

Information Security Policy

As the world progresses into the digital age, corporations are exposed to evolving risks and faced with ever increasing cybersecurity threats.

Yinson Group Commitment

At Yinson Group, we believe protection of our information forms the foundation of trust and reliability in our business relationships.

We strive to uphold the highest standards in ensuring all our digital and physical information assets are universally compliant with worldwide standards. Confidentiality, Integrity, and Availability constitutes the heart of Yinson Group's Information Security.

Our Approach

Yinson's Information Security framework is formulated from the industry-recognized cybersecurity framework from the National Institute of Standards and Technology (NIST).

Through structured education, trainings, and campaigns, we aim to enable all Yinson Group employees to understand that everyone has a part to play in ensuring the safety of Yinson's information assets.

This policy is applicable to all Yinson personnel and contractors engaged in activities under or for Yinson. The Group Chief Information Officer of YHB is accountable to the Board of Directors for ensuring that this policy is implemented in its entirety.

For more information regarding Information Security at Yinson, please contact our IT Security staff at it.security@yinson.com.
