The Board of the Directors ("the Board") proposes to seek renewal of authority from its shareholders to enable the Company to purchase and/or hold as treasury shares in aggregate of up to ten percent (10%) of the total number of issued shares of the Company at any point in time through stockbroker(s) to be appointed by the Company.

As at 30 June 2023, the total number of issued shares of the Company is represented by 562,353,272 ordinary shares, equivalent to RM148,916,212.65. Hence, the maximum number of shares may be purchased by the Company will be 56,235,327 ordinary shares.

The approval from the shareholders for the Proposed Renewal of Share Buy-Back Authority will be effective immediately upon the passing of the ordinary resolution for the Proposed Renewal of Share Buy-Back Authority until:

- (a) the conclusion of the next Annual General Meeting ("AGM") of the Company following the general meeting at which such resolution was passed, at which time it will lapse, unless by resolution passed at a general meeting, the authority is renewed; or
- (b) the expiration of the period within which the next AGM after that date is required by law to be held; or
- (c) revoked or varied by ordinary resolution passed by the shareholders of the Company in general meeting;

whichever occurs first.

In accordance with the Main Market Listing Requirements of Bursa Securities ("the MMLR"), a share buy-back under the Proposed Renewal of Share Buy-Back Authority must be made wholly out of retained profits of the listed company. The maximum amount of funds to be allocated for the share buy-back will be subject to the availability of retained profits of the Company. The actual number of shares which may be purchased and the timing of the purchase(s) will depend on, inter-alia, the market conditions, the available retained earnings and financial resources of the Company as well as the Bursa Securities' requirement to maintain the necessary shareholding spread.

STATEMENT TO SHAREHOLDERS (CONT'D)

IN RELATION TO THE PROPOSED RENEWAL FOR SHARE BUY-BACK AUTHORITY BY THE COMPANY OF UP TO TEN PER CENTUM (10%) OF ITS TOTAL NUMBER OF ISSUED SHARES ("PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY")

2. DETAILS OF THE PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY (CONT'D)

Based on the Company's latest audited financial statements for the financial year ended 31 March 2023 the retained profits of the Company amounted to RM3.97 million.

The funding of the purchase(s) under Proposed Renewal of Share Buy-Back Authority will be through internally generated funds and/or bank borrowings, the proportion of which will depend on the quantum of purchase consideration as well as the availability of any internally generated funds and borrowings and repayment capabilities of the Group at the time of purchase(s). As such, the funding is not expected to have a negative bearing on the cashflow position of the Group.

The amount of funds to be utilised for the purchase(s) under Proposed Renewal of Share Buy-Back Authority will only be determined later depending on the actual number of the Company's shares to be purchased, the availability of funds at the time of purchase(s) and other relevant cost factors.

Pursuant to the Listing Requirements, the Company may only purchase its own shares on Bursa Securities at a price which is not more than 15% above the weighted average market price for the shares for the five (5) market days immediately before the date of the purchase(s). The Company may only resell the purchased shares held as treasury shares on Bursa Securities at:-

- (a) a price which is not less than the weighted average market price for the shares for the five (5) market days immediately before the resale; or
- (b) a discounted price of not more than five percent (5%) to the weighted average market price for the shares for the five (5) market days immediately before the resale provided that:-
 - (i) the resale takes place no earlier than thirty (30) days from the date of purchase; and
 - (ii) the resale price is not less than the cost of purchase of the shares being resold.

Pursuant to the provisions of Section 127(4) of the Act, the Directors may deal with the shares in the following manner:-

- (i) cancel the shares so purchased;
- (ii) retain the shares so purchased in treasury, which may be distributed as share dividends to the shareholders and/or be resold on Bursa Securities in accordance with the relevant rules of Bursa Securities and/or be transferred for the purposes of an employees' share scheme and/or be transferred as purchase consideration and/or be cancelled subsequently and/or be sold, transferred or otherwise be used for such purposes of the Minister may by order prescribe; or
- (iii) retain part of the shares so purchased as treasury shares and cancel the remainder.

While the purchased shares are held as treasury shares, the rights attached to them as to attending meetings, voting, receiving dividends and participation in other distributions whether cash or otherwise shall not be conferred to the holder of such treasury shares and the treasury shares shall not be taken into account in calculating the number or percentage of shares or of a class of shares in the Company for any purpose including substantial shareholdings, take-overs, notices, the requisitioning of meetings, the quorum for a meeting and the result of a vote on a resolution at a meeting.

STATEMENT TO SHAREHOLDERS (CONT'D)

IN RELATION TO THE PROPOSED RENEWAL FOR SHARE BUY-BACK AUTHORITY BY THE COMPANY OF UP TO TEN PER CENTUM (10%) OF ITS TOTAL NUMBER OF ISSUED SHARES ("PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY")

3. RATIONALE FOR THE PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY

The Proposed Renewal of Share Buy-Back Authority will help stabilise the market price as well as the supply and demand of the Company's shares and this is expected to enhance investors' confidence in the performance and the price of the Company's shares traded. All things being equal, the Proposed Renewal of Share Buy-Back Authority, whether the Company's shares to be purchased are maintained as treasury shares or cancelled, will improve the Earnings Per Share ("EPS") of the Company due to the reduction in the number of shares used for the purpose of computing EPS. This in turn, may have a positive impact on the market price of shares. If the purchased shares are held as treasury shares, they could be resold with the intention of realising a potential gain and/or distributed as share dividends to reward the shareholders of the Company.

