## 2. DETAILS OF THE PROPOSED PRIVATE PLACEMENT

### 2.1 Placement size

As at the LPD, the issued share capital of Destini is RM382,806,871 comprising 1,155,230,299 Destini Shares.

In conjunction with the Proposed Private Placement, the Company has undertaken not to purchase any of its Shares pursuant to the share buy-back mandate that was approved by the Company's shareholders at the last Annual General Meeting from the date of the Announcement until the completion of the Proposed Private Placement. As at the LPD, Destini does not have any treasury shares.

Based on the total number of issued shares of Destini as at the LPD of 1,155,230,299 Destini Shares, the Proposed Private Placement will entail an issuance of up to 231,046,059 Placement Shares, representing approximately up to 20% of the total number of issued shares in Destini.

The actual number of Placement Shares to be issued pursuant to the Proposed Private Placement will depend on the total number of issued shares of Destini on a date to be determined later and after the approvals, as set out in Section 8 of this Circular, have been obtained.

The Proposed Private Placement will result in a dilution to the existing shareholders' shareholdings in Destini. For illustrative purposes, assuming that up to 231,046,059 Placement Shares are issued pursuant to the Proposed Private Placement, the existing shareholders' shareholdings will be as follows upon completion of the Proposed Private Placement:

	Assumed no. of Shares held	%
As at the LPD and prior to the Proposed Private Placement	115,523,030	<sup>(i)</sup> 10.00
After the Proposed Private Placement	115,523,030	<sup>(ii)</sup> 8.33

Notes:

- (i) Calculated based on the issued share capital of 1,155,230,299 Shares as at the LPD.
- (ii) Calculated based on the issued share capital of 1,386,276,358 Shares after the completion of the Proposed Private Placement.

## 2.2 Basis of determining the issue price of the Placement Shares

The issue price for each tranche of the Placement Shares shall be determined and announced by the Board at a later date after the receipt of all requisite approvals for the Proposed Private Placement ("**Price-Fixing Date(s)**").

The issue price of the Placement Shares will be determined after taking into consideration, the historical price movement of Destini Shares, the prevailing market conditions and the 5-day VWAP of Destini Shares immediately preceding the Price-Fixing Date. The Placement Shares will be issued at a price of not more than 10% discount to the 5-day VWAP of Destini Shares immediately preceding the Price-Fixing Date.

For illustrative purposes only, the Placement Shares are assumed to be issued at RM0.195 each, representing the 5-day VWAP of Destini Shares up to and including the LPD of RM0.195 per Destini Share.

## 2.3 Placement arrangement

The Placement Shares will be placed out to third party investor(s) to be identified at a later date, where such investor(s) shall be person(s) or party(ies) who/which qualify under Schedules 6 and 7 of the Capital Markets and Services Act 2007.

In accordance with Paragraph 6.04(c) of the Listing Requirements, the Placement Shares will not be placed out to the following parties:

- (i) a Director, major shareholder or chief executive of the listed issuer or a holding company of listed issuer ("**Interested Person**");
- (ii) a person connected with the Interested Person; or
- (iii) nominee corporation, unless the names of the ultimate beneficiaries are disclosed.

The Proposed Private Placement may be implemented in tranches within 6 months from the date of approval from Bursa Securities for the Proposed Private Placement or any extended period as may be approved by Bursa Securities. As such, the implementation of the Proposed Private Placement could potentially be in multiple tranches with several Price-Fixing Dates. This will provide the Company with flexibility to procure interested investors, taking into consideration market conditions and to optimise the proceeds to be raised.

The details of investor(s) and the number of Placement Shares to be placed to each investor will be submitted to Bursa Securities before the listing of the Placement Shares pursuant to Paragraph 6.15 of the Listing Requirements.

## 2.4 Ranking of the Placement Shares

The Placement Shares shall, upon allotment and issuance, rank *pari passu* in all respects with the existing Destini Shares, save and except that the Placement Shares will not be entitled to any dividends, rights, allotments and/or any other forms of distribution that may be declared, made or paid by the Company for which the entitlement date precedes the date of allotment and issuance of the Placement Shares.

## 2.5 Listing of and quotation for the Placement Shares

Bursa Securities had vide its letter dated 10 October 2019, approved the listing of and quotation for up to 231,046,059 Placement Shares to be issued pursuant to the Proposed Private Placement on the Main Market of Bursa Securities, subject to the conditions as set out in Section 8 of this Circular.

