B3. Prospects for 2025

The imposition of US reciprocal tariffs on major trading nations globally continues to erode business confidence and stoke economic uncertainty. However, the recent announcement of trade agreements between the US and several of its trading partners, including Malaysia, has helped ease tariff-related uncertainties and improve sentiment.

Back home, the Malaysian economy expanded by 5.2 per cent in the third quarter of 2025, compared to 4.4 per cent in the preceding quarter, mainly driven by household spending and tourism-related activities. Overall, the economic performance for the first three quarters of 2025 increased 4.7 per cent as compared to 5.2 per cent during the same period in the previous year. The global trade situation is dampening business outlook, which has a spillover effect on Bursa exchange market sentiment and trading volume.

Notwithstanding the unfavourable market condition, the Group continues to enhance its existing system capability and develop new products and services to refresh and expand its service and product line-up, including building Artificial Intelligence (AI) technology into our upcoming offerings. Concurrently, the Group seeks to improve productivity and efficiency in resource utilisation, monitor our spend, review processes and procedures to reduce waste, with the aim of ensuring margin growth.

Barring any unforeseen circumstances, the Group is cautiously optimistic on the performance of our business ahead.