In the event the treasury shares are distributed as share dividends to shareholders, it will serve as a reward to shareholders of the Company.

4. POTENTIAL ADVANTAGES AND DISADVANTAGES OF THE PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY

The potential advantages of the Proposed Renewal of Share Buy-Back Authority to the Company and its shareholders are outlined in Section 3 of this Statement.

The potential disadvantages of the Proposed Renewal of Share Buy-Back Authority to the Company or its shareholders are as follows:-

- (i) the Proposed Renewal of Share Buy-Back Authority, if implemented, would reduce the financial resources of the Group and may result in the Group foregoing better investment opportunities that may emerge in future; and
- (ii) the Proposed Renewal of Share Buy-Back Authority may also reduce the amount of resources available for the payment of cash dividends to shareholders of the Company.

However, the financial resources of the Group may increase pursuant to the resale of the purchased shares held as treasury shares at prices higher than the purchase price. In that regard, the Company would buy back the shares only after the Directors have given due consideration to the potential impact on the Group's earnings and financial position and the Directors are of the opinion that it would be in the interests of the Company and the minority shareholders to do so.

5. FINANCIAL EFFECTS OF THE PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY

5.1 Share Capital

The effect of the purchase(s) under the Proposed Renewal of Share Buy-Back Authority on the number of issued shares of the Company will depend on whether the purchased shares are cancelled or retained as treasury shares. The share buy-back will result in a reduction in the number of issued shares of the Company if the purchased shares are cancelled.

STATEMENT TO SHAREHOLDERS (CONT'D)

IN RELATION TO THE PROPOSED RENEWAL FOR SHARE BUY-BACK AUTHORITY BY THE COMPANY OF UP TO TEN PER CENTUM (10%) OF ITS TOTAL NUMBER OF ISSUED SHARES ("PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY")

5. FINANCIAL EFFECTS OF THE PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY (CONT'D)

5.1 Share Capital (cont'd)

In the event the share buy-back is implemented in full and all the purchased shares are subsequently cancelled, the proforma effects on the total number of issued shares of the Company as at 30 June 2023, are as follows:-

	Number of Shares
Existing number of issued shares as at 30 June 2023	562,353,272
Cancellation of purchased shares	(56,235,327)
Resultant number of issued shares upon completion of the share buy-back	<u>506,117,945</u>

However, purchase(s) under the Proposed Renewal of Share Buy-Back Authority will have no effect on the number of issued shares of the Company if all the purchased shares are to be retained as treasury shares, resold or distributed to the shareholders.

5.2 Net Assets per Share

The purchase(s) under the Proposed Renewal of Share Buy-Back Authority may result in an increase or decrease in the Net Assets ("NA") per share depending on the purchase price(s) of the shares bought back. The NA per share will increase if the purchase price is less than the NA per share and will decrease if the purchase price exceeds the NA per share at the time when the shares are purchased.

In the event the purchased shares which are retained as treasury shares are resold, the NA of the Group will increase or decrease depending on whether a gain or a loss is realised upon the resale. The quantum of the increase or decrease in NA will depend on the actual disposal price and the number of the purchased shares, retained as treasury shares, which are resold.

5.3 Working Capital

The purchase(s) under the Proposed Renewal of Share Buy-Back Authority will reduce the working capital of the Group, the quantum of which depends on the actual purchase price and number of shares purchased. However, this is not expected to have any material adverse effect on the financial position of the Group. If the purchased shares are treated as treasury shares and subsequently resold on Bursa Securities, the working capital of the Group will increase if the Company realized a gain from the resale.

5.4 EPS

The effect of purchase(s) under the Proposed Renewal of Share Buy-Back Authority on the EPS of the Company is dependent on, inter-alia, the actual number of the shares bought back, the purchase prices of the shares and the effective funding cost to the Company.

Assuming that the purchased shares are retained as treasury shares and resold, the EPS will increase if the selling price is higher than the cost of the shares purchased and the interest foregone or interest expense incurred on the purchased shares. If the purchased shares are cancelled, the EPS will increase provided that the income foregone and interest expense incurred on the purchased shares is less than the EPS before the share buy-back.

5. FINANCIAL EFFECTS OF THE PROPOSED RENEWAL OF SHARE BUY-BACK AUTHORITY (CONT'D)

5.4 EPS (cont'd)

The effective reduction in the number of shares in the computation of the consolidated EPS pursuant to the share buy-back may generally, all other things remaining equal, have a positive impact on the consolidated EPS of the Company for the financial year in which the shares are purchased.

5.5 Dividends

Assuming the Proposed Renewal of Share Buy-Back Authority is implemented in full, dividends will be paid on the remaining number of shares of the Company (excluding the shares already purchased). The share buy-back may reduce the amount of distributable reserves available for payment of dividend in the immediate future.