### 3. UTILISATION OF PROCEEDS

Based on the indicative issue price of RM0.195 per Placement Share, the Proposed Private Placement is expected to raise gross proceeds of up to approximately RM45.05 million. The proceeds to be raised from the Proposed Private Placement are expected to be utilised by Destini Group in the following manner:

Utilisation purposes	RM	%	Expected timeframe for the utilisation*
Repayment of bank borrowings <sup>(i)</sup>	21,000,000	46.61	Within 2 months
Working capital <sup>(ii)</sup> :			
- Existing project <sup>(a)</sup>	22,000,000	48.83	Within 6 months
- New projects <sup>(b)</sup>	1,000,000	2.22	Within 24 months
- General requirements <sup>(c)</sup>	773,982	1.72	Within 24 months
Estimated expenses in relation to the Proposed Private Placement <sup>(iii)</sup>	280,000	0.62	Within 1 month
<b>Total estimated proceeds</b>	<b>45,053,982</b>	<b>100.00</b>	

Notes:

\* From the date of completion of the Proposed Private Placement.

(i) As at the LPD, the Group's total bank borrowings amounted to RM134.88 million. The bank borrowings were mainly used for project financing and working capital. The proposed repayment of RM21.00 million represents approximately 15.57% of the Group's total bank borrowings as at the LPD and is expected to result in interest savings of approximately RM1.55 million per annum based on a weighted average interest rate of 7.38% per annum.

The proposed repayment which includes repayment of up to RM10.86 million of the outstanding bank borrowings to Affin Hwang IB, represents approximately 24.10% of the total gross proceeds to be raised. The bank borrowings extended by Affin Hwang IB will mature on 25 May 2020. The remaining proposed repayment of bank borrowings amounting to RM10.14 million will not be used to repay the outstanding credit facilities granted by Affin Group (including Affin Hwang IB).

The total proceeds raised if allocated and utilised towards the repayment of bank borrowings above will result in the Group having a lower gearing level of 0.21 times. This would in turn allow the Group to have greater flexibility in sourcing for funding alternatives in the future, if required.

(ii)(a) The proceeds will be allocated to part finance the Group's existing project as follows:

Project	Date of award	Contract value	Purpose
Supply, delivery, testing and commissioning of three units of 80-meter offshore patrol vessels to the Malaysian Maritime Enforcement Agency	January 2017	RM733.00 million, of which approximately RM275.00 million remains to be billed	RM22.00 million will be utilised entirely for the ongoing cost of production of the offshore patrol vessels

(ii)(b) As at the LPD, the Company has not identified any new projects to be undertaken. The new project(s) are expected to be largely complementary or similar to the existing business of the Group. The Company will make the requisite announcement pursuant to the Listing Requirements, if required, as and when the new business project(s) are identified and details of the same are finalised. In the event the approval of shareholders is required pursuant to the Listing Requirements, such approval will be sought accordingly.

- (ii)(c) *The proceeds for general requirements are additional funds available to the Group and will be utilised to finance the day-to-day operations of the Group as and when the need arises. This includes, among others, payment to trade creditors, staff-related costs such as salaries, bonuses, statutory contributions and welfare expenses and general administrative and operating expenses such as rental, utilities, telephone and sundry expenses.*

*The actual allocation and breakdown of the proceeds to be utilised for new projects and/or each component of general requirements as disclosed above cannot be determined at this juncture and will be dependent on the type of projects to be undertaken, funding requirements and cash flow position of the Group at the time of utilisation.*

- (iii) *The estimated expenses for the Proposed Private Placement consist of professional fees, fees payable to authorities, printing cost, expenses relating to convening of EGM, advertisement as well as other miscellaneous expenses to be incurred. Any variation to the estimated expenses for the Proposed Private Placement will be adjusted to or from the working capital requirements.*

The actual gross proceeds to be raised from the Proposed Private Placement will depend on the issue price and the actual number of Placement Shares to be issued.

The proceeds will be utilised as follows in the event of any shortfall in the actual proceeds to be raised from the Proposed Private Placement:

- (i) firstly, for the estimated expenses; and
- (ii) subsequently, the balance will be proportionately utilised for the other purposes as set out in the table above.

Conversely, any surplus in the actual proceeds to be raised from the Proposed Private Placement will be used for the working capital requirements as illustrated in Note (ii)(c) above.

Pending utilisation of the proceeds from the Proposed Private Placement for the abovementioned purposes, the proceeds will be placed in deposits with financial institutions or short-term money market instruments, as the Board may deem fit. Any interest income earned from such deposits or instruments will be utilised as additional working capital for the Group.

