Q2 2026
HIGHLIGHTS

Q2 2026 Key Highlights

Exceptional Q2 performance, driven by strong Petroleum earnings, supporting consistent shareholder returns

Financial Highlights

Revenue Growth

Revenue

USD 1,200 Million

90% YoY
65% QoQ

Earnings Growth

Profit After Tax

USD 293 Million

>100% YoY
55% QoQ

Strong Cash Generation

Cash Flows from Operations

USD 599 Million

60% YoY
93% QoQ

Consistent Shareholders Returns

Dividend Declared

8 sen per share

USD 88 Million

*Note: QoQ represents Q2 2026 against Q1 2026
YoY represents Q2 2026 against Q2 2025*

Continued strategic execution strengthens contracted earnings visibility and supports longer-term growth

MISC ENTERPRISE STRATEGY

Resilient Core

Strengthening our core businesses through contracted growth

Two LNG carriers delivered to SRM

Secured long-term charter contract for a FSRU with PETRONAS GAS Bhd.

Strategic Partnership

MHB signed MoU with Hanwha Power Systems Co., Ltd. to pursue and develop newbuilding projects

Profitable New Energy

Expanding into new energy opportunities for future growth

Secured a long-term charter for a liquefied carbon dioxide carrier (LCO2) with Northern Lights JV DA, alongside consortium partner K Line

Decarbonisation

Improving efficiency and reducing emissions intensity

Current Progress

GHG Intensity

4.92 gCO₂e/ton-nm
(January - June 2026)

≡ **2% YoY**

Note:

YoY represents January–June 2026 against January–June 2025

Awards & Recognitions

Safety Excellence

AET was awarded the Jones F. Devlin Safety Award for 46 vessels

FINANCIAL PERFORMANCE

Q2 2026 Financial Highlights

Stronger Q2 2026 earnings and operational cash generation, anchored by robust Petroleum performance, with cash flows further complemented by advance customer receipts and higher project cash collections in the Offshore segment

REVENUE

Revenue grew year-on-year driven by stronger Petroleum freight rates and earning days, coupled with higher revenue recognition from Offshore and Heavy Engineering projects

OPERATING PROFIT

Group operating profit improved year-on-year, primarily attributable to stronger Petroleum margins, with lower contributions from the GAS and Offshore segments partially moderating the increase

PROFIT/(LOSS) AFTER TAX

PAT strengthened year-on-year, supported by higher operating profit, lower impairment losses and gains from vessel disposals

CASH FLOWS FROM OPERATIONS

Higher Q2 2026 CFFO marked by advance customer receipts and higher project cash collections in the Offshore segment, coupled with stronger operational cash generation from the Petroleum segment

Balance Sheet & Gearing

Stable balance sheet and prudent risk management

The Group's balance sheet remains stable, with a shift in debt composition due to higher drawdown of floating-rate debt (Dec 2025: 94% fixed, 6% floating).

Gearing ratio improved, on the back of stronger equity, while net gearing further strengthened supported by higher cash position.

**All figures in USD Million unless otherwise stated*

Cash & Debt Balances

Healthy cash and stable debt position

Cash balances as at June 2026 strengthened, anchored by higher net cash generated from operations, partially offsetting capex payments in the first half of 2026.

**All figures in USD Million unless otherwise stated*

Q2 2026 Financial Performance by Business Segments

Petroleum drove the exceptional Q2 earnings uplift, while other segments continued to provide resilient contributions

GAS

PETROLEUM

OFFSHORE

HEAVY ENGINEERING

**All figures in USD Million unless otherwise stated*

■ Revenue ■ Operating Profit ■ PAT

MARKET ENVIRONMENT

LNG Shipping

LNG market growth fundamentals remains intact

Global LNG Import Forecast

Global LNG Liquefaction Capacity Outlook

Source: Drewry and Woodmac

Global LNG import volumes are expected to remain broadly unchanged in 2026, amid elevated LNG prices and supply disruptions, before growth resumes from 2027 onwards. Meanwhile, global liquefaction capacity is projected to grow at 10% CAGR through 2031.

LNG Shipping

Elevated LNGC fleet growth continues alongside expanding LNG supply capacity

Source: Drewry

The orderbook remained elevated in Q2 2026, driven by new LNG projects and ongoing fleet renewal initiatives.

The LNGC fleet is projected to grow at 7% CAGR through 2031.

LNG Shipping

Modern LNGC charter rates to remain supported

Source: Clarksons and Drewry

Modern LNGCs are expected to remain the preferred choice for medium- and long-term employment, while older DFDE/TFDE and steam turbine vessels will continue to face greater competitive pressure.

Petroleum Shipping

High orderbook-to-fleet ratio reflects continued fleet rejuvenation and rising vessel supply

Note: *as at 30 June 2026

Source: Drewry

The crude tanker newbuilding activity remained high in Q2, particularly for VLCC and Suezmax vessels. The crude tanker fleet is projected to grow at 2% CAGR through 2031, supported by fleet rejuvenation efforts and need to modernise fleet.

Petroleum Shipping

Crude tanker rates remain elevated but have begun to moderate from recent highs

Crude tanker spot rates spiked in Q1 and eased in Q2. Notwithstanding, crude tanker markets remain elevated amid continued geopolitical uncertainty in the Middle East.

Offshore

Global offshore CAPEX is projected to reach USD200 billion by 2030

This reflects ongoing commitment to exploring and developing offshore resources, especially deepwater projects, despite project execution challenges and higher cost pressures.

Offshore

FPSO growth remains concentrated in the South America, Africa and Asia-Pacific regions

FPSO demand outlook remains robust over the next three years, with operators focusing on key growth regions in South America, Africa and Asia-Pacific, which together account for over half of projected FPSO awards.

APPENDICES

Fleet Information as of 30 June 2026

	Vessel Type	Total Vessels	Owned	Chartered-In	Average Age (years)		Contracted Newbuilds/Conversions
					MISC	Industry	
GAS	LNG	30	29*	1	11.0	10.4	14**
	FSU	3	3	--	10.0	--	--
	VLEC	6	6	--	6.0	--	2