6. DIRECTORS' AND SUBSTANTIAL SHAREHOLDERS' INTERESTS

The effects of the purchase(s) under the Proposed Renewal of Share Buy-Back Authority on the shareholdings of the directors and substantial shareholders based on the Company's Registers of Directors' Shareholdings and Substantial Shareholders as at 30 June 2023 are as follows:-

MANAGEMENT DISCUSSION AND ANALYSIS

Iconic Worldwide Berhad (“IWB”), a company listed on the Main Market of Bursa Malaysia, is primarily involved in property development, manufacturing of Personal Protective Equipment (“PPE”), and tourism services. IWB underwent an internal restructuring and rebranding exercise in 2019 following which between 2020 and 2022, IWB and its subsidiary companies (the “IWB Group”) achieved a turnaround, with revenue rising at a compound annual growth rate (CAGR) of over 50%. This performance was achieved despite business interruptions faced as a result of the prolonged COVID-19 pandemic. After posting net profits for three consecutive financial years, in FY2023, the IWB Group posted a net loss of RM24.65 million, mainly due to a one-off adjustment on the carrying value of its PPE inventories to reflect differences between the cost of production of its inventories and the realisable value of those inventories given the current market conditions.

The Malaysian economy continued to maintain positive momentum since 2022 up to March 2023, helped by a strong domestic demand, rising manufacturing exports and higher commodity prices.

In the fourth quarter of 2022, Malaysia’s gross domestic product (“GDP”) grew by 7.0% year-on-year (“y-o-y”) and in the first quarter of 2023, GDP grew at a pace of 5.6% y-o-y.

The Malaysian Rubber Glove Manufacturers Association (MARGMA) expects global glove demand to return to its historical growth trajectory of around 15% during the 2023 calendar year. MARGMA’s forecast on glove demand is expected to be between¹ 446-458 billion pieces in 2023. While this figure is still below the 492 billion pieces recorded in 2021, it is important to note that 2021 was marked extraordinary by the unprecedented hike in demand for gloves to combat COVID-19. In addition to this, there are also other signs that glove demand is on the path to recovery. The glove average selling prices (ASPs) which had been declining until early 2023, now appears to be stabilizing with positive likelihood of achieving the pre-COVID prices soon. The glove manufacturing industry has also entered a phase of consolidation which should lead to an easing of possibilities of oversupply in the market.

The PPE manufacturing business is expected to continue and remain as the largest revenue contributor for the IWB Group moving forward.

Besides glove manufacturing activities, the IWB Group also manufactures disposable face masks under the Iconic Medicare brand. Demand for face masks has been sustained in the post-COVID era mainly due to consumer awareness on the benefits and importance of wearing face masks. As such, the IWB Group believes that the face masks will continue to be a key contributor to the future revenue for the IWB Group.

¹ 399 billion pieces in 2022

MANAGEMENT DISCUSSION AND ANALYSIS (CONT'D)

In FY2023, the IWB Group made additional investments in automation technology for its glove dipping lines at IWB Group's new glove and face mask manufacturing facility in Batu Kawan Industrial Park. This will boost the sustainability of the IWB Group's glove production activities while lowering manufacturing costs and driving competitive edge as the market recovers.

With the IWB Group continuously working towards establishing its presence as a global manufacturer of premium quality medical gloves and face masks, the re-opening of economies and the corresponding increase in day-to-day activities should augur well for demand and revenue growth in FY2024.

As for the Property Development segment, where the IWB Group is involved in the development and sale of commercial and residential properties, there have been signs of sustained momentum as Malaysia transitions into the endemic phase of COVID-19. This was reflected in the 23.6% y-o-y rise in the value of transactions in Malaysia's property market, for the 2022 calendar year. Transaction volumes recorded a 29.5% rise y-o-y, buoyed by a pickup in residential and commercial property sales. Moving forward, the full reopening of businesses and normalisation of retail activities are expected to continue benefiting local property players, including the IWB Group.

As for FY2023, the rise in Malaysia's overnight policy rates, along with the expectations of further rate hikes is expected to tamper with the momentum in the real estate business, both from the demand and supply side. Nonetheless, the impact of tightening financial conditions is expected to be offset by the implementation of projects announced in the recently re-tabled Malaysia's Budget 2023 with broader economic momentum such as the ongoing government-led house ownership campaigns, such as the Keluarga Malaysia Home Ownership Initiative ("i-MILIKI") initiative, which runs from 1 June 2022 until 31 December 2023. IWB Group will continue to strategically positioning itself as a premier real estate developer, enabling it to benefit from a sustained revival in the property market.

TOTAL TOURIST ARRIVALS BY MONTHS

Since the full reopening of international borders, Malaysia's tourism sector has experienced a steady improvement in business activity. In 2022, Malaysia recorded a total of 10.1 million tourist arrivals, beating its initial forecast of 9.2 million tourist arrivals. For context, there were just 130,000 tourist arrivals in 2021. For 2023, Malaysia is targeting 16.1 million tourist arrivals, up 60% from a year ago. There are signs that Malaysia is on track to hit this target with international tourism strengthening following the rise in tourist arrivals from China, ASEAN, the Middle East and Europe. According to Tourism Malaysia, the average hotel occupancy rate for January to September 2022 was 47%, compared to 22% in 2021. The pre-pandemic average occupancy rate was about 60%.

MANAGEMENT DISCUSSION AND ANALYSIS (CONT'D)

In Malaysia's Budget 2023 presentation, the Prime Minister of Malaysia declared 2025 as 'Visit Malaysia Year,' targeting 23.5 million tourist arrivals. The last time Malaysia recorded more than 20 million tourist arrivals was in 2019.

With international tourism expected to strengthen following the global reopening of borders, the IWB Group may be poised to be a beneficiary of a sector recovery. However, following the prolonged pandemic, IWB Group had to discontinue most of its tourism and tourism-related businesses except for the hospitality-related business segment where IWB Group is involved in providing hospitality management services.

