

ENVIRONMENTAL MISSION STATEMENT

As a responsible corporate citizen, Press Metal Aluminium Holdings Berhad and its subsidiaries (collectively known as “Press Metal” or “the Group”) are committed to protecting and improving the environmental qualities for sustainable development. We have established this environmental mission statement in the aspect of Climate Change, Energy, Air Emissions, Waste and Water to achieve our goals:

CLIMATE CHANGE

We are concerned about climate change issues and commit to accelerating our efforts to mitigate and minimize climate-related risks and impacts. The Group strives to:

- Achieve carbon neutrality by reducing GHG emissions from our operations through efficiency and conservation, switching to renewable energy, and sequestering and offsetting the remaining emissions.
- Strengthen the business resiliency over climate risk by supporting and aligning to the Task Force on Climate-Related Financial Disclosures “TCFD” framework.
- Implement and integrate Climate Change Strategy into our business strategy and operational decision-making routines.
- Implement a Climate Change Roadmap to mitigate materiality matters identified under climate change.
- Reduce carbon footprint across the value chain by integrating circular economy into strategy.
- Establish an internal carbon pricing mechanism.
- Enhance internal capacity building by training and raising awareness of all the workers.

ENERGY

As a company in an energy-intensive business, we are committed to transitioning to renewable energy and advancing a global strategy for energy efficiency across our organization to not only drive cost reduction and reduce our environmental footprints:

- Promote process efficiency to reduce energy consumption in our facilities, equipment, and system with technologies and approaches.
- Reduce energy consumption from non-renewable sources by shifting to green technologies.
- Continuously monitor energy usage, review periodic performance, and maintain year-on-year efforts to reduce energy consumption across the organization.
- Actively engage with employees and stakeholders to demonstrate our commitment to energy conservation principles and practices.

AIR EMISSIONS

We are dedicated to reducing air pollutants from our operations that could deteriorate the health conditions of workers and local communities and have significant adverse impacts on the ecosystem. We intend to:

- Comply with all relevant air quality and emissions standards.
- Ensure emissions are treated through engineering control and other measures before discharge to the environment to meet the regulatory standards.
- Conduct regular environmental monitoring assessments to analyze the air emissions performance.
- Implement engineering control and other applicable measures to reduce the emissions of air pollutants from operations.
- Engage with stakeholders to develop and adopt solutions and measures to reduce emissions.

WASTE

We acknowledge the negative impacts of waste on the environment and human health. We strive to maximize the value of resources while eliminating the environmental impacts attributed to waste generated. Our efforts are to:

- Conform to the applicable waste legislation.
- Minimize the amount of waste produced in our operation by adopting circularity measures to circulate products and materials.
- Implement safe methods of handling, storage, and disposal of hazardous and non-hazardous waste.
- Implement waste reduction strategies by promoting the 4R principles: Reduce, Reuse, Recycle, and Recovery in our operations.
- Collaborate with other industries and academic institutes to conduct research and studies on waste management, aiming to develop innovative solutions and strategies.
- Engage and educate employees and stakeholders to strengthen their coordination and collaboration in the waste management approach.

WATER

We understand that water is a shared resource, and it should be used responsibly, considering the future impacts on water availability and quality. To create an equitable water future, our mission is to:

- Comply with all applicable national and local regulations and standards.
- Assess the environmental impacts and identify any potential water risks in the areas where we operate.
- Implement an effective water management plan to improve water efficiency while reducing and reusing water as much as possible in our processes.
- Implement an effective monitoring program on the water quality, withdrawal, consumption, and discharge to monitor the performance regularly.
- Ensure zero pollution for surface water, groundwater, and other water resources from our daily operations.

Tan Sri Dato' Koon Poh Keong

Group Chief Executive Officer
