Impairment Charges in PBIT (RM'mn)

RATIONALE

Liberian Operations

-256

- Lack of progress on expansion of planted area due to increasingly stricter social and environmental standards
- Lower than expected yields due to extreme dry weather conditions
- High cost of operations
- Risk of operational disruption caused by outbreak of diseases from time-to-time
- Challenges with the local communities

MyBiomass

-8

- The company targeted to pioneer the production of high value green chemicals in 2013 using palm-based renewable sources such as empty fruit bunches instead of fossil fuels
- Amid the decline in fossil fuel prices, the biomass-based-to-green chemicals business is taking a longer time to mature and gain customer acceptance than originally anticipated

Emery Oleochemicals

-

- Overcapacity situation in oleo basics market lead to stiff competition and declining margins especially in the Asia Pacific region
- Challenging market environment – certain specialty products have commoditised over time, thus reducing margins
- In order to increase its competitiveness and keep up with market demands, significant and continuous investments will be required to enhance its plants in the Asia Pacific and North America regions

Borrowings & Gearing Ratios

Higher borrowings arising from lower cash generated from operations amid weak CPO & PK prices, as well as the appreciation of foreign currencies

- Net loans raised totaling RM32mn arising from lower cash generated from operations
- Appreciation of USD and EUR against RM by 1% and 3% respectively, resulting in an impact of RM45mn

Note: ¹ Gross Gearing is based on Total Borrowings divided by Total Equity

² Net Gearing is based on Total Borrowings less Bank Balances, Deposits & Cash divided by Total Equity

- **PNG/SI:** Weaker production on the back of heavy rainfall which interrupted bunch pollination
- **Liberia:** FFB production was 21% higher YoY in Q3 FY2019 due to improving age profile and better control over recovery of FFB

Sustainability

SD Plantation's sustainability agenda remains at the forefront of the company's operations

SD Plantation Works With Partners To Strengthen Its Commitment Towards A Sustainable Supply Chain

① Partnership with Conservation International (CI)

- The partnership is to further instill sustainability into the core of our operations and supply chain
- First phase of the collaboration will be an independent review by CI, followed by their suggestions to strengthen SD Plantation's sustainability practices and culture based on the findings
- The collaboration will help create a pathway for other players to follow, in hopes of leading to a sustainable transformation of not just the palm oil industry but also the entire agricultural sector

② Radar Alerts for Detecting Deforestation (RADD)

- Collaboration with 9 other major palm oil producers and buyers to support and fund the development of a new, publicly available radar-based forest monitoring system
- The partnership will make it much easier for companies and stakeholders to spot deforestation activities in near-real-time and with greater accuracy to mobilise support on the ground