Nonetheless, in light of the gradual recovery in the tourism industry, the IWB Group is likely to explore possibilities of reviving its tourism business segment.

REVIEW OF FINANCIAL PERFORMANCE

If 2020 was marked by glove manufacturers as a year for unprecedented surge in glove ASPs and demand, 2022 will be marked as a year for unprecedented decline in the glove ASPs as the world entered the post-pandemic era. The need to clear the high stockpiles created in anticipation of the significant increase in ASPs during 2020 and 2021 mainly attributed to the significant drop in ASPs in 2022 as these stockpiles needed clearing.

According to the Malaysian Rubber Glove Manufacturers Association (MARGMA), there was a 19% drop in global demand for rubber gloves during the 2022 calendar year. This resulted in an unfavourable impact to IWB Group's revenue as contributions from the PPE manufacturing segment, particularly the glove product declined.

The IWB Group's revenue was² RM86.84 million in FY2023, down 18.9% y-o-y from RM107.14 million in FY2022. The contribution of the PPE manufacturing segment to overall revenue dropped to 55.1% in FY2023, from 63.5% in FY2022.

During the financial quarter ended 31 March 2023 ("4Q 2023"), IWB Group impaired the value of its inventories. This impairment, which represented a one-off adjustment amounting to approximately RM16.69 million, was made to account for differences between the initial cost of producing the gloves and masks in its inventories, and the realisable value of those inventories.

Weighed by the decline in revenue and the impairment charge, the IWB Group posted a loss before tax ("LBT") of RM25.94 million, as compared to a profit before tax ("PBT") of RM12.30 million in FY2022.

As of end FY2023, the Group's cash and bank balances stood at RM13.47 million, 37.4% lower than RM21.51 million as of end FY2022. The decline in cash and bank balances was due to the use of internally generated funds to finance the acquisition of assets and payments of finance costs under the manufacturing segment and the settlement of obligations due under the Property Development segment. The Group's gearing level is 0.28³, which remains within a manageable level.

The Group's net assets as of end FY2023 stood at RM176.19 million, with a net tangible asset per share of 0.31 sen. The Group's current ratio, which is a liquidity indicator that measures its ability to pay short-term obligations, remains strong at about 1.7⁴ times.

² The Group's cumulative revenue for the current financial year also registered a decline by 18.9% as compared to the preceding year corresponding financial period due mainly to the lower cumulative revenue derived from both the Manufacturing and Property segments. Property segment revenue only declined by RM1.70 million compared to last FY.

MANAGEMENT DISCUSSION AND ANALYSIS (CONT'D)

MANUFACTURING SEGMENT

In September 2020, the IWB Group ventured into the manufacturing of PPE products including disposable gloves and face masks. The decision was made in light of the need to reduce the IWB Group's reliance on the tourism services segment, which had been badly hit by the pandemic. IWB Group also saw a market opportunity in rising global demand for PPE, with disposable face masks and gloves acting as the first line of defence against infectious viruses, such as COVID-19.

Long-term glove demand has historically risen in tandem with increased public awareness of personal hygiene and the dangers of infectious diseases, particularly in emerging markets. The pandemic disrupted this trend, sparking an unprecedented surge in glove demand. As a result, the past few years have seen the entry of many new PPE players seeking to seize this market opportunity. But not all these players are capable of manufacturing high-quality gloves and face masks, at scale.

Along with world-leading production capacity, IWB Group's PPE manufacturing operations incorporate stringent quality control measures, guaranteeing optimal protection, comfort, and safety for a worldwide user base. For instance, the gloves produced comply with international standards including ISO, CE, European Standards, FDA, ASTM, and MDR, and are suitable for both medical and industrial applications. IWB Group's PPE products have also passed SMETA audits, meeting world-class corporate social responsibility standards in compliance with labor conditions, health, safety and environmental performance.

In Q4 FY2023, the IWB Group commenced the development of a pipeline of new personal care products under the Iconic Medicare brand, along with new glove products that will deliver enhanced value from an Environmental, Social and Governance (ESG) perspective. These initiatives will leverage the established brand presence of Iconic Medicare, as well as the IWB Group's manufacturing capabilities, to meet projected growth in demand as economies re-open and day-to-day activities increase.

With the world entering into the endemic stage of COVID-19, demand for PPE normalised in FY2023. Correspondingly, the IWB Group's manufacturing segment reported revenue of RM47.82 million in FY2023, down 29.7% from RM68.05 million a year earlier.

In the financial year under review, the Manufacturing segment contributed about 55.1% of the IWB Group's revenue. The segment posted a LBT of RM26.81 million, as compared to a PBT of RM6.11 million in FY2022.

PROPERTY SEGMENT

The Property segment contributed 40.5% of the Group's total revenue in FY2023. Despite the IWB Group being relatively new in the industry, having ventured into property development in FY2020, the segment has become a key contributor to the group's overall revenue.

In FY2023, the IWB Group successfully completed and delivered Iconic Point, its maiden property project, to its buyers. Built on a 8.7 acres of land, Iconic Point is the first commercial real estate development in the Simpang Ampat township in Penang. Strategically located near a KTM station and just off the North-South Expressway, Iconic Point features 49 freehold shop offices and a four-story boutique hotel. By Q2 FY2023, Iconic Point was fully taken up, having managed to attract renowned brand tenants including The Coffee Bean & Tea Leaf, McDonald's, Starbucks, Family Mart, CU Mart, ZUS Coffee, Secret Recipe and Watsons.

