B1 Review of performance

Performance of the current quarter against the preceding year corresponding quarter

The Group's revenue of RM31.113 million in the current financial quarter under review is 14.3% or RM5.189 million lesser than the revenue of RM36.302 million posted in the preceding year corresponding quarter; while the gross profit ("GP") of RM4.311 million attained in the current quarter is RM1.049 million or 19.6% less than the RM5.360 million GP reported in the preceding year corresponding quarter. The higher revenue in the preceding year corresponding quarter was mainly due to a back-order resulting from the recovery of the Movement Control Order. Meanwhile in the current quarter under review, the depreciation of our currency has further weakened the sentiment of the economy as the volatility of the costs of materials remained a challenge for consumers to be cautious in investments, expansion, and expenditure.

The Group's profit before tax ("PBT") in the current financial quarter under review amounted to RM0.747 million representing a decline of 75.5% or RM2.312 million from the preceding year's corresponding quarter's PBT of RM3.059 million. The notable decrease is due to a considerably lower share of results of an associate, which recorded a surge in sales in the preceding year corresponding quarter and lower sales in the current quarter.

B2 Variation of results against preceding quarter

	INDIVIDUA	INDIVIDUAL QUARTER			
	CURRENT	CURRENT PRECEDING			
	QUARTER	QUARTER			
	31.05.2023	28.02.2023	Variance		
	RM'000	RM'000	RM'000	%	
Revenue	31,113	27,735	3,378	12.18	
PBT	747	557	190	34.11	

The Group recorded a revenue growth of RM3.378 million or 12.18% for the current quarter under review, reaching RM31.113 million compared to RM27.735 million achieved in the preceding financial quarter ended 28 February 2023. However, PBT between both quarters remained relatively comparable, with only a marginal increase of RM0.190 million in the current quarter. Overall, the Group posted a PBT of RM0.747 million in the current financial quarter as compared to the RM0.557 million recorded in the preceding financial quarter.

B3 Prospects

Malaysia recorded a 5.6% gross domestic product (GDP) growth in the first quarter of 2023, (4Q 2023: 7.1%; 3Q: 14.1%; 2Q: 8.8%). The growth is mainly contributed by strong domestic demand, further expansion of household spending, continued investment activities, improvement in labour market and higher tourism activities. However, the outlook remains susceptible to weaker global growth, headwinds from elevated inflation, and tighter monetary policy as well as escalation of geopolitical tensions (Source: Bank Negara Malaysia's Quarterly Bulletin 1Q 2023).

In light of the persistent challenging operating environment and volatility of raw material prices, businesses and customers have taken the approach of tactically reducing their target inventory holdings and deferring their forecasted orders as a precaution against potential future uncertainties. In response to these market conditions, the Group must proceed with caution and navigate through the unpredictable markets. This involves implementing measures to enhance operational efficiency, improving sales performance, building resilience in the supply chain, expanding product portfolio, and exercising prudence in cost optimisation to minimise any adverse effect on the Group's profitability to achieve sustainable growth.

On the other hand, the Group is hopeful for an improved contribution from its operations in the East Coast region, which has been facing a downturn in its performance. The Group anticipates that the associate company's performance will recover, leading to a positive impact on the overall financial results. In the meantime, EV Connection Sdn Bhd ("EVC"), in which the Group had acquired a stake, continues to experience positive developments due to the accelerated adoption of electric vehicles in Malaysia which is driven by the government's initiatives towards its Environmental, Social, and Governance (ESG) commitments. EVC is also a provider of solar engineering, procurement, construction, and commissioning solutions.

Notwithstanding the above, the Board recognises the challenges ahead and remains cautious on the prospects of the Group. However, the Group is steadfast in its commitment to advancing business sustainability and striving for long-term success.

B4 Profit forecast

The Group did not issue any profit forecast or guarantee during current financial quarter under review.

Effective tax rate (%)	38%	18%	38%	18%

The effective tax rate for the current financial quarter ended 31 May 2023 was higher than the statutory tax rate of 24% due to non-deductible expenses. In comparison, the preceding corresponding quarter's tax rates were lower mainly due to the non-taxable effects of share of results of an associate.

Income tax expense is recognised based on management's best estimate.