#### **4. RATIONALE OF THE PROPOSED PRIVATE PLACEMENT**

The Group's cash and cash equivalents (net of cash/ fixed deposits pledged with licensed banks) for the past 3 FYE 31 December 2016 to 31 December 2018 and 6-month FPE 30 June 2019 are RM52.36 million, RM10.90 million, RM29.58 million and RM6.46 million, respectively. The Group has been using its internally generated funds and bank borrowings to fund the capital expenditure and other related costs of its existing projects. The proceeds raised from the Proposed Private Placement will provide additional funds for the Group to continue to fund those projects, which are generally capital intensive in nature.

In addition to the above, the Board believes that the private placement of up to 20% of the total number of issued Shares in Destini, which will raise up to approximately RM45.05 million will improve the Group's overall cash position and provide the requisite funds for the Company to use for the purposes as set out in Section 3 of this Circular.

After due consideration of the various methods of fund raising, the Board is of the opinion that the Proposed Private Placement is the most appropriate avenue of fund raising as the Proposed Private Placement:

- (i) enables the Group to raise additional funds without having to incur interest expense or service principal repayment as compared to conventional bank borrowings. This would allow the Company to preserve cash flow for reinvestment and/or operational purposes for further growth;

- (ii) is an expeditious way of raising funds from the capital market as opposed to other forms of fund raising such as rights issue, which is comparatively more time consuming and costly; and
- (iii) enables the Company to strengthen its equity base which in turn may potentially increase the liquidity and marketability of Destini Shares.

## 5. INDUSTRY OUTLOOK AND PROSPECTS

### 5.1 Outlook on the Malaysian economy

The Malaysian economy grew at a stronger pace of 4.9% in the second quarter of 2019. Gross domestic product registered a higher growth of 4.9% in the second quarter of 2019 (1Q 2019: 4.5%), supported by continued expansion in domestic demand. On a quarter-on-quarter seasonally-adjusted basis, the economy grew by 1.0% (1Q 2019: 1.1%).

Domestic demand expanded by 4.6% in the second quarter (1Q 2019: 4.4%), supported by firm household spending and slightly higher private investment.

Private consumption expanded by 7.8% (1Q 2019: 7.6%), supported by continued income growth and festive spending during the quarter. Selected Government measures, such as the special Aidilfitri assistance and Bantuan Sara Hidup, also provided some lift to overall household spending.

After a strong growth in the first quarter of 2019 (6.3%), public consumption expanded marginally by 0.3%, due to lower spending on supplies and services.

Growth in gross fixed capital formation (GFCF) registered a smaller contraction of 0.6% (1Q 2019: -3.5%), driven by a slightly higher private investment growth amid a continued decline in public investment. By type of assets, investments in structures turned around to register a positive growth of 1.2% (1Q 2019: -1.3%), reflecting some improvement in the residential property segment. Capital expenditure on machinery and equipment recorded a smaller decline of 4.2% (1Q 2019: -7.4%), following higher spending on information and communications technology (ICT).

Private investment expanded at a faster pace of 1.8% (1Q 2019: 0.4%), supported by increased capital spending in the services and manufacturing sectors. Nonetheless, uncertainty surrounding global trade tensions and prevailing weaknesses in the broad property segment continued to weigh on the investment growth performance.

Public investment registered a smaller contraction of 9.0% (1Q 2019: -13.2%), mainly reflecting higher fixed asset spending by the Federal Government which partially offset the continued weak investment by public corporations.

Growth of the Malaysian economy continued to improve, mainly supported by the recovery from commodity-related shocks experienced last year. While the recovery from supply shocks is expected to continue into the second half of the year, the slower global growth amid ongoing trade tensions would continue to weigh on growth. In this environment, economic growth is projected to remain supported mainly by private sector activity. Household spending will continue to be driven by stable labour market conditions, while investment activity will be supported by capacity expansion in key sectors such as manufacturing and services.

The baseline projection, therefore, remains within the range of 4.3% - 4.8%. Nonetheless, the outlook is subject to downside risks from lingering uncertainties in the global and domestic environment, worsening trade tensions and extended weakness in commodity-related sectors. Positive conclusion to ongoing trade negotiations would pose as an upside risk.

The Shipbuilding and Ship Repair (“**SBSR**”) Industry has been identified as one of the strategic industries in terms of employment generation, industry capacity and technological capability. Capabilities of the local shipbuilding and ship repair industry in Malaysia involves designing; building and constructing; repairing and maintaining; converting and upgrading of vessels as well as manufacturing of marine equipment. In terms of shipbuilding, Malaysia has the capability of building vessels up to 30,000 deadweight tonnage. Most of the registered shipyards across the country specialise in building small to medium sized vessels (less than 120 meters in length). These include offshore support vessels, ferries, tugs, barges, fishing vessels and patrol crafts. Malaysia is currently ranked 24th in the list of largest shipbuilding countries.

