) Others : Investment holding and supply of renewable energy

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the consolidated financial statements.

Transactions between segments are carried out on agreed terms between both parties. The effects of such inter-segment transactions are eliminated on consolidation. The measurement basis and classification are consistent with those adopted in the previous financial year.

(b) Financial risk management objectives and policies

The Group's and the Company's financial risk management policy are to ensure that adequate financial resources are available for the development of the Group's and of the Company's operation whilst managing their credit, liquidity and market risks. The Group and the Company operate within clearly defined guidelines that are approved by the Board and the Group's and the Company's policy are not to engage in speculative transactions.

The following sections provide details regarding the Group's and the Company's exposure to the above-mentioned financial risks and the objectives, policies, and processes for the management of these risks.

(i) Credit risk

Credit risk is the risk of a financial loss to the Group and the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Group's and the Company's exposure to credit risk arises principally from trade and other receivables, amount due from subsidiaries and cash and bank balances. There are no significant changes as compared to the prior financial year.

The Group and the Company have adopted a policy of only dealing with creditworthy counterparties. Management has a credit policy in place to control credit risk by dealing with creditworthy counterparties and deposit with banks with good credit rating. The exposure to credit risk is monitored on an ongoing basis and action will be taken for long outstanding debts.

27. FINANCIAL INSTRUMENTS cont'd

(b) Financial risk management objectives and policies cont'd

(i) Credit risk cont'd

The Company provides unsecured loans and advances to certain subsidiaries. It also provides financial guarantees to banks for banking facilities granted to a subsidiary. The Company monitors on an ongoing basis the results of the subsidiaries and repayments made by the subsidiaries.

At each reporting date, the Group and the Company assess whether any of the receivables are credit impaired.

The gross carrying amounts of credit impaired receivables are written off (either partial or full) when there is no realistic prospect of recovery. This is generally the case when the Group or the Company determine that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. Nevertheless, receivables that are written off could still be subject to enforcement activities.

The carrying amounts of the financial assets recorded on the statements of financial position at the end of the financial year represent the Group's and the Company's maximum exposure to credit risk except for financial guarantees provided to banks for banking facilities.

There are no significant changes as compared to the previous financial year.

As at the end of the financial year, the Group and the Company have no significant concentration of credit risk from its receivables.

(ii) Liquidity risk

Liquidity risk refers to the risk that the Group and the Company will encounter difficulty in meeting their financial obligations as they fall due. The Group's and the Company's exposure to liquidity risk arises primarily from mismatches of the maturities of financial assets and liabilities.

The Group's and the Company's funding requirement and liquidity risk are managed with the objective of meeting business obligations on a timely basis. The Group and the Company finance their liquidity through internally generated cash flows and minimises liquidity risk by keeping committed credit lines available.

The following table analyses the remaining contractual maturity for financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group and the Company can be required to pay.

The Company provides financial guarantee to banks in respect of credit facilities granted to a subsidiary and monitors on an ongoing basis the performance of the subsidiary. At end of the financial year, there was no indication that the subsidiary would default on repayment.

Financial guarantee has not been recognised since the fair value on initial recognition was deemed not material and the probability of the subsidiary defaulting on their credit facilities is remote.

(iii) Market risk

Foreign currency risk

The Group is exposed to foreign currency risk on transactions that are denominated in currencies other than the functional currency of the Group. The currencies giving rise to this risk are primarily Singapore Dollar ("SGD") and United States Dollar ("USD").

The Group has not entered into any derivative instruments for hedging or trading purposes as the net exposure to foreign currency risk is not significant. However, the exposure to foreign currency risk is monitored from time to time by management.

Foreign currency sensitivity analysis

The following table demonstrates the sensitivity of the Group's loss before tax for the financial year to a reasonably possible change in the SGD and USD exchange rates against RM, with all other variables held constant.

Change in currency rate		Effect on loss before tax	
		2025 RM	2024 RM
SGD	Strengthened 1% (2024: 1%)	18,209	21,631
	Weakened 1% (2024: 1%)	(18,209)	(21,631)
USD	Strengthened 1% (2024: 1%)	(961)	(1,227)
	Weakened 1% (2024: 1%)	961	1,227

Interest rate risk

The Group's fixed rate hire purchase liabilities and amount due to related parties are exposed to a risk of change in their fair value due to changes in interest rates. The Group's variable rate borrowings are exposed to a risk of change in cash flows due to changes in interest rates.

The Group manages its interest rate risk exposure from interest-bearing borrowings by obtaining financing with the most favourable interest rates in the market. The Group constantly monitors its interest rate risk by reviewing its debts portfolio to ensure favourable rates are obtained. The Group does not utilise interest swap contracts or other derivative instruments for trading or speculative purposes.

The interest rate profile of the Group's significant interest-bearing financial instruments, based on carrying amounts as at the end of the reporting period is:

Interest rate risk sensitivity analysis

Fair value sensitivity analysis for fixed rate instruments

The Group does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore, a change in interest rates at the end of the reporting period would not affect profit or loss.

Cash flow sensitivity analysis for floating rate instruments

A change in 1% interest rate at the end of the reporting period would have increased/(decreased) the Group's loss before tax by RM9,630 (2024: RM16,194), arising mainly as a result of lower/higher interest expense on floating rate borrowings. This analysis assumes that all other variables remain constant. The assumed movement in basis points for interest rate sensitivity analysis is based on the currently observable market environment.

(c) Fair value of financial instruments

The carrying amounts of short-term receivables, payables, cash and cash equivalents and short-term borrowings approximate their fair value due to the relatively short-term nature of these financial instruments and insignificant impact of discounting.

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.
