**OTHER NOTES PURSUANT TO BURSA MALAYSIA'S MAIN MARKET LISTING REQUIREMENTS: CHAPTER 9, APPENDIX 9B, PART A**

**B1. Review of performance**

The Integrated Manufacturing Services (“IMS”) segment comprises the following divisions:

- i) precision machining, stamping and tooling (“PMST”); and
- ii) automotive components design and manufacturing (“Automotive”).

The Resources segment is principally involved in the harvesting and selling of fresh fruit bunches of oil palm (“FFB”) whereas the Energy segment is principally involved in the exploration and production of oil and gas but has not commenced commercial production yet.

The Group’s revenue for the current quarter decreased from RM49.1 million in the preceding year corresponding quarter to RM43.6 million. The decrease is due to a decline in the revenue from the IMS segment from RM47.5 million to RM41.7 million, where all the IMS divisions registered a decline in their revenue. The decline in revenue is attributable to weak demand due to the COVID-19 pandemic and the restriction in movements imposed worldwide and in Malaysia. The Resources segment however recorded an increase of RM0.4 million in their revenue due to an uptrend in FFB prices, offset partially by a decline in FFB production.

The Group’s net profit increased from RM1.7 million in the preceding year corresponding quarter to RM6.0 million for the current quarter. This was mainly due to the Group’s effective share of a fair value gain on other investments amounting to RM4.1 million during the current quarter.

Excluding the above item, despite the decrease in revenue, the Group’s net profit increased from RM1.7 million in the preceding year corresponding quarter to RM1.9 million for the current quarter. This increase was underpinned by a turnaround from a net loss of RM69,000 to a net profit of RM116,000 registered by the Resources segment due mainly to its higher revenue, and a decrease in administrative expenses of the Energy segment. In tandem with the decline in revenue, the net profit from the IMS segment decreased by RM0.3 million from RM2.7 million in the preceding year corresponding quarter to RM2.4 million for the current quarter. Within the IMS segment, the PMST division suffered a decline in net profit by RM0.2 million to record a net profit of RM1.9 million for the current quarter, on the back of lower revenue. The Automotive division, despite the decline in revenue of about RM2.0 million, managed to maintain its net profit at around RM0.5 million due mainly to better cost management and rationalisation of its operations.

The Group’s cash and cash equivalents/deposits continued to grow to RM64.9 million (30 June 2020: RM56.0 million). The Group recorded a net cash inflow of RM11.7 million for the current period on the back of positive operating cash inflows and aided by the proceeds from the disposal of gold royalty amounting to RM5.6 million. In line with the decline in revenue of RM22.1 million, the Group lower operating cash inflows of RM7.8 million for the current period vis-à-vis a net operating cash inflow of RM18.9 million for the preceding year corresponding period. The Group’s net assets per share has increased from RM0.887 to RM0.933 whilst the gearing dropped to 0.07 times from 0.09 times as at 30 June 2020. Current ratio of the Group improved from 1.45 times to 1.86 times.

**B2. Material changes from the preceding quarter**

Comparing quarter on quarter, the Group’s revenue increased from RM36.3 million to RM43.6 million due to both the IMS and Resources segments registering higher revenues. The IMS segment’s revenue increased from RM34.8 million to RM41.7 million as a result of improving demand and the gradual easing of movement restrictions in Malaysia and globally during the current quarter. All the IMS divisions recorded higher revenues. The revenue from the Resources segment increased by RM0.3 million to RM1.9 million from RM1.6 million quarter on quarter on the back of higher FFB prices offset partially by a decrease in FFB production.

In the previous quarter, the Energy segment registered effective shares of gain on disposal of gold royalty of RM11.2 million and fair value loss on other investment of RM0.4 million and the Resources segment accounted for an additional deferred tax expense of RM1.3 million.

Excluding the abovementioned items and the Group's effective share of a fair value gain on other investments amounting to RM4.1 million during the current quarter, the Group recorded an increase in its net profit from RM1.2 million to RM1.9 million quarter on quarter. In tandem with the increase in revenue, all the IMS divisions and the Resources segment recorded an increase in their results.

