GHIL's 9MFY14 net earnings of RM4.6m is below our expectation, making up 58% of our full year forecast. This is mainly due to lower gross margin in Transaction Payment Acquisition (TPA) segment and higher expenses in human resources for the expansion of the Group's regional businesses. TPA's revenue also came in lower than expected accounting for only 65% of our forecast. With the lower than expected 9M earnings, we reduced our FY14 and FY15 net earnings forecast respectively; and our target price is reduced to RM0.45 (RM0.58 previously) based on the revised sector PER of 21x. GHIL's share price has gone beyond its fundamentals; hence we downgrade the stock to "Take Profit".

Lower QoQ. QoQ earnings were 40% lower due to higher cost of sales, operating expenses and income tax. EBITDA margin was also lower at 10.1% vs. previous quarter's 11.4% due to the same reason.

Higher YTD earnings. 9M revenue grew strongly by 138.5% to RM115.8m due to the significant increase in TPA revenue derived from e-pay's operations. Nonetheless, the lower gross margin of TPA services and higher staff expenses dragged EBITDA margin down from 15.9% to 10.6%.

Financials. We are reducing our FY14 and FY15 net earnings forecast to RM12.2m (-14.6%) and RM17.3m (-21.2%) respectively by factoring in higher operating costs due to the regional expansion and the slower growth in the TPA services.

View and recommendation. Following the earnings reduction, we revised our target price downwards to RM0.45 (from RM0.58) based on sector PER to 21x. Nonetheless, GHIL's share price has gone beyond its fundamentals; hence we downgrade the stock to "Take Profit".