In FY2023, the Property Development division's revenue was RM35.20 million, down 4.6% from RM36.90 million in the previous corresponding financial year. The division reported a PBT of RM3.40 million in FY2023 as compared to RM8.56 million in FY2022.

MANAGEMENT DISCUSSION AND ANALYSIS (CONT'D)

TOURISM SERVICES SEGMENT

Before the IWB Group entered the Property Development and PPE manufacturing segments, Tourism Services segment was the IWB Group's core business segment.

However, with COVID-19 lockdowns, the closure of international borders and a protracted decline in tourism activity, the segment's performance was significantly impacted. As the pandemic raged on, IWB Group discontinued its tourism and tourism-related businesses, with the exception to its hospitality management services.

In FY2023, the tourism services segment generated RM3.57 million in revenue, or 4.1%⁵ of the Group's total topline. For perspective, this revenue figure was up 83.2% from RM1.95 million in FY2022.

In terms of its bottom line, the tourism services segment's LBT reduced to RM0.42 million in FY2023 as compared to RM0.81 million in FY2022.

MOVING FORWARD

In FY2024, the IWB Group will continue pursuing its strategy of driving growth through a diverse range of businesses. Despite geopolitical tensions and potentially weaker global trade, the government projects Malaysia's economy to expand between 4% and 5% in 2023. This should bode well for business activities and corporate earning performances, including the IWB Group. The PPE manufacturing segment will continue to spearhead the IWB Group's business direction for the coming FY.

Following the strategic one-off adjustment made to the value of its PPE inventories, IWB Group will shift its focus towards seizing new business growth opportunities. Within the PPE segment in particular, the IWB Group is confident that the glove business will soon pick up, in line with expected improvements in market demand and the stabilization of average selling prices sometime during the current calendar year. In addition, IWB Group expects the normalisation of raw material costs to enable the glove manufacturing business to be profitable in near future.

As for the Property Development business segment, the IWB Group is planning the development of Iconic Harmony, a mixed development project comprising affordable housing scheme and shophots strategically located in Alma in the Northern⁶ Region of Malaysia. This project involves the development of 751 units of affordable housing and 16 units of commercial shop lots, with an estimated gross development value (GDV) of RM255 million. Barring any unforeseen circumstances, this project is expected to commence in the third quarter of FY2024. The Iconic Harmony project will build on the success of Iconic Point, IWB Group's recently completed commercial development, and will further diversify the IWB Group's real estate portfolio.

With regards to the hospitality segment, as stated earlier, IWB Group will likely explore the possibility of reviving its tourism business. This could enable IWB Group to benefit from the recovery of international tourism arrivals in Malaysia.

Taking all these factors into consideration and barring any unforeseen circumstances, the IWB Group will strive towards ensuring improvements in its financial performance in FY2024.

⁵ 3,566 of 86,838

⁶ Despite the challenges faced by the PPE business segment the IWB Group is determined to move firmly forward with this business segment in anticipation of growth particularly in the demand for glove which experienced an unprecedented hike during the COVID pandemic and subsequently dropped over the last two to three years period mainly due to effects of stockpile clearing. The IWB Group is confident that the glove business will soon pick-up in line with the expected improvements in the market demand and stabilization of the average selling price sometime during the current calendar year. As for the property development business segment, the IWB Group is vigorously working towards the launching of its new development project in the northern region and is confident that it will be able to do so much sooner than earlier anticipated. The IWB Group is also reviewing the prospects of other development projects to be launched utilizing the available land bank. Taking this into consideration and barring any unforeseen circumstances, the IWB Group will continue to focus on working towards improving the financial performance for the next financial year.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the Group and of the Company for the current year. These matters were addressed in the context of our audit of the financial statements of the Group and of the Company as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

(a) Revenue recognition for property development activities

Revenue from property development activities during the financial year is RM35,202,288 as disclosed in Note 21 to the financial statements.

We determined this to be a key audit matter because it requires management to exercise significant judgements in estimating the progress towards complete satisfaction of performance obligations.

The progress towards complete satisfaction of performance obligations is measured using the output method, which is based on contract work certified to-date over estimated total contract sum.

Information Other than the Financial Statements and Auditors' Report Thereon (Cont'd)

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The Directors of the Company are responsible for the preparation of financial statements of the Group and of the Company that give a true and fair view in accordance with MFRSs, IFRSs, and the requirements of the Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Group and of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and of the Company, the Directors are responsible for assessing the ability of the Group and of the Company to continue as going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Group and of the Company.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

Auditors' Responsibilities for the Audit of the Financial Statements (Cont'd)

As part of an audit in accordance with approved standards on auditing in Malaysia and ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also (continued):

- (d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.
- (e) Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- (f) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communications.

Other Matter

This report is made solely to the members of the Company, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

5. PROPERTY, PLANT AND EQUIPMENT (CONT'D)

- (a) All items of property, plant and equipment are initially measured at cost. Cost includes expenditure that is directly attributable to the acquisition of the asset. After initial recognition, property, plant and equipment except for freehold land and buildings are stated at cost less accumulated depreciation and any accumulated impairment losses. Freehold land and buildings are stated at valuation, which is fair value at the date of revaluation less subsequent accumulated depreciation and any subsequent accumulated impairment losses.