Currently, there are 31 shipyards in Peninsular and 68 in East Malaysia, whereby these shipyards are well clustered on both sides of the nation. Under the Malaysian SBSR Industry Strategic Plan 2020, the industry aims to generate RM6.35 billion of gross national income and provide 55,000 employment opportunities by 2020. In 2018, the industry exported RM1.29 billion worth of marine products and accessories of ships, boats and floating structures which include light vessel, dredger, floating dock and cargo ship. That is an increase from RM1.07 billion compared to 2017. Two expansion projects were approved in the SBSR industry, with total investments amounting to RM33 million in 2018. These projects undertaken by wholly Malaysian-owned companies are expected to create 51 new jobs.

The mining sector decreased 1% (year-on-year) during the first half of 2018 on account of lower output of liquefied natural gas (“LNG”) following unplanned supply outages. For 2018, the sector is expected to decline 0.6% following lower production of natural gas due to supply disruptions in Kebabangan and Kinabalu fields in Sabah. Nevertheless, the crude oil and condensates subsector is projected to grow in line with stable global demand. Though the United States of America sanction has reduced Iran’s exports, the recovery in Libya’s production and anticipation of higher supply from Saudi Arabia are expected to stabilise crude oil prices in 2018.

Value added of the mining sector is expected to rebound 0.7% in 2019 driven by recovery in the production of natural gas following resumption of operation in Kebabangan and Kinabalu fields as well as expectation of new production from Bakong and Larak fields in the second half of 2019. In addition, stronger demand from domestic petrochemical industry and new contracts secured including from Japan for electricity generation is expected to support the growth of this sector. Furthermore, innovative and flexible operational solutions such as LNG break bulk services via ship-to-ship by PETRONAS have increased demand from Asian region. Meanwhile, crude oil and condensates subsector is forecast to decline due to production constraints in Sabah Gumusut Kakap and Malikai fields.

### **5.3 Prospects of Destini**

Destini Group operates in 4 major industries, namely aviation, marine, oil & gas and land systems, and each of these industries are affected by various changes in the operational, political and economic landscapes and challenges. In view of this, Destini has been increasing its strategic focus on developing and growing its commercial business segment to ensure a balanced portfolio for the Group while continuing to strengthen and improve its presence and capabilities in the Government segment in the past years. Such strategy has resulted in approximately 46.00% of the Group's order book of RM1.22 billion as at the LPD to be made up of commercial businesses.

Within the marine manufacturing segment, the Government has expressed its commitment to enhance the nation's maritime border security and this would entail the procurement of additional maritime assets to patrol and secure Malaysia's borders as shown in the tenders requested by the Ministry of Defence Malaysia as set out in Section 5.2 of this Circular. Destini Group is well poised and possesses the necessary track record and expertise to fulfil these requirements. In addition, Destini Group also has positioned itself to bid for the fabrication of both paramilitary and commercial vessels within the region.

The Group is also expanding its manufacturing capabilities to tender boats for the passenger cruise industry apart from its current lifeboat contracts for the oil & gas and marine industries. In addition, the Group anticipates that it could also potentially benefit from providing lifeboat maintenance, repair and overhaul ("**MRO**") services due to the regulatory requirements in the passenger cruise industry where ship owners are required to improve their maintenance standards on lifeboats.

Furthermore, the Group's existing contracts for the provision of MRO services to the Royal Malaysian Air Force, Royal Malaysian Navy and Royal Malaysia Police are expected to provide a stable stream of recurring income to the Group.

Despite the volatile oil & gas prices and headwinds within the industry, Destini Group will continue to focus on its core expertise, namely tubular handling services and oil field decommissioning. Notwithstanding this, the Group is also constantly exploring strategic partnerships with industry experts to further enhance its capabilities.

Additionally, in an effort to strengthen its foothold in the land systems industry, namely rail business, Destini, via its wholly-owned subsidiary, Destini Rail Sdn Bhd, had on 2 May 2019 entered into a joint venture and shareholders agreement with various parties to formalise their collaboration in undertaking rail-related projects covering engineering solutions and services, civil works, rolling stock, system and track works and maintenance services in Malaysia and the region.

Moving forward, Destini will continue to pursue sustainable growth strategies (including diversifying its range of services and products within its core expertise) for its 4 main businesses and enhance shareholders value.