### **B3. Prospects**

The ongoing and unabating Covid-19 pandemic has caused great damaging effects to the global/Malaysian economy. Due to the resurgent Covid-19 pandemic, several countries around the world including Malaysia have reimposed lockdowns and movement control orders again. As such, the Group's businesses too face challenges to operate at its usual capacity but whilst still having to pay for various fixed costs and overhead. As such, the businesses of Globaltec Group have been affected due to the ongoing pandemic and the movement control order. In this regard, the Group will continue its cost optimisation activities and austerity measures across all the subsidiaries to preserve its cash flow and are doing everything possible to overcome this crisis.

On a positive note, the PMST division will continue to gradually increase its capacity and revenue over time with the commissioning of its new 56,000 square feet facility in Bukit Minyak, Penang in the previous financial year. Moreover, stimulus packages implemented by the Malaysian government have augured well for the Group, particularly for the Automotive division, as sales of motor vehicles has been on the rise since July 2020. In addition, all the business activities of the IMS segment have been showing gradual signs of recovery and positive return to normal.

The Energy segment, under NuEnergy Gas Limited ("NuEnergy"), has submitted the first coal bed methane ("CBM") Plan of Development ("POD I") for the Tanjung Enim production sharing contract ("PSC") in Indonesia. The proposed POD I plans for the development of 209 wells in the identified areas of the Tanjung Enim PSC covering about 33km<sup>2</sup> (or 13% of the total Tanjung Enim PSC acreage). The Indonesia Research and Development Center for Oil and Gas Technology ("Lemigas") has confirmed and certified reserves totaling ~164.89 billion standard cubic feet (bscf) of gas. The proposed POD I is currently pending the approval from the Government of Indonesia. The current global Covid-19 pandemic has however slowed the approval process of the proposed POD I as well as other exploration activities of the Energy segment.

In addition, the Energy segment, in respect of its Muara Enim PSC, has received an acknowledgement letter from the Indonesia's Special Task Force for Upstream Oil and Gas Business Activities ("SKK Migas") that:

- i) confirms the discoveries of natural gas;
- ii) acknowledges the completion of exploration firm commitments by the Energy segment; and
- iii) allows the Energy segment to submit a plan of development within the next 3 years from 18 January 2021.

In the last quarter, as announced by the Company on 28 September 2020, the disposal of the gold royalty by the Energy segment was completed and the proceeds from the completion, comprising cash of A\$2 million and 467,730 shares in Metalla (listed on the TSX Venture Exchange in Canada) worth about A\$5 million, has brought in fresh new funds that will reinvigorate the Energy segment and enable the Energy segment to advance the development of its unconventional gas assets in the highly prospective area in South Sumatra, Indonesia. Furthermore, the Metalla shares will provide exposure to any increase in the gold price in the near to long term and will provide further liquidity/funds to NuEnergy when sold for cash.

#### B4. Financial Forecast and Profit Guarantee

Not applicable.

#### B5. Corporate proposals

There were no material corporate proposals announced but not completed within 7 days from the date of issue of this report.

#### B6. Taxation

The tax expense for the current quarter and financial period are as follows:

	Current quarter 31.12.2020 RM'000	Financial period 31.12.2020 RM'000

Total tax expense	<u>787</u>	<u>2,687</u>

The effective tax rate of the Group for the current quarter is lower than the statutory tax rate due mainly to the non-taxable the fair value gain on other investments.

The effective tax rate of the Group for the current period is lower than the statutory tax rate due mainly to the non-taxable gain on disposal of royalty and the fair value gain on other investments.

#### B7. Status of memorandum of understandings

- i) AutoV Corporation Sdn Bhd (“AutoV”), a subsidiary of the Company has on 28 July 2017 entered into a memorandum of understanding for strategic alliance with Ningbo Auto Components Industry Association (“Ningbo AIA”) which records the principal and mutual understanding whereby Ningbo AIA shall assist to develop and secure business collaborations between its members and AutoV group of companies. Discussions are still ongoing as at the date of this report.
- ii) NuEnergy had as at end September 2017 executed a Memorandum of Understanding with PT Pertamina Gas (“Pertagas”) in September 2017 to explore the gas supply from the Tanjung Enim PSC. NuEnergy is currently in an on-going discussion with Pertagas to finalise the mechanism on gas delivery and subsequently progress to negotiate the commercial terms of gas sale and supply.