Freehold land and buildings are revalued periodically, at least once every five (5) years to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of each reporting period. The surplus arising from such revaluations is credited to shareholders' equity as a revaluation reserve, net of deferred tax, and any subsequent deficit is offset against such surplus to the extent of a previous increase for the same property. In all other cases, the deficit would be charged to profit or loss. For a revaluation increases subsequent to a revaluation deficit of the same asset, the surplus is recognised as income to the extent that it reverses the deficit previously recognised as an expense with the balance of increase credited to revaluation reserve.

Depreciation is calculated to write off the cost or valuations of the assets to their residual values on a straight line basis over their estimated useful lives. The principal annual depreciation rates used are as follows:

Buildings	2% - 10%
Cleanroom	20%
Plant and machinery	5% - 10%
Motor vehicles	10% - 20%
Office equipment, infrastructure, renovation, furniture and fittings	10% - 33%

Freehold land has unlimited useful life and is not depreciated.

Capital work-in-progress represents plant and machinery under construction and was stated at cost. Capital work-in-progress is not depreciated until such time when the asset is available for use.

- (b) Classification between investment properties and property, plant and equipment

The Group has developed certain criteria based on MFRS 140 *Investment Property* in making judgement whether a property qualifies as an investment property. Investment property is a property held to earn rentals or for capital appreciation or both.

Some properties comprise a portion that is held to earn rentals or for capital appreciation and another portion that is held for use in the production or supply of goods or services or for administrative purposes. If these portions could be sold separately (or leased out separately under a finance lease), the Group would account for the portions separately. If the portions could not be sold separately, the property is an investment property only if an insignificant portion is held for use in the production or supply of goods or services or for administrative purposes. Judgement is made on an individual property basis to determine whether ancillary services are so significant that a property does not qualify as investment property.

5. PROPERTY, PLANT AND EQUIPMENT (CONT'D)

- (c) The freehold land and buildings were revalued on 31 March 2020 based on valuations carried out by external independent valuer using comparison approach.

Had the revalued assets been carried at cost less accumulated depreciation, the carrying amounts would have been as follows:

	Group		Company	
	2023	2022	2023	2022
	RM'000	RM'000	RM'000	RM'000

Buildings	68,709	69,936	1	1
	79,365	80,592	2,476	2,476

- (d) The fair value of freehold land and buildings (at valuation) of the Group and of the Company are categorised as follows:

	Group		Company	
	2023	2022	2023	2022
	RM'000	RM'000	RM'000	RM'000

Buildings	82,088	82,088	2,708	2,708
	105,938	105,938	17,958	17,958

There were no transfers between Level 1, Level 2 and Level 3 fair value measurements during the financial years ended 31 March 2023 and 31 March 2022.

Level 3 fair value of freehold land and buildings (at valuation) was determined by external and independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of property being valued. It has been derived from observable recent transacted prices of similar land and buildings in the local market. The fair value of freehold land and buildings was derived using comparison approach.

The freehold land and buildings are valued by reference to transactions of similar properties in close proximity with adjustments made for differences in location, size, accessibility, title and other relevant characteristics (if any) to arrive at market value.

The significant unobservable input into this valuation method is adjustment factors to prices of comparable assets. The estimated fair value would increase if the historical sales transaction prices were higher and vice versa.

The fair value measurements of the freehold land and buildings are based on the highest and best use which does not differ from their actual use.

- (a) Investment properties are initially measured at cost, which includes transaction costs. After initial recognition, investment properties are stated at fair value which reflects market conditions at the end of the reporting period and change in fair value is recognised in profit or loss for the period in which it arises.
- (b) Fair values of investment properties are based on valuations by registered independent valuers with appropriate recognised professional qualification and have recent experience in the location and category of the investment properties being valued.

The carrying amounts of the investment properties were based on valuation carried out by external and independent property valuers on 31 March 2023. Fair value is determined primarily based on comparison approach. The fair value measurements of the investment properties are based on the highest and best use, which does not differ from their actual use.

Comparison method

The comparison method of valuation entails separate valuations of the freehold land and buildings to arrive at the market value of the subject property.

Under the comparison method, fair value of a property is estimated based on comparable transactions. This approach is based upon the principle of substitution under which a potential buyer would not pay more for the property than it would cost to buy a comparable substitute property. In theory, the best comparable sale would be an exact duplicate of the subject property and would indicate, by the known selling price of the duplicate, the price for which the subject property could be sold.

The freehold land is valued by reference to transactions of similar lands in the surrounding area with adjustments made for differences in location, terrain, size and shape of the land, tenure, title restrictions, if any and other relevant characteristics. The estimated fair value would be higher if the differential rate is lower and vice versa.

Buildings are valued by reference to the current estimates on constructional costs to erect equivalent buildings, taking into consideration of similar accommodation in terms of size, construction, finishes contractors' overheads, fees and profits. Appropriate adjustments are then made for the factors of obsolescence and existing physical condition of the building. The estimated fair value would be higher if the estimated replacement cost is lower and vice versa.

