Quarter Ended 31 December 2022 compared to Quarter Ended 31 December 2021

The Group's revenue for the current quarter ended 31 December 2022 increased by 8% to RM16.638 million compared to RM15.422 million in the preceding corresponding quarter ended 31 December 2021. The increase was mainly due to reasons as explained below.

During the current quarter ended 31 December 2022, Animal Health Product Division recorded revenue of RM8.262 million as compared to RM7.977 million in the preceding corresponding quarter ended 31 December 2021. The increase of approximately 4% was primarily due product price revisions.

The increase of approximately 12.76% was mainly due to a surge in demand by customers, mainly cinemas and fast food chains as compared to the preceding year quarter which was undermined by Phase 3 of the National Recovery Plan (NRP).

During the current quarter ended 31 December 2022, Food Manufacturing Division recorded revenue of RM0.014 million as compared to RM0.029 million in the preceding year quarter ended 31 December 2021. The profit before tax for the current quarter ended 31 December 2022 decreased by 53% as compared to the preceding corresponding quarter ended 31 December 2021, mainly due to the much lower administrative expenses in the latter that resulted from a reversal of provision for staff expenses.

During the current year to date ended 31 December 2022, Foodservice Equipment Division recorded revenue of RM31.746 million as compared to RM17.831 million in the preceding year ended 31 December 2021. The increase of approximately 78% was due to overall increased demand for our food service equipment and food supplies by our customers following the reopening of international borders on 1 April 2022 and lifting of almost all Covid-19 restrictions and preventive measures from 1 May 2022.

During the current year to date ended 31 December 2022, Food Manufacturing Division recorded revenue of RM0.029 million as compared to RM0.048 million. The decrease of approximately 40% was due to decrease in demand from customers during the current year to date.

The decrease in profit before taxation compared to the immediate preceding quarter was mainly due to decrease in other income and increase in selling and distribution expenses during the current quarter.

B3. Prospects

The Group, whose fundamentals remain strong, is well-positioned to take advantage of the recovering economy in 2023. Bank Negara's recently released Q4 2022 data shows that the country is unlikely to go into recession and that growth will moderate in 2023, with inflation under control. The formation of a unity government will also contribute to the strengthening of the economy and restore investor confidence. This is evident by the recent strengthening of the Ringgit, which has brought much relief to the Group, whose inventories are mostly purchased using USD.

Despite the positive outlook, the economy will continue to be impacted by geopolitical tension, war, and supply chain disruptions. To counteract this, the Group has been steadily building up a buffer inventory using its healthy operating cash built up over the years. This will provide a cushion against any potential disruptions and allow the Group to continue to operate smoothly.

The Group aims to continue to grow its order book and further expand its clientele base by widening its product range. This, combined with its strong financial position, positions the company well to take advantage of the recovering economy and continue to grow in 2023. As the economy continues to recover, the Group is well-positioned to continue to grow and strengthen its position in the market.
