B3. Prospects for 2026

The ongoing US-Iran war and US trade war with major trading nations globally continues to erode business confidence and stoke economic uncertainty. Back home, Malaysian economy expanded by 5.4% in the first quarter of 2026. While this is a moderation from the 6.3% growth recorded in the final quarter of 2025, the central bank described the performance as "firm," driven largely by resilient domestic demand and a rebounding electronics sector. Full-year growth for 2026 to fall within the 4% to 5% range. However, global trade situation continues to dampen overall business outlook, which has a spillover effect on Bursa exchange market sentiment and trading volume.

Notwithstanding the unfavourable market condition, the Group continues to enhance its existing system capability and develop new products and services to refresh and expand its service and product line-up, including building Artificial Intelligence (AI) technology into our upcoming offerings. Concurrently, the Group seeks to improve productivity and efficiency in resource utilisation, monitor our spend, review processes and procedures to reduce waste, with the aim of ensuring margin growth.

Barring any unforeseen circumstances, the Group is cautiously optimistic on the performance of our business ahead.