10. TRADE AND OTHER RECEIVABLES (CONT'D)

- (a) Total receivables are classified as financial assets measured at amortised cost.
- (b) The currency exposure profile of trade and other receivables, net of prepayments are as follows:

	Group		Company	
	2023	2022	2023	2022
	RM'000	RM'000	RM'000	RM'000
Ringgit Malaysia	5,190	16,590	17,455	44,243
United States Dollar	526	3,126	-	-
	<u>5,716</u>	<u>19,716</u>	<u>17,455</u>	<u>44,243</u>

- (c) Trade receivables are non-interest bearing and the normal trade credit terms granted by the Group and the Company range from cash terms to 90 days (2022: cash terms to 90 days) and 7 days (2022: 7 days) respectively. They are recognised at their original invoice amounts which represent their fair values on initial recognition.
- (d) Non-trade portion of amounts owing by subsidiaries represent advances and payments made on behalf, which are unsecured and payable within next twelve (12) months in cash and cash equivalents, except for an amount of RM7,500,000 (2022: RM7,500,000) which were not payable within next twelve (12) months. Non-trade portion of amounts owing by subsidiaries are interest-free, except for an amount of RM15,076,358 (2022: RM40,136,043) on which interest is charged at 4.8% per annum (2022: 3.8%).

A sensitivity analysis has been performed based on the outstanding floating rate amount owing by a subsidiary as at 31 March 2023. If interest rates were to increase or decrease by 50 basis points with all other variables held constant, the profit after tax of the Company would increase or decrease by RM57,290 (2022: RM152,517), as a result of higher or lower interest income on this amount owing by a subsidiary.

- (e) The non-trade portion of amounts owing by associates are unsecured, non-interest bearing and repayable within next twelve (12) months or upon demand in cash and cash equivalents.
- (f) Impairment for trade receivables that do not contain a significant financing component are recognised based on the simplified approach using the lifetime expected credit losses ("ECL").

The Group uses an allowance matrix to measure the ECL of trade receivables based on past due aging. Expected loss rates are determined by the probability of the non-collection from the trade receivables multiplied by the amount of the expected loss arising from default. Trade receivables have been grouped based on shared credit risk characteristics - age of customer relationship and the past due days.

During this process, the probability of non-payment by the trade receivables is adjusted by forward looking information (producer price index and consumer price index) and multiplied by the amount of the expected loss arising from default to determine the lifetime expected credit loss for the trade receivables. For trade receivables, which are reported net, such impairments are recorded in a separate impairment account with the loss being recognised in the statements of profit or loss and other comprehensive income. On confirmation that the trade receivable would not be collectable, the gross carrying value of the asset would be written off against the associated impairment.

10. TRADE AND OTHER RECEIVABLES (CONT'D)

(f) (Cont'd)

Credit impaired refers to individually determined receivables who have defaulted on payments and are in significant financial difficulties as at the end of the reporting period. The Group and the Company also consider receivables having financial difficulty or with significant balances outstanding for more than 90 days overdue as credit impaired.

(g) Impairment for other receivables and amounts owing by subsidiaries and an associate are recognised based on the general approach within MFRS 9 *Financial Instruments* using the expected credit loss model adjusted by forward looking information (producer price index and consumer price index). The methodology used to determine the amount of the impairment is based on whether there has been a significant increase in credit risk since initial recognition of the financial asset. At the end of the reporting period, the Group and the Company assess whether there has been a significant increase in credit risk for financial assets by comparing the risk of default occurring over the expected life with the risk of default since initial recognition. For those in which the credit risk has not increased significantly since initial recognition of the financial asset, twelve (12) months expected credit losses along with gross interest income are recognised. For those in which credit risk has increased significantly, lifetime expected credit losses along with the gross interest income are recognised. For those that are determined to be credit impaired, lifetime expected credit losses along with interest income on a net basis are recognised.

The Group and the Company defined significant increase in credit risk based on operating performance of the other receivables, subsidiaries and an associate, change in contractual term, payment trends and past due information.

	Lifetime ECL allowance RM'000	Credit impaired RM'000	Total RM'000

Corporate guarantee given to financial institution for credit facilities granted to subsidiaries

- amount utilised	98,983	97,294

The corporate guarantee is given to financial institution as one of the securities in relation to banking facility granted to the subsidiaries.

The Group designates corporate guarantee given to bank for credit facility granted to subsidiaries as insurance contract as defined in MFRS 4 *Insurance Contracts*. The Group recognises this insurance contract as recognised insurance liability when there is a present obligation, legal or constructive, as a result of a past event, when it is probable that an outflow of resources embodying economic benefits would be required to settle the obligation and a reliable estimate can be made of the amount of obligation.

The Directors are of the view that the chances of the financial institution to call upon the corporate guarantee is remote. Accordingly, the Directors have estimated the financial impact of the guarantee as at 31 March 2023 to be insignificant.

The maturity profile of financial guarantee at the end of the reporting period based on contractual undiscounted repayment obligations is summarised in the table below:

21. REVENUE (CONT'D)

(a) Revenue from property development

Contracts with customers include multiple promises to customers and therefore accounted for as separate performance obligations. In this case, the transaction price will be allocated to each performance obligation based on the stand-alone selling prices. When these are not directly observable, they are estimated based on expected cost plus margin.

Revenue from property development is measured at the fixed transaction price agreed under the agreement.

Revenue is recognised as and when control of the asset is transferred to the customer and it is probable that the Group would collect the consideration to which it will be entitled in exchange for the asset that would be transferred to the customer. Depending on the terms of the contract and the laws that apply to the contract, control of the asset may transfer over time or at a point in time. Control of the asset is transferred over time if the performance obligation of the Group does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance obligation completed to date.

