

ENERGY MANAGEMENT POLICY

Press Metal Aluminium Holdings Berhad and its subsidiaries (collectively known as “Press Metal” or “the Group”) strive to reduce our environmental impact and promote sustainable practices. This Policy outlines our commitment to the efficient use of energy, our aim to reduce energy consumption, and our efforts to minimize our environmental footprint and contribute to a more sustainable future.

Press Metal is committed to: -

- Comply with legally mandated requirements and with requirements to which Press Metal voluntarily subscribes that relate to energy management and conservation.
- Minimize our energy consumption in all operations and activities through regular monitor our energy usage to identify areas where we can improve efficiency and reduce energy wastage.
- Support sustainable energy management by exploring and implementing new technologies and equipment designs that minimize energy wastage.
- Actively explore and consider the use of renewable energy sources, where feasible and cost-effective.
- Support the procurement of energy-efficient products and services, and design activities related to energy performance if possible.
- Engage and educate our employees on energy conservation and efficiency practices to encourage their active participation and support.
- Communicate our energy management policy and performance to our employees, contractors, suppliers, and all relevant stakeholders.
- Periodically review and improve our energy management practices and performance, setting objectives and targets, as well as tracking progress towards achieving them.