The Group recognises revenue over time using output method, which based on contract work certified to date over estimated total contract sum. The output method recognises revenue on the basis of direct measurements of value of the work performed to-date relative to the remaining work promised under the contract.

Significant judgement is required in estimating the progress towards complete satisfaction of performance obligations. In making these judgements, the Group evaluates by relying on the work of specialists.

(b) Sale of goods and services rendered

Revenue from sale of goods and services rendered is recognised at a point in time when the goods have been transferred or the services have been rendered to the customer and coincide with the delivery of goods and services and acceptance by customers.

There is no right of return provided to the customers on the sale of goods and services rendered.

There is no significant financing component in the revenue arising from sale of goods and services rendered as the sales or services are made on the normal credit terms not exceeding twelve (12) months.

(c) Rental income from investment properties

Rental income from investment properties is recognised on a straight-line basis over the lease term of an ongoing lease.

(d) Dividend income

Dividend income is recognised when the right to receive payment is established.

The primary objective of the capital management of the Group is to ensure that entities of the Group would be able to continue as going concerns whilst maximising return to shareholders through the optimisation of the debt and equity ratios. The overall strategy of the Group remains unchanged from the previous financial year.

The Group manages its capital structure and makes adjustments to it in response to changes in economic conditions. No changes were made in the objectives, policies or processes during the financial years ended 31 March 2023 and 31 March 2022.

The Group monitors capital using a gearing ratio, which is net debt divided by total equity attributable to owners of the parent. Net debt are calculated as total borrowings and lease liabilities net of cash and bank balances.

28. CAPITAL AND FINANCIAL RISK MANAGEMENT (CONT'D)

(b) Financial risk management

The financial risk management objective of the Group is to optimise value creation for shareholders whilst minimising the potential adverse impact arising from the unpredictability of the financial markets.

The Group operates within an established risk management framework and clearly defined guidelines that are regularly reviewed by the Board of Directors and does not trade in derivative financial instruments. Financial risk management is carried out through internal control systems, insurance programmes and adherence to the Group financial risk management policies. The Group is exposed mainly to credit risk, liquidity and cash flow risk, interest rate risk and foreign currency risk. Information on the management of the related exposures is detailed below.

(i) Credit risk

Credit risk is the risk of loss that may arise on outstanding financial instruments should a counterparty default on its obligations. The exposure of the Group to credit risk arises primarily from trade receivables. For other financial assets, cash and bank balances, the Group minimises credit risk by dealing exclusively with high credit rating counterparties.

The objective of the Group is to seek continual revenue growth while minimising losses incurred due to increased credit risk exposure. Credit risk in the property development activity is negligible as sales are primarily to purchasers who obtain financing from financial institutions. As such, majority of the credit risk has been effectively transferred to the financial institutions as provided for in the sales and purchase agreements. For those sales on cash basis, which only forms an insignificant portion of sales amount, credit risk is also negligible as titles will only be surrendered after full payments have been made. This is the current normal industry practice.

For the manufacturing activity, the trading terms of the Group with its customers are mainly on credit. The credit term is generally for a period of thirty (30) days, extending up to ninety (90) days for major customers. Each customer has a maximum credit limit and the Group seeks to maintain strict control over its outstanding receivables to minimise credit risk. Overdue balances are reviewed regularly by senior management.

The credit risk concentration profile has been disclosed in Note 10 to the financial statements.

(ii) Liquidity and cash flow risk

Liquidity and cash flow risks are the risks that the Group and the Company will not be able to meet their financial obligations as and when they fall due. The exposure of the Group and of the Company to liquidity risk arises principally from their various payables, borrowings and lease liabilities.

The Group practices prudent risk management to minimise the mismatch of financial assets and liabilities whilst maintaining sufficient cash and the availability of funding through certain committed credit facilities.

Owing to the nature of its businesses, the Group and the Company always maintain sufficient credit lines available to meet their liquidity requirements while ensuring an effective working capital management within the Group and the Company.

The analysis of financial instruments by remaining contractual maturities has been disclosed in Notes 6, 16, 18 and 20 to the financial statements respectively.

(b) Financial risk management (Cont'd)

(iii) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of the financial instruments of the Group and of the Company would fluctuate because of changes in market interest rates.

The primary interest rate risk of the Group and of the Company relates to interest-earning deposits and interest-bearing borrowings from financial institutions and amount owing by a subsidiary.

The Group borrows at both, floating and fixed rates of interest to generate the desired interest profile and to manage the exposures of the Group to interest rate fluctuations.

As at the end of the reporting period, the Group and the Company do not engage any interest hedging instruments in respect of such interest rate fluctuations.

The interest rate profile and sensitivity analysis of interest rate risk have been disclosed in Notes 10, 12 and 16 to the financial statements respectively.

(iv) Foreign currency risk

The Group is not significantly exposed to foreign currency risk as the majority of the transactions of the Group, assets and liabilities are denominated in Ringgit Malaysia ("RM"). The currency giving rise to this risk is primarily United States Dollar ("USD"). Foreign currency exposures in transactional currencies other than functional currency of the Group are kept to an acceptable level.

The foreign currency exposure profile has been disclosed in Notes 10, 12 and 18 to the financial statements respectively.

The following table demonstrates the sensitivity of the (loss)/profit after tax of the Group to a reasonably possible change in the foreign exchange rates against the functional currency of the Group, with all other variables held constant.
